**Modernising Social Policy** Tom Burdon, Charlie Cooper, Steph Petrie, 2017-11-22 This title was first published in 2000 The 1997 election marked the prospect of a new era in social welfare the possibility of establishing a third phase in the post war history of the welfare state the first being the creation of the Keynesian welfare state the second the Thatcher Major neo liberal reforms The key aim of this book is to critically explore the options for the future of welfare under New Labour The welfare state that the government inherited from the Conservatives is widely believed to be in a critical condition At the same time there is evidence of widening social inequality in Britain which existing social policy measures fail to address Whilst acknowledging that future welfare strategies are likely to operate within a market paradigm the key argument of this book is that welfare providers should operate within a more accountable and democratic environment where service users have the right to participate in decision making processes affecting their welfare regardless of the ability to pay The book concludes that the dominant discourse shaping social policy in Britain must be recognized and should not be accepted uncritically and that there are very real economic as well as social benefits from taking measures to address social disadvantage

**Welfare** Mary Daly, 2013-04-26 Welfare is an important concept in the social sciences It is also challenged and contested not only by alternative concepts but also as a political goal in itself Using a multi disciplinary approach this book takes a fresh look at the continuing relevance of welfare in the context of public policy recent scholarly developments and changes in popular attitudes and behaviour The book connects theory and practice Tracing the concept s background in economics political science and social policy the book juxtaposes welfare with newer approaches such as subjective well being capabilities care social exclusion and social capital The links between welfare and political ideas are also elaborated The welfare state as it developed historically in Europe and as it is changing in different countries is given an important place in the analysis Drawing on a range of empirical work the book in its final part considers how individuals and groups attain welfare and how this shapes people s decisions and actions in their everyday lives Written in a lively style the book provides students of sociology social policy and political science with a valuable point of access to a range of debates and thinking in the field of welfare and related concepts

**Social Work and Social Perspectives** Eileen Oak, 2008-11-24 Social Work and Social Work Perspectives introduces readers to a range of important sociological concepts showing how these can feed critical practice and illustrate social work s complex relationship with the welfare state Adopting a unique social policy framework this distinctive text is illuminating reading

**Developments in Sociology** Robert Burgess, Anne Murcott, 2014-06-11 Appropriate as a supplemental text to courses in Sociology Providing an overview grounded in research Developments in Sociology focuses on the major areas of theoretical methodological and substantive developments in

sociology Each author takes a field of study in which they are an acknowledged expert and highlights the way in which the subject has developed over the last fifty years

*Controversial Issues In A Disabling Society* John Swain, Sally French, Colin Cameron, 2003-01-16 At its best Disability Studies is an arena of critical debate addressing controversial issues concerning not just the meaning of disability but the nature of society dominant values quality of life and even the right to live Indeed Disability Studies is itself the subject of controversy in terms of its theoretical basis and who controls courses and research and whether it should be shaped and controlled by disabled academics or grassroots activists Within these debates generated by the social model of disability are fundamental challenges to policy provision and professional practice that are directly relevant to all who work with disabled people whether in the field of social work health or education *Controversial Issues in a Disabling Society* has been written specifically to raise questions and stimulate debate It has been designed for use with students in group discussion and to support in depth study on a variety of professional courses It covers a wide range of specific substantive issues within Disability Studies in a series of succinct chapters Each chapter sets a question for debate places the key issues in context and presents a particular argument This is an accessible and engaging book which challenges dominant positions and ideologies from a social model viewpoint of disability

**Underclass** John Welshman, 2013-10-10 Who are those at the bottom of society There has been much discussion in recent years on both Left and Right about the existence of an alleged underclass in both Britain and the USA It has been claimed this group lives outside the mainstream of society is characterised by crime suffers from long term unemployment and single parenthood and is alienated from its core values John Welshman shows that there have always been concerns about an underclass whether constructed as the social residuum of the 1880s the problem family of the 1950s or the cycle of deprivation of the 1970s There are marked differences between these concepts but also striking continuities Indeed a concern with an underclass has in many ways existed as long as an interest in poverty itself This book is the first to look systematically at the question providing new insights into contemporary

debates about behaviour poverty and welfare reform This new edition of the pioneering text has been updated throughout and includes brand new chapters on Problem Families and New Labour as well as Troubled Families and the Coalition Government It is a seminal work for anyone interested in the social history of Britain and the Welfare State *Borders and Borderlands in Contemporary Culture* Aoileann Ní Éigeartaigh, David Getty, 2008-12-18 It is entirely appropriate that this book should be produced in Dundalk Located on the Northern rim of the Irish Pale this town has straddled a border for centuries Over the past thirty years it has come to be closely identified with violent Republicanism both by the Unionist community in Northern Ireland and by Constitutional Nationalists in the South Against such a hostile background academics attached to the Institute of Technology there have bravely confronted and interrogated these processes which have so blighted the history not only of Dundalk but of places and spaces throughout the world similarly located In a wide ranging series of articles perhaps the strongest message to emerge is that of border as limitation The notion of border as a liminal space where worlds converge new realities emerge and transcendence is possible rarely surfaces Instead the border as a physical manifestation of divisiveness is repeatedly explored In a passionate statement of solidarity with the Palestinians Lavalette describes the construction of the apartheid wall The wall is eight feet high and has a watchtower every three hundred metres Although there are no maps it is thought it could end up being close to one thousand kilometres in length by the time it is completed p 18 Yndigegn shows how spatial borders gradually become mental borders such that as visual borders disappear new invisible borders appear p 33 The article explores the dualism of borders simultaneously protecting those inside from external threats while also preventing those inside from reaching or engaging with the outside world Ni Eigeartaigh takes up the duality theme in the exploration of individualism as a process either of liberation or one of alienation Taking the title from an aphorism of Kafka's My Prison Cell My Fortress she explores a view of contemporary society as repressive and of its inhabitants as complicit in the repression Drawing on a wide span of literature and disciplines she teases through the paradox of contemporary society that the freedom gained from the liberation of the individual from communal obligations and repression has resulted in a loss of identity and an overwhelming sense of isolation and powerlessness She concludes that in the absence of a restrictive system of social control the individual is forced to take responsibility for his own actions It is to avoid this responsibility that many choose the security of the prison cell above the hardship of the outside world Her paper does not go on to look at the potential role of the State or of fundamentalist movements in playing on the fear and disconnectedness of the citizenry as an equally likely outcome to that of a stronger capability for personal responsibility One could argue for instance that the European Fascist movement and the Nationalist movement of the early to mid twentieth century were both based precisely on the dislocation at personal and social level resulting from the breakdown of pre industrial communitarian ties While there is no attempt in the book to elucidate any particular developmental relationship between the different contributors two broad themes may be detected a concern with

borders as socio political and geographical constructs on the one hand and a concern with the formation of identity in the individual's relationship to the wider society on the other. Some light is cast on the latter issue by de Gregorio Godeo who posits discourse as a core concept in identity formation. This leads to the conclusion that individual identity in this case individualism is in fact socially constructed in a dialectical interplay between the discursive and the social identities included so that they are mutually shaped by each other. p 93 Using critical discourse analysis he goes on to explore changing notions of masculinity as evidenced in the Health sections of men's magazines.

**Sociology and Social Work** Jo Cunningham, Steve Cunningham, 2008-03-17 Sociological perspectives and their application to social work are an inherent part of the QAA benchmark statements in the social work degree. In addition, graduates must understand how sociological perspectives can be used to dissect societal and structural influences on human behaviour at individual, group and community levels. This title answers the need for a clear core text which integrates the areas of sociology and social work. Carefully constructed to be accessible to beginners in the discipline, it links sociological concepts, debates and theories to subject benchmarks, social work occupational standards and codes of practice.

**British Social Attitudes** Roger Jowell, John Curtice, Alison Park, Katarina Thomson, Lindsey Jarvis, Catherine Bromley, Nina Stratford, 2000-11-23 I've always enjoyed reading the British Social Attitudes survey which shows what the British people really think as opposed to what journalists and politicians like to pretend they think. John Pilger: Britain is a well documented nation. We know a lot about the characteristics of our society, who we are and what we do. We know much less about what we think and feel about our world and ourselves. The indispensable annual British Social Attitudes survey fills this gap. It compiles, describes and comments on a range of current social attitudes. The information is derived from interviews carried out by the National Centre for Social Research's own interviewers among a nationwide sample of around 3,500 people each year. The series seeks to chart changes in British social values over a period of time in relation to other changes in society and is core funded by the Gatsby Charitable Foundation. A full report is published each year. The 17th Report summarizes and interprets data from the most recent survey as well as making comparisons with findings from previous years. The data are publicly available through the ESRC Data Archive at the University of Essex.

**Women and Housing** Patricia Kennett, Kam Wah Chan, 2010-12-07 This collection explores the housing circumstances of women in developed and emerging societies in Europe, USA and East Asia at a time of substantial economic and social change. Its focus is on the interface between housing and gender and how this socially constructed relationship manifests and transforms over time and space.

**Rethinking Welfare** Iain Ferguson, Michael Lavalette, Gerry Mooney, 2002-07-09 I would encourage undergraduates to read it for it does summarise well a classical Marxist analysis of social policy and welfare. Social Policy: The anti-capitalist movement is increasingly challenging the global hegemony of neo-liberalism. The arguments against the neo-liberal agenda are clearly articulated in Rethinking Welfare. The authors highlight the growing inequalities and decimation of state welfare and use Marxist approaches to contemporary

social policy to provide a defence of the welfare state Divided into three main sections the first part of this volume looks at the growth of inequality and social and environmental degradation Part Two centres on the authors argument for the relevance of core Marxist concepts in aiding our understanding of social policy This section includes Marxist approaches to a range of welfare issues and their implications for studying welfare regimes and practices Issues covered include Class and class struggle Opression Alienation and the family The last part of the book explores the question of globalization and the consequences of international neo liberalism on indebted countries as well as the neo liberal agenda of the Conservative and New Labour governments in Britain The authors conclude with the prospect of an alternative welfare future which may form part of the challenge against global neo liberalism      *Underclass* John Welshman, 2007-03-10 This book is the first to look systematically at the question of underclass and poverty bringing new insights on the contemporary debate about behaviour and welfare reform
