

Marx's Conception of Socialism and the Socialist Movement

Marx's Concept of Socialism and the Socialist Movement During a two- or three-year period in the early 1840s, Marx came to believe that a working-class revolution that would overthrow the capitalist mode of production, end the regime of class dominance, and abolish the system of private property was the only path to human emancipation. Marx had transformed himself into a Marxist socialist. His perspective on the socialist movement and the political struggles of the working class was what most distinguished him from other socialists. I will discuss Marx's description of communism as a "highly practical movement, pursuing practical aims, by practical means" in the following pages, which are broken up into several short sections.

Marx denounces capitalism for its inhumanity, but he embraces socialism for its possibility. Capitalism is a prerequisite for socialism. He thinks there are two reasons why a society that is better in every way is possible. First, the capitalist economic system is not predestined, eternal, or natural, as he repeatedly asserts. It is just another temporary way station in human history, a "transient stage of development" that is just as likely to be replaced as any previous production method. He is not merely lamenting the terrible state of the world when he criticizes capitalism; He is also looking forward to the possibility of a better future. Contrary to those who hold that "there is no alternative," which is a viewpoint that is so prevalent in today's society that it has its own acronym, TINA, Marx believes that capitalism does not signify the end of human history.

Second, Marx argues that socialism is a real possibility and not just a "quixotic" fantasy of utopian dreamers because capitalism itself creates the

A Documentary Study of Hendrik De Man, Socialist Critic of Marxism Hendrik de Man, 2015-03-08 In this collection of excerpts from the essential works of Hendrik de Man 1885-1953 Peter Dodge reinstates in historical consciousness this pioneer sociologist of the European socialist movement and of labor in industrial society Regarded before World War II as pre eminent among socialist theoreticians comparable to Marx himself de Man fell into obscurity when his equivocal neutralist stance during the Occupation of his native Belgium undermined his political legitimacy Yet de Man's observations on the class order of capitalist society on the difficulties of establishing effective industrial democracy and on the nature of industrial society may be even more relevant today than they were in early twentieth century Europe While largely accepting the Marxist analysis of capitalism de Man also drew attention to the unacknowledged collapse of many of its assumptions Insofar as capitalism evolved in ways that Marx had not foreseen de Man partially attributes the fate of socialism to the limitations of Marxism's nineteenth century mode of analysis Selecting from the seventeen books forty odd brochures and some four hundred articles that comprise de Man's works the editor chooses those passages that are of primary significance for de Man's intellectual development and for his contribution to social analysis In addition to explanatory headnotes and an Introduction to de Man's life the volume contains a selective bibliography of primary and secondary material Originally published in 1979 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
