Sociobiology Of Sexual And Reproductive Strategies:

Sociobiology of Sexual and Reproductive Strategies A.E. Rasa,C. Vogel,E. Voland,1989-06-30 Sex, Power, Conflict : Evolutionary and Feminist Perspectives Ann Arbor David M. Buss Professor of Psychology University of Michigan,Los Angeles Neil Malamuth Professor of Communication and Psychology and Chair of the Department of Communication and Speech University of California,1996-03-21 Sexual harassment in the workplace date rape and domestic violence dominate the headlines and have recently sparked scholarly debates about the nature of the sexes Concurrently the scientific community is conducting research in topics of sex and gender issues Indeed more research is being done on the topics of sexual conflict and coercion than at any other time in the history of the social sciences Despite this attention it is clear that these issues are being addressed from two essentially different perspectives one is labeled feminist while the other viewed as antithetical to the feminist movement is called evolutionary psychology which emphasizes the history of reproductive strategies in understanding conflict between the sexes This book brings together leading experts from both sides of the debate in order to discover how each could offer insights lacking in the other The editors overall goal is to show how the feminist and evolutionary approaches are complementary despite their evident differences then provide an integration and synthesis In fact several of the contributors to this unique volume consider themselves advocates of both approaches As a stimulating presentation of the dynamics of sex power and conflict and a pioneering rapprochement of the diverse tendencies within the scientific community this book will attract a wide audience in both psychology and women s studies fields **Strategies of Sex and Survival in Female Hamadryas Baboons** Larissa Swedell,2015-10-15 This book describes the first field study focusing on the behavior of hamadryas females in the wild In its attempt to rectify the male biased view of hamadryas baboon behavior that has persisted over the decades this book suggests that female behavior contributes more to hamadryas social organization than has previously been assumed and that females may in fact be acting in their own best interests after all For upper level undergraduate courses on primate behavior and ecology **Fertility and Resources** Society for the Study of Human Biology. Symposium,1990-10-25 Fertility in animals reflects access to scarce resources such as food and territory In humans the situation is more complex In this book the gap between socio ecology and population demography is bridged by showing how animals and humans adjust their fertility to environmental conditions Male and Female Reproductive Strategies in Relation to Paternity Outcome in Barbary Macaques (Macaca Sylvanus) Katrin Brauch,2007 *Modern China* Susan Sprecher,2013-01-22 First published in 1997 Routledge is an imprint of Taylor Francis an informa company **Human Adaptation** Howard Morphy,G. A. Harrison,2020-12-22 This book examines the concept of adaptation in four major fields in the human sciences Genetic aspects are first considered through an examination of the human genes which have so far been identified as conferring survival value in particular environmental circumstances The drift versus selection argument is also fully reviewed The second contribution concerns the physiological changes which

occur when individuals move from one environment to another In the past most attention has been given to the mechanisms of these changes but here the focus is on the effects The third contribution is directed at the analysis of behaviour especially social behaviour The application of kin selection and reciprocal attraction theories to humans is explored and the value of these approaches explained whether the behaviour has a genetic basis or not The final essay deals with the relevance of the adaptation concept to the social sciences and especially to social anthropology It demonstrates that an ecological approach to understanding the nature and structure of human societies demands attention to adaptation Reprinted in paperback for the first time and with a new foreword this book which serves as an excellent teaching text clearly shows how attempts at integration in each of these various fields can benefit the study of human evolution social structure and organization from all perspectives

Handbook of Relationship Initiation Susan Sprecher, Amy Wenzel, John Harvey, 2018-09-05 The Handbook of Relationship Initiation is the first volume to focus specifically on the very beginning stage of relationships their origin In this Handbook leading scholars on relationships review the literature on various processes related to the initiation of relationships how people meet communicate for the first time and begin to define themselves as being in a relationship Topics include attraction mate selection influence of social networks on relationship initiation initiation over the internet hook ups among young adults and flirting and opening gambits In addition the dark side of relationship initiation is considered including unwanted relationship pursuit and barriers to relationship initiation including social anxiety This volume provides an overdue synthesis of the literature on this topic It is especially timely in view of the growing prevalence on relationship initiation online through matchmaking and other social networking sites which has increased awareness that science can be used to understand create and facilitate compatible matching This Handbook provides an essential resource for an interdisciplinary range of researchers and students who study relationships including social psychologists communication scientists and scholars of marriage and the family

Economics in Nature Ronald Noë, Jan A. R. A. M. Van Hooff, Peter Hammerstein, 2006-01-19 Studies of sexual selection interspecific mutualism and intraspecific cooperation show that individuals exchange commodities to their mutual benefit The exchange values of commodities are a source of conflict and behavioral mechanisms such as partner choice and contest between competitors determines the composition of trading pairs or groups These biological markets can be examined to gain a better understanding of the underlying principles of evolutionary ecology In this volume scientists from different disciplines combine insights from economics evolutionary biology and the social sciences to look at comparative aspects of economic behavior in humans and other animals

Human Evolutionary Biology Michael P. Muehlenbein, 2010-07-29 A wide ranging and inclusive text focusing on topics in human evolution and the understanding of modern human variation and adaptability

Human Evolutionary Psychology Louise Barrett, Robin Dunbar, John Lycett, 2002-02-17 Why do people resort to plastic surgery to look young Why are

stepchildren at greatest risk of fatal abuse Why do we prefer gossip to algebra Why must Dogon wives live alone in a dark hut for five days a month Why are young children good at learning language but not sharing Over the past decade psychologists and behavioral ecologists have been finding answers to such seemingly unrelated questions by applying an evolutionary perspective to the study of human behavior and psychology Human Evolutionary Psychology is a comprehensive balanced and readable introduction to this burgeoning field It combines a sophisticated understanding of the basics of evolutionary theory with a solid grasp of empirical case studies Covering not only such traditional subjects as kin selection and mate choice this text also examines more complex understandings of marriage practices and inheritance rules and the way in which individual action influences the structure of societies and aspects of cultural evolution It critically assesses the value of evolutionary explanations to humans in both modern Western society and traditional preindustrial societies And it fairly presents debates within the field identifying areas of compatibility among sometimes competing approaches Combining a broad scope with the more in depth knowledge and sophisticated understanding needed to approach the primary literature this text is the ideal introduction to the exciting and rapidly expanding study of human evolutionary psychology

Evolution and Human Behavior John Cartwright, 2000 The book covers fundamental issues such as the origins and function of sexual reproduction mating behavior human mate choice patterns of violence in families altruistic behavior the evolution of brain size and the origins of language the modular mind and the relationship between genes and culture

Infanticide And Parental Care Stefano Parmigiani, Frederick vom Saal, 2016-12-05 First published in 1994 Infanticide is an extremely complex behavioral pattern that occurs throughout the animal kingdom and it must be considered not only in isolation but also from the viewpoint of an animal's care of its young Infanticide and Parental Care will be of interest to zoologists evolutionary biologists and biological anthropologists The concept of infanticide is considered in different mammals such as humans primates pinnipeds lions dwarf mongooses and prairie dogs and in non mammals including insects and birds Infanticide and Parental Care also views the topic in different environmental conditions such as the natural habitat of an animal and animals kept in laboratory conditions The wide implications of infanticide mean that this book will also be useful to historians anthropologists sociologists and psychologists
