Sociology A Global Perspective:

Sociology Joan Ferrante, 2013 is a brief introduction to sociology paperback text that uses sociological concepts and theories to analyze the most compelling and significant issues of our day which happen to be global. Issues covered include the proposed and existing border fences that separate Mexico from the United States, the disparities between the world's richest and poorest countries, the century-long Palestinian-Israeli conflict, McDonaldization, and the planet's dependence on fossil fuels. This approach demonstrates sociology's analytical power for thinking about personal, local, national, but especially global issues and events. Publisher: **Sociology** Joan Ferrante, 1992-05. This was the first introductory text to use a truly comparative global approach to teach sociological concepts and ideas. Some texts claim to be global by including global boxes; however, the entire Ferrante text is written from this perspective. Ferrante uses an in-depth examination of life in other countries to help students understand sociological concepts while also providing comparison to the United States. By integrating throughout each chapter the connections to American society, this text gives students a broader understanding of sociological concepts, global interdependence, and societal differences as well as similarities. *Sociology* Joan Ferrante, 1997. *Sociology: A Global Perspective, Enhanced* Joan Ferrante, 2010-01-01. The societies of the world's underdeveloped countries are now undergoing an urban revolution. **Critical Global Perspectives** Binaya Subedi, 2010-03-01. The primary purpose of this book is to invite educators to re-think what it means to critically conceptualize knowledge about the world. In other words, imagining curriculum in a critical way means decolonizing mainstream knowledge about global societies. Such an approach re-evaluates how we have come to know the world and asks us to consider the socio-political context in which we have come to understand what constitutes an ethical global imagination. A critical reading of the world calls for the need to examine alternative ways of knowing and teaching about the world, a pedagogy that recognizes how diverse subjects have come to view the world. A critical question this book raises is: What are the radical ways of re-conceptualizing curriculum knowledge about global societies so that we can become accountable to the different ways people have come to experience the world? Another question the book raises is: how do we engage with complexities surrounding social differences such as gender, race, ethnicity, religion, etc. in the global contexts? Analyzing global issues and events through the prism of social difference opens up spaces to advocate a transformative framework for a global education curriculum. Transformative in the sense that such a curriculum asks students to challenge stereotypes and engages students in advocating changes within local/global contexts. A critical global perspective advocates the value of going beyond the nation-state centered approach to teaching about topics such as history, politics, culture, etc. It calls for the need to develop curriculum that accounts for transnational formations, an intervention that asks us to go beyond issues that are confined within national borders. Such a practice recognizes the complicated ways the local is connected to the global and vice versa and cautions against creating a hierarchy between national and global issues. It also suggests the need to critically examine the pitfalls of forming dichotomies between the local or the national and the global or the center and the periphery.

Migration from the Middle East and North Africa to Europe Heinz Fassmann, Michael Bommers, Wiebke Sievers, 2025-10-01. One of the most important challenges concerning the future of the European Union is the demographic reproduction of the European population. Decreasing birth rates and the retirement of the baby boomers will dramatically reduce the labour force in the EU, which will entail not only a lack of manpower but also lower contributions to European social systems. It seems clear that the EU will have to counterbalance this population decrease by immigration in the coming years. Migration Between the Middle East, North Africa and Europe takes this challenge as a point of departure for analysing the MENA region in particular, Morocco, Egypt and Turkey as a possible source of future migration to the European Union. At the same time, it illustrates the uncertainties implied in such calculations, especially at a time of radical political changes such as those brought about by the Arab Uprising. A wide and scientific overview on migration potential from the MENA region to the EU.
