Narrative Des Risikos Karen Patrick Knutsen, Karen Patrick Knutsen, Sigmund Kvam, Peter Langemeyer, Anastasia Parianou, Kåre Solfeld, Sigmund Kvam, Peter Langemeyer, Anastasia Parianou, Kåre Solfeld, 2012 Soziologie des Risikos Niklas Luhmann, 1991

Die Beobachtung des Risikos Mathias Heidenescher, 2019 Die moderne Gesellschaft wird zunehmend unter dem Aspekt ihrer Risikopotentiale z B atomare Energiegewinnung Gentechnologie gro formatige Umweltverschmutzungen BSE und AIDS beobachtet dies nicht zuletzt auch aufgrund der massenmedialen Darstellungen Wie geht die Gesellschaft mit diesen Risiken um wie werden sie von der Politik gesteuert Mangelndes Kausalit tswissen um die Chancen und Risiken neuartiger Technologien bedingt da konkurrierende Risikobeobachtungen und politische Positionen sich nicht objektiv aus der Sache heraus erkl ren sondern vielmehr aus ihrer Einbettung in ein kulturelles Umfeld So differenziert sich die Gesellschaft in diejenigen die ber Technologien entscheiden und diejenigen die sich davon gef hrdet sehen Politik und ihre Verwaltung haben die Aufgabe f r Ausgleich zu sorgen und Risiken in Richtung Sicherheit zu steuern Systemtheoretisch wird aber gezeigt da in einer funktional differenzierten Gesellschaft die Politik kein Steuerungszentrum mehr darstellt und technologische Entwicklungen nicht gezielt gestalten kann Die staatliche Risikovorsorge bleibt darauf beschr nkt Rahmenbedingungen zu setzen und die Eigendynamik und logik technologischer Entwicklungen zu akzeptieren Des weiteren entlastet sie sich durch R ckgriff auf den wissenschaftlichen Sachverstand z B Grenzwertsetzung Die ffentliche Politik selbst wird zur symbolischen Politik d h sie betreibt eine Darstellung politischer Ziele die den konkreten Entscheidungen gar nicht entsprechen mu und inszeniert Konflikte als notwendigen Anpassungsproze an inkonsistente gesellschaftliche Erwartungen Der Autor sucht abschlie end nach M glichkeiten die Rationalit t politischen Entscheidens zu steigern InhaltsverzeichnisInhalts bersicht Erster Teil Die gesellschaftliche Konstruktion von Risiken Einleitung Zur Risikosoziologie Die Theorie der Beobachtung Zurechnung Die Beobachtung von Kausalit t Die kulturelle Einbettung von Kommunikation Zwischenbetrachtung Zweiter Teil Das politische System und seine Risikobearbeitung Die Analyse des politischen Systems Einrichtungen der Risikobearbeitung Die Darstellungsleistungen der Politik Die Rationalit t reduzierter Politik Literaturverzeichnis Sachwortregister

Die Internationale Politische Ökonomie des Risikos Oliver Kessler, 2008-05-13 f r Sophie und Jakob 1 1 Einleitung 7 Vorwort Am Beginn dieser Arbeit stand eine Unzufriedenheit dar ber wie die Asienkrise und die darauf einsetzenden Turbulenzen innerhalb der Wirtschaftswissenschaften und der Internationalen Beziehungen diskutiert wurden Obwohl ich dieses Gef hl zuerst nicht greifen konnte schlie lich fehlte mir als konom das politikwissenschaftliche Vokabular erschien mir die gesamte Debatte um die Reformierung der Finanzm rkte als zu kurz gegriffen Der Versuch die Politik am Staat festzumachen und gleichzeitig die Quelle der Instabilit t in einer asymmetrischen Informationslage zu verorten ist doch so trivial wie falsch Dennoch hat die Idee der asymmetrischen Information die Diskussion nachhaltig gepr gt Ohne die dadurch implizierten Bem hungen zu erh tter Transparenz und weniger Korruption

in Abrede stellen zu wollen stellt sich doch die Frage ob eine Welt vollkommener Transparenz sowohl möglich oder auch nur erstrebenswert ist Die Arbeit versucht aber nicht eine alternative Lösung für die Probleme der Finanzmärkte zu entwerfen sondern fragt im Gegenteil nach den disziplinären Strukturen und Grenzen dieser Diskussion wieso wird Inszenierung in genau dieser Art und Weise konzipiert Dieses Buch versteht sich demnach nicht als eine Beobachtung erster sondern zweiter Ordnung Das heißt ich versuche nicht unmittelbar praxisrelevantes Wissen zu produzieren sondern vielmehr zu beobachten wie handlungspraktisches Wissen zum Beispiel durch die Verwendung einer spezifisch konnotierten Risikosemantik möglich wird

Ecological Thought in German Literature and Culture Gabriele Duerbeck,Urte Stobbe,Hubert Zapf,Evi Zemanek,2017-10-16 The volume offers a survey of the contribution of German literature and culture to the evolution of ecological thought As the field of ecocritical theory and practice is rapidly expanding towards transnational and global dimensions it seems nevertheless necessary to consider the distinct manifestations of ecological thought in various cultures In this sense the volume demonstrates in twenty six essays from different disciplines how German literature philosophy art and science have contributed in unique ways to the emergence of ecological thought on national and transnational scale The volume maps the most important and characteristic of these developments both on a theoretical and on a textual analytical level It is structured in five parts ranging from proto ecological thought since early modern times part I to major theoretical approaches part II environmental history part III and ecocritical case studies part IV to ecological visions in different media and art forms part V The four editors have widely published and are actively involved in ecocritical literary and cultural studies The group of editors consists of two scholars of German literature and cultural studies Gabriele Duerbeck and Urte Stobbe both University of Vechta a scholar in German and comparative literature Evi Zemanek University of Freiburg as well as a scholar of Anglo American ecoliterature and ecocriticism Hubert Zapf All of them are involved in various projects and research networks on ecology and literature The contributors of the individual chapters likewise are all experts in their respective fields ranging from German literature history environmental studies art history music and art The book is a unique and readily accessible collection of essays that is of relevance not only for a German and continental European but for a worldwide audience

Interrogations of Evolutionism in German Literature 1859-2011 Nicholas Saul,2021-02-08 Darwin's idea has been called the best idea anyone ever had In Interrogations of Evolutionism in German Literature 1859-2011 Nicholas Saul offers the first representative account of German literary responses to Darwinian evolutionism from Raabe and Jensen via Ernst Jünger and Botho Strauß to Dietmar Dath Often identified with National Socialist ideology and hence notably absent from the public sphere after 1945 Darwinian thought is in fact shown to be distorted through the lens of Social Darwinism and bionationalist organicism As Nicholas Saul shows literature has been the main agent in public discourse for challenging such illiberal presentations and there is a common thread of salvific individualism which leads to the new legitimacy of Darwinian discourse today

The Turn to Biographical Methods in Social Science Prue

Chamberlayne, Joanna Bornat, Tom Wengraf, 2002-09-11 Biographical research methods have become a useful and popular tool for contemporary social scientists This book combines an exploration of the historical and philosophical origins of this important field of qualitative research with comparative examples of the different ways that biographical methods have been successfully applied internationally Through these many illustrative examples of socio biography in process the authors show how formal textual analysis whilst uncovering hidden emotional defences can also shed light on wider historical processes of societal transformation Topics discussed include individual and linked lives generational change political influences on memory and identity biographical work in reflexive societies narrativity and empowerment in professional practice ways of theorising and generalising from case studies Biographical Methods in the Social Sciences promotes debate and provides opportunities for students and researchers to widen their uses of narrative research **Niklas Luhmann** Claudio

Baraldi, Giancarlo Corsi, 2016-11-21 This book provides an insight into the ideas of one of the world's greatest sociologists Niklas Luhmann It explains in clear and concise language the basic concepts of Social Systems Theory and their application to the specific case of the Education System which was considered by Luhmann as a primary subsystem of modern society It illustrates the complex and sophisticated thinking that characterises Luhmann's work and explains that Luhmann's theory has given an important and original contribution to the study of education from a sociological point of view His contribution has some resonance in recent social constructionist and relational approaches to education as well as in studies of educational interaction In addition research methodologies in particular mixed methods strategies draw heavily on epistemological issues The book finally argues that educationists can appreciate the extent of Luhmann's contribution to the field of education although their perspective cannot be fully harmonised with nor reduced to the sociological one This divergence of perspectives can stimulate pedagogy to call into question its conceptual framework as well its approach to social situations in the classroom **The Politics of Orientation** Hannah Richter, 2023-10-01 The Politics of Orientation

provides the first substantial exploration of a surprising theoretical kinship and its rich political implications between Gilles Deleuze's philosophy and the sociological systems theory of Niklas Luhmann Through their shared theories of sense Hannah Richter draws out how the works of Luhmann and Deleuze complement each other in creating worlds where chaos is the norm and order the unlikely and yet remarkably stable exception From the encounter between Deleuze and Luhmann Richter develops a novel take on postfoundational ontology where subjects and societies unfold in self-productive relations of sense against a background of complexity The Politics of Orientation breaks and rebuilds theoretical alliances by reading core concepts and thinkers of Continental Philosophy from Leibniz to Whitehead and Marx through this encounter Most importantly the book puts Luhmann and Deleuze to work to offer urgently needed insight into the rise of post-truth populism In our complex democratic societies Richter argues orientation against complexity has become the ground of political power privileging the simplistic narratives of the populist right **Decision Making for Complex Socio-Technical Systems**

Thomas Flüeler, 2006-03-08 Waste management can be considered as a mirror of society. In its fluctuating definition, besides conserving a supply of valuable materials and resources, it acts as a fascinating expression for our throw-away mentality. Waste is inevitable, but it nevertheless provides an opportunity, a need, and an incentive for society to pursue a more careful management of it. If this is successfully carried out, society may well find it possible to manage itself in an overall more careful and universal way. The management or governance of radioactive waste, particularly, is determined by a complex constellation of individuals, social aggregates, and institutions. A wealth of interconnected parts forms a complex and volatile system that is highly technical and explosively political in nature. The problems inherent in this system must be managed so as to reach a safe, acceptable, responsible, feasible, and sustainable solution. It is a system with an objective long-term dimension, with a hazard potential of in part hundreds of thousands of years, and it has a long-term institutional dimension insofar as its implementation must last for decades. The very notion of risk extends from the long life of radionuclides over the perception of dread to the decisional risk of whether, when, and how to implement an agreed-upon solution.
