Anton Pannekoek: Ways of Viewing Science and Society Chaokang Tai, Bart Steen, Jeroen Dongen, 2025-10-01 Anton Pannekoek 1873 1960 prominent astronomer and world renowned socialist theorist stood at the nexus of the revolutions in politics science and the arts of the early twentieth century His astronomy was uniquely visual and highly innovative while his politics were radical Anton Pannekoek *Ways of Viewing Science and Society* collects essays on Pannekoek and his contemporaries at the crossroads of political history the history of science and art history

Pioneer of Galactic Astronomy: A Biography of Jacobus C. Kapteyn Pieter C. van der Kruit, 2020-12-28 This non technical biography of Jacobus Cornelius Kapteyn 1851 1922 presents to the general reader the scientific life of the astronomer who pioneered the studies of the structure of the Milky Way Galaxy In telling Kapteyn s story the author weaves in astronomy basics and uses modern astronomical images to show the developments of astronomical research from Kapteyn s times to the present In particular the study of the distribution of stars in space has now culminated with spectacular new insights coming from the astrometric satellite GAIA which is receiving much public attention today The biography shows how Kapteyn s ideas influenced prominent astronomers worldwide He is prominent as designer of the Kapteyn Universe the alternative to the large system found by Harlow Shapley He is the discoverer of

Kapteyn's Star still the second fastest moving star in the sky which is now one of the nearest stars with a planet in the habitable zone This fascinating hybrid of astronomy history and popular astronomy tells the story of the astronomy professor without an observatory who founded the first astronomical laboratory specializing in measuring photographic plates exposed elsewhere Kapteyn took astronomy out of cataloguing stars to measuring distances and velocities in order to study their spatial distribution systematic motions Kapteyn's Star Streams and the equilibrium between their gravity and motions His legacy includes in addition to the first application of Galactic structure and dynamics Jan Hendrik Oort the famous astronomer from Leiden who as a student was so impressed by Kapteyn's lectures that he decided to become an astronomer

Minding the Heavens Leila Belkora, 2002-12-01 Today we accept that we live on a planet circling the sun that our sun is just one of billions of stars in the galaxy we call the Milky Way and that our galaxy is but one of billions born out of the big bang Yet as recently as the early twentieth century the general public and even astronomers had vague and confused notions about what lay beyond

Willem de Sitter Jan Guichelaar, 2018-09-21 This is a thorough very readable and excellently illustrated biography of Willem de Sitter 1872-1934 one of the most influential astronomers of his time and also a co-author and correspondent of Einstein Authored by a physicist and skilled writer the book gives a beautiful and accessible description of the physics debated by Einstein and de Sitter as well as the latter's alternative cosmological model later known as the De Sitter Universe But this is just part of a fascinating and varied life story involving numerous contributions to astronomy as well as many places and personalities of early 20th century physics The book will appeal to all those interested in astronomy and physics and their history

Lessons from the Local Group Kenneth Freeman, Bruce Elmegreen, David Block, Matthew Woolway, 2014-11-13 Our understanding of galaxy formation comes mostly from two sources sensitive observations at high angular resolution of the high redshift Universe where galaxies are observed to be forming and detailed observations of individual stars and clouds in the Local Group where telltale remnants from its formative time remain and similar processes operate at a low level today The current conference focusses on key aspects of the Local Group composed of the Milky Way Andromeda and Triangulum Spiral Galaxies the Large and Small Magellanic Cloud galaxies numerous dwarf and irregular galaxies and intergalactic gas Topics include the halo and thick disk of the Milky Way with its first stars and stellar streams the Milky Way bar bulge and outer edge interstellar dust and turbulence star formation processes and stellar scattering in spiral arms views through the infrared Eyes of the Spitzer Space Telescope globular clusters the Local Gould Belt stellar metallicities and elemental abundances the environment and black hole in the Milky Way nucleus orbits of the Magellanic Clouds and galaxy dwarfs interstellar dust and turbulence the outer disks and halos of the Andromeda and Triangulum galaxies ripples from a collision in Andromeda and arcs of carbon stars in the Triangulum and intergalactic clouds This volume also discusses surveys of planetary nebulae galaxy morphology at low and high redshift cosmic evolution of star and galaxy formation and gas accretion Lyman alpha emitting galaxies ultra low surface brightness imaging and more Readers

are given a clear and comprehensive view of this wide range of topics written by specialists in each field This is the proceedings of an International Conference at the Seychelles archipelago in May 2014 on the occasion of the 60th birthday of David Block and the millionth base two birthday of Bruce Elmegreen

The Laboratory Revolution and the Creation of the Modern University, 1830-1940 Klaas Berkel, Ernst Homburg, 2025-10-01 The modern research university originated in Europe in the second half of the nineteenth century largely due to the creation and expansion of the teaching and research laboratory The universities and the sciences underwent a laboratory revolution that fundamentally changed the nature of both This revolutionary development began in chemistry where Justus Liebig is credited with systematically employing his students in his ongoing research during the 1830s Later this development spread to other fields including the social sciences and the humanities The consequences for the universities were colossal The expansion of the laboratories demanded extensive new building programs reshaping the outlook of the university The social structure of the university also diversified because of this laboratory expansion while what it meant to be a scientist changed dramatically This volume explores the spatial social and cultural dimensions of the rise of the modern research laboratory within universities and their consequent reshaping

Multielement System Design in Astronomy and Radio Science L.E. Kopilovich, L.G. Sodin, 2013-03-09 The multielement systems have been widely used in many fields of astronomy and radio science in the last decades This is caused by the increasing demands on the resolution and sensitivity of such systems over the wide range of the electromagnetic wavelengths from gamma up to radio The ground based optical and radio interferometers gamma ray and X ray or bital telescopes antenna arrays of radio telescopes and also some other radio devices belong to scientific instruments using multielement systems There fore the current problems of the optimal construction of such systems or precisely those of searching for the best arrangement of the elements in them were formulated A rather large number of scientific papers including those of the authors is devoted to these problems and we believe that the time has come to integrate the basic results of the papers into the mono graph The offered book consists of three parts The first part is concerned with the optimal synthesis of optical and radio interferometers of various types and purposes the synthesis of non equidistant antenna arrays is considered in the second part and the methods for the construction of coded masks for X ray and gamma ray orbital telescopes are expounded in the third one Since in the text combinatorial constructions which are little known to astronomers are used the necessary information is given in the appendices Various tables containing the parameters of the systems considered are also represented

Organizations and Strategies in Astronomy Andre Heck, 2000 We have arrived at the third volume of this useful series on Organizations and Strategies in Astronomy OSA It contains seventeen articles on a wide range of topics from virtual observatories astronomy organizations in various communities Czech Republic Slovak Republic South Africa and the role of ground stations in space observatories to quality assurance in UK higher education In this foreword I shall give some views on ideas expressed in this volume in particular from my personal experience when I was

project officer for the Canada France Hawaii Telescope CFHT Let me first remind readers that present and future astronomy is increasingly dependent on high level management Not everybody knows that the scheduling of the Hubble Space Telescope is performed by a neural network software called SPIKE described in the stimulating workshop New Observing Modes for the Next Century¹ partly reported in OSA Volume II by 1 Robson New observing facilities in space or on the ground are so complex that they need highly qualified engineers and rigorous management procedures Each observing hour on the Very Large Telescope VLT facility is worth about EUR 7 000 including the amortization of the capital expenses over 30 years This does not leave much room for amateurism neither in the time allocation procedures nor in the daily telescope control
