Library Disaster Planning and Recovery Handbook Camila A. Alire, 2000 On July 28 1997 the Morgan Library at the Colorado State University experienced a flash flood that broke a wall in the library basement the flood s sheer force twisted bookshelves and tossed books into the water As a result ten percent of the collection was totally destroyed with the most serious damage to the serials collection In all 425 000 titles had to be reprocessed most computers were ruined work areas were gone and the library couldn t open due to water mold and other health hazards a disaster of the largest magnitude

Edited by university library dean Alire who oversaw the library's recovery this handbook gives a detailed account of the disaster as well as advice and recommendations to other libraries for coping with an emergency and its aftermath. Even though Morgan Library had a disaster plan in effect, employees discovered how many things weren't covered. They also learned how little there was in published library literature on replacing collections, accepting gifts in huge quantities, dealing with insurance companies, keeping the building secure, the difficulties in their state of hiring temporary help and working with contractors. Each chapter is written by a different staff member or pairs and discusses the impact the disaster had on their department. How do you keep staff morale intact and how do you communicate when there are no telephones, electricity or heating/cooling in the building? Health concerns for the safety of employees from mold are also discussed. This lengthy volume is important as it documents the severity of the disaster but also reads as a cathartic dissertation that will help the staff in the healing process as they regain control of their library. Useful lessons can be learned by large academic and public libraries thinking through their own disaster plans. Comprehensive Guide to Emergency Preparedness and Disaster Recovery Frances C.
