and were vastly more numerous than his collisions with the famous Howells was here yesterday afternoon and I told him the whole scheme of this autobiography and its apparently systemless system only apparently systemless for it is not really that It is a deliberate system and the law of the system is that I shall talk about the matter which for the moment interests me and cast it aside and talk about something else the moment its interest for me is exhausted It is a system which follows no charted course and is not going to follow any such course It is a system which is a complete and purposed jumble a course which begins nowhere follows no specified route and can never reach an end while I am alive for the reason that if I should talk to the stenographer two hours a day for a hundred years I should still never be able to set down a tenth part of the things which have interested me in my lifetime I told Howells that this autobiography of mine would live a couple of thousand years without any effort and would then take a fresh start and live the rest of the time He said he believed it would and asked me if I meant to make a library of it I said that that was my design but that if I should live long enough the set of volumes could not be contained merely in a city it would require a State and that there would not be any multi billionaire alive perhaps at any time during its existence who would be able to buy a full set except on the instalment plan Howells applauded and was full of praises and endorsement which was wise in him and judicious If he had manifested a different spirit I would have thrown him out of the window I like criticism but it must be my way
