artistic endeavours that aim to consciously reveal the spatiality of sound In this progression the book demonstrates the profoundly constitutive role of hearing and listening at all stages of our biological and social development as well as the epistemological phenomenological and emotional importance of sound in relation to our construction of space As such it will appeal not only to architects town planners and artists but also to the growing community of scientists and scholars intrigued by sonic issues Differing from both quantitative acoustics and sound design its approach opens new perspectives on the sonic dimension and aural understanding of our environment by tracing analogies between a diversity of spaces formed when sound interacts with listening as a mode of attention **Geographies of the Ear** Tania Gentic, 2025-08-15 Tania Gentic examines the soundscape of post Franco Barcelona to point out the difficulties of considering the contemporary city as either the product of a monolingual national identity or a lived space easily circumscribed by geographical categories Ntahera Trumpets in Ghana Joseph S.Kaminski, 2016-12-05 Based on the author's fieldwork in Ghana with the Asante and Denkyira ntahera trumpeters this book draws on interviews field recordings oral traditions written accounts archaeological evidence transcriptions and linguistic analyses to situate the Asante trumpet tradition in historical culture There are seven ivory trumpet ensembles in residence at the Asante Manhyia Palace in Kumase and ivory trumpets are blown at every Akan court The Asante trumpets which are made from elephant tusks are symbols of Asante strength and have an important role in Asante cosmology Surrogate speech is performed via lipped tones through a tusk in praise of the Asante royal ancestors and the living Asante king This book contains transcriptions and analyses of surrogate speech texts and their accompanying ensemble songs When several ensembles play simultaneously as a representation of power they make staggered entrances beginning separate songs in order This results in a simultaneous performance of separate songs This phenomenon which Kaminski has termed sound barrage is an ancient aesthetic and is performed to protect the kingdom and the ancestors It is both spiritual and acoustical This sound barrage is believed to act in the metaphysical world dispelling evil spirits from court rituals ancestor venerations and funerals for there is a spirit in the sound Annual Bibliography of Modern Art Museum of Modern Art (New York, N.Y.). Library, 2000 The Bloomsbury Handbook of Sound Art Sanne Krogh Groth, Holger Schulze, 2020-02-20 The Bloomsbury Handbook of Sound Art explores and delineates what Sound Art is in the 21st century Sound artworks today embody the contemporary and transcultural trends towards the post apocalyptic a wide sensorial spectrum of sonic imaginaries as well as the decolonization and deinstitutionalization around the making of sound Within the areas of musicology art history and later sound studies Sound Art has evolved at least since the 1980s into a turbulant field of academic critique and aesthetic analysis Summoning artists researchers curators and critics this volume takes note of and reflects the most recent shifts and drifts in Sound Art rooted in sonic histories and implying future trajectories Ideas and Structures Almantas Samalavicius, 2011-02-04 This book is a scholarly inquiry into several dimensions of culture exploring the close relationship between architecture and metaphysical ideas as well as religious and philosophical concepts in each

period of human history a relationship which has however been largely forgotten or neglected by modernity Rather than being a specialized account of any particular epoch it is an intellectual attempt to map out a general picture of how certain ideas have made their way into architectural structures or shaped them in one or another way from classical Antiquity through the Middle Ages and the Renaissance to the present The four essays it contains focusing on light water color and sound in architecture are written by an author who is a historian and critic of architecture as well as literary scholar who firmly believes in the value of discussing these issues from the perspective of the history of ideas The author is conscious about the limits of any generalizations but he believes that architecture should be studied not only as an art in its own right but as something larger enveloping many layers of culture and reflecting the bonds between human thinking and the practice of the art of building The Cambridge Companion to Women Composers Matthew Head, Susan Wollenberg, 2024-05-30 Exploring a diverse distinguished repertoire and transcending the rhetoric of neglect this book transforms understanding of women composers Spaces Speak, Are You Listening? Barry Blesser, Linda-Ruth Salter, 2009-09-18 How we experience space by listening the concepts of aural architecture with examples ranging from Gothic cathedrals to surround sound home theater We experience spaces not only by seeing but also by listening We can navigate a room in the dark and hear the emptiness of a house without furniture Our experience of music in a concert hall depends on whether we sit in the front row or under the balcony The unique acoustics of religious spaces acquire symbolic meaning Social relationships are strongly influenced by the way that space changes sound In Spaces Speak Are You Listening Barry Blesser and Linda Ruth Salter examine auditory spatial awareness experiencing space by attentive listening Every environment has an aural architecture The audible attributes of physical space have always contributed to the fabric of human culture as demonstrated by prehistoric multimedia cave paintings classical Greek open air theaters Gothic cathedrals acoustic geography of French villages modern music reproduction and virtual spaces in home theaters Auditory spatial awareness is a prism that reveals a culture s attitudes toward hearing and space Some listeners can learn to see objects with their ears but even without training we can all hear spatial geometry such as an open door or low ceiling Integrating contributions from a wide range of disciplines including architecture music acoustics evolution anthropology cognitive psychology audio engineering and many others Spaces Speak Are You Listening establishes the concepts and language of aural architecture These concepts provide an interdisciplinary guide for anyone interested in gaining a better understanding of how space enhances our well being Aural architecture is not the exclusive domain of specialists Accidentally or intentionally we all function as aural architects The Western Architect Robert Craik McLean, 1927
