Sitiens Last Day:

The Spiritual Expansion of Medieval Latin Christendom: The Asian Missions James D. Ryan, 2017-03-02 During the thirteenth and fourteenth centuries religious zeal nourished by the mendicants sense of purpose motivated Dominican and Franciscan friars to venture far beyond Europe's cultural frontiers to spread their Christian faith into the farthest reaches of Asia Their incredible journeys were reminiscent of heroic missionary ventures in earlier eras and far more exotic than evangelization during the tenth through twelfth centuries when the western church Christianized Eastern Europe and Scandinavia This new mission effort was stimulated by a variety of factors and facilitated by the establishment of the Mongol Empire and as the fourteenth century dawned missionaries entertained fervent but vain hopes of success within khanates in China Central Asia Persia and Kipchak The reports these missionaries sent back to Europe have fascinated successive generations of historians who analyzed their travels and struggled to understand their motives and aspirations The essays selected for this volume drawn from a range of twentieth century historians and contextualized in the introduction provide a comprehensive overview of missionary efforts in Asia and of the developments in the secular world that both made them possible and encouraged the missionaries hopes for success Three of the studies have been translated from French specially for publication in this volume *Latin Exercises* Ethan Allen Andrews, 1856 *Physiological and Environmental Controls Over the Movement of Water Through Plants* Noel Michele Holbrook, 1995 *The Sacred and the Sinister* David J. Collins, S. J., 2019-03-20 Inspired by the work of eminent scholar Richard Kieckhefer *The Sacred and the Sinister* explores the ambiguities that made and make medieval religion and magic so difficult to differentiate The essays in this collection investigate how the holy and unholy were distinguished in medieval Europe where their characteristics diverged and the implications of that deviation In the Middle Ages the natural world was understood as divinely created and infused with mysterious power This world was accessible to human knowledge and susceptible to human manipulation through three modes of engagement religion magic and science How these ways of understanding developed in light of modern notions of rationality is an important element of ongoing scholarly conversation As Kieckhefer has emphasized ambiguity and ambivalence characterize medieval understandings of the divine and demonic powers at work in the world The ten chapters in this volume focus on four main aspects of this assertion the cult of the saints contested devotional relationships and practices unsettled judgments between magic and religion and inconclusive distinctions between magic and science Freshly insightful this study of ambiguity between magic and religion will be of special interest to scholars in the fields of medieval studies religious studies European history and the history of science In addition to the editor the contributors to this volume are Michael D Bailey Kristi Woodward Bain Maeve B Callan Elizabeth Casteen Claire Fanger Sean L Field Anne M Koenig Katelyn Mesler and Sophie Page *Days Linked by Song* Gerard O'Daly, 2012-05-24 O'Daly looks at Prudentius lyric poems the Cathemerinon Poems for the Day and how they achieve a remarkable creative tension between the two worlds that

determined Prudentius culture the beliefs and practices sacred books and doctrines of Christianity and the traditions poetry and ideas of the Greeks and Romans **Latin Exercises Adapted to Andrews and Stoddard's Latin Grammar** Ethan Allen Andrews,1852 **A Commentary on the Gospels for the Sundays and Other Holy Days of the Christian Year.**

Advent to Easter Rev. William Denton,1861 **Induced plant responses to microbes and insects** Corn  M. J. Pieterse,Marcel Dicke,Saskia C. M. Van Wees,Erik H. Poelman,2014-04-14 Plants are members of complex communities and interact both with antagonists and beneficial organisms An important question in plant defense signaling research is how plants integrate signals induced by pathogens insect herbivores and beneficial microbes into the most appropriate adaptive response Molecular and genomic tools are now being used to uncover the complexity of the induced defense signaling networks that have evolved during the arms races between plants and the other organisms with which they intimately interact To understand the functioning of the complex defense signaling network in nature molecular biologists and ecologists have joined forces to place molecular mechanisms of induced plant defenses in an ecological perspective In this Research Topic we aim to provide an on line open access snapshot of the current state of the art of the field of induced plant responses to microbes and insects with a special focus on the translation of molecular mechanisms to ecology and vice versa
