create valid narratives that explore the future effects of science on events and human beings Science Fact and Science Fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines Although the main focus is on literature other forms of science fiction including film and video games are explored and because science is an international matter works from non English speaking countries are discussed as needed [A Checklist of Robert A.](#)

The Subject of Race in American Science Fiction Sharon DeGraw, 2006-12-19 While the connections between science fiction and race have largely been neglected by scholars racial identity is a key element of the subjectivity constructed in American SF In his Mars series Edgar Rice Burroughs primarily supported essentialist constructions of racial identity but also included a few elements of racial egalitarianism Writing in the 1930s George S Schuyler revised Burroughs' normative SF triangle of white author white audience and white protagonist and promoted an individualistic highly variable concept of race instead While both Burroughs and Schuyler wrote SF focusing on racial identity the largely separate genres of science fiction and African American literature prevented the similarities between the two authors from being adequately acknowledged and explored Beginning in the 1960s Samuel R Delany more fully joined SF and African American literature Delany expands on Schuyler's racial constructionist approach to identity including gender and sexuality in addition to race Critically intertwining the genres of SF and African American literature allows a critique of the racism in the science fiction and a more accurate and positive portrayal of the scientific connections in the African American literature Connecting the popular fiction of Burroughs the controversial career of Schuyler and the postmodern texts of Delany illuminates a gradual change from a stable essentialist construction of racial identity at the turn of the century to the variable social construction of poststructuralist subjectivity today
