Archaeoastronomy and the Maya Gerardo Aldana y Villalobos, Edwin L. Barnhart, 2014-05-30 Archaeoastronomy and the Maya illustrates archaeoastronomical approaches to ancient Mayan cultural production. The book is contextualized through a history of archaeoastronomical investigations into Mayan sites originating in the 19th century discovery of astronomical tables within hieroglyphic books. Early 20th century archaeological excavations revealed inscriptions carved into stone that also preserved astronomical records along with architecture that was built to reflect astronomical orientations. These materials provided the basis of a growing professionalized archaeoastronomy blossoming in the 1970s and expanding into recent years. The chapters here exemplify the advances made in the field during the early 21st century as well as the ongoing diversity of approaches presenting new perspectives and discoveries in ancient Mayan astronomy that result from recent studies of architectural alignments, codices, epigraphy, iconography, ethnography, and calendrics. More than just investigations of esoteric ancient sciences, studies of ancient Mayan astronomy have profoundly aided our understanding of Mayan worldviews. Concepts of time and space, meanings encoded in religious art, intentions underlying architectural alignments, and even methods of political legitimization are all illuminated through the study of Mayan astronomy. **Códice**

Maya de México Andrew D. Turner, 2022-11-08 An in-depth exploration of the history, authentication, and modern relevance of the *Códice Maya de México*, the oldest surviving book of the Americas. Ancient Maya scribes recorded prophecies and astronomical observations on the pages of painted books. Although most were lost to decay or destruction, three pre-Hispanic Maya codices were known to have survived when, in the 1960s, a fourth book that differed from the others appeared in Mexico under mysterious circumstances. After fifty years of debate over its authenticity, recent investigations using cutting-edge scientific and art historical analyses determined that the *Códice Maya de México*, formerly known as the Grolier Codex, is in fact the oldest surviving book of the Americas, predating all others by at least two hundred years. This volume provides a multifaceted introduction to the creation, discovery, interpretation, and scientific authentication of the *Códice Maya de México*. In addition, a full-color facsimile and a page-by-page guide to the iconography make the codex accessible to a wide audience. Additional topics include the uses and importance of sacred books in Mesoamerica, the role of astronomy in ancient Maya societies, and the codex's continued relevance to contemporary Maya communities. **Children's Literature Review Cumulative Title**

Index 2006, 2006-04 **2012** Joseph Gelfer, 2014-09-11 21 December 2012 was believed to mark the end of the thirteenth Baktun cycle in the Long Count of the Mayan calendar. Many people believed this date to mark the end of the world or, at the very least, a shift to a new form of global consciousness. Examining how much of the phenomenon is based on the historical record and how much is contemporary fiction, the book explores the landscape of the modern apocalyptic imagination, the economics of the spiritual marketplace, the commodification of countercultural values, and the cult of celebrity.

Reconsidering Olmec Visual Culture

Carolyn E. Tate,2012-01-18 Recently scholars of Olmec visual culture have identified symbols for umbilical cords bundles and cave wombs as well as a significant number of women portrayed on monuments and as figurines In this groundbreaking study Carolyn Tate demonstrates that these subjects were part of a major emphasis on gestational imagery in Formative Period Mesoamerica In Reconsidering Olmec Visual Culture she identifies the presence of women human embryos and

fetuses in monuments and portable objects dating from 1400 to 400 BC and originating throughout much of Mesoamerica This highly original study sheds new light on the prominent roles that women and gestational beings played in Early Formative societies revealing female shamanic practices the generative concepts that motivated caching and bundling and the expression of feminine knowledge in the 260 day cycle and related divinatory and ritual activities *Reconsidering Olmec Visual Culture* is the first study that situates the unique hollow babies of Formative Mesoamerica within the context of prominent females and the prevalent imagery of gestation and birth It is also the first major art historical study of La Venta and the first to identify Mesoamerica s earliest creation narrative It provides a more nuanced understanding of how later societies including Teotihuacan and West Mexico as well as the Maya either rejected certain Formative Period visual forms rituals social roles and concepts or adopted and transformed them into the enduring themes of Mesoamerican symbol systems
