The Red Colobus Monkeys Thomas T. Struhsaker,2010-04-01 Based on field studies spanning nearly 40 years this reference book summarizes and integrates past research with new and previously unpublished information on the behavioral ecology of Africa s red colobus monkeys from study sites as diverse as Senegal Uganda and Zanzibar It provides an unparalleled compilation of information on taxonomy genetics vocalizations demography social organization dispersal social behavior reproduction mortality factors diet ranging patterns interspecific relations and conservation Social relationships in red colobus are less rigidly structured than in other African monkeys resulting in considerable variation in social organization and group composition both within and between taxa This provides a unique opportunity to examine the extent to which social variables correlate with differences in habitat quality demography and predation by chimpanzees and humans Unfortunately at least half of the 18 taxa of red colobus are now threatened with extinction Conservation problems are described causal factors identified and solutions proposed This volume is intended not only to serve as a reference book but to stimulate and guide future long term research and to encourage effective conservation action

Doctor Dolittle's Delusion Stephen R. Anderson,2006-01-01 Annotation Dr Dolittle and many students of animal communication are wrong animals cannot use language This fascinating book explains why Can animals be taught a human language and use it to communicate Or is human language unique to human beings just as many complex behaviors of other species are uniquely theirs This engrossing book explores communication and cognition in animals and humans from a linguistic point of view and asserts that animals are not capable of acquiring or using human language Stephen R Anderson explains what is meant by communication the difference between communication and language and the essential characteristics of language Next he examines a variety of animal communication systems including bee dances frog vocalizations bird songs and alarm calls and other vocal gestural and olfactory communication among primates Anderson then compares these to human language including signed languages used by the deaf Arguing that attempts to teach human languagesor their equivalents to the great apes have not succeeded in demonstrating linguistic abilities in nonhuman species he concludes that animal

communication systems intriguing and varied though they may be do not include all the essential properties of human language Animals can communicate but they can't talk Written in a playful and highly accessible style Anderson's book navigates some of the difficult territory of linguistics to provide an illuminating discussion of the evolution of language Marc Hauser author of *Wild Minds What Animals Really Think* **Wild Minds** Marc Hauser, 2001-03 an essential examination of how animals assemble the basic tool kit that we call the mind the ability to count to navigate to recognize individuals to communicate and to socialize Jacket Behavior and Culture in One Dimension Dennis Waters, 2021-03-08 Behavior and Culture in One Dimension adopts a broad interdisciplinary approach presenting a unified theory of sequences and their functions and an overview of how they underpin the evolution of complexity Sequences of DNA guide the functioning of the living world sequences of speech and writing choreograph the intricacies of human culture and sequences of code oversee the operation of our literate technological civilization These linear patterns function under their own rules which have never been fully explored It is time for them to get their due This book explores the one dimensional sequences that orchestrate the structure and behavior of our three dimensional habitat Using Gibsonian concepts of perception action and affordances as well as the works of Howard Pattee the book examines the role of sequences in the human behavioral and cultural world of speech writing and mathematics The book offers a Darwinian framework for understanding human cultural evolution and locates the two major informational transitions in the origins of life and civilization It will be of interest to students and researchers in ecological psychology linguistics cognitive science and the social and biological sciences *Snakes of the American West* Charles E. Shaw, Sheldon Campbell, 1974 *How Monkeys See the World* Dorothy L. Cheney, Robert M. Seyfarth, 2024-05-31 Cheney and Seyfarth enter the minds of vervet monkeys and other primates to explore the nature of primate intelligence and the evolution of cognition This reviewer had to be restrained from stopping people in the street to urge them to read it They would learn something of the way science is done something about how monkeys see their world and something about themselves the mental models they inhabit Roger Lewin Washington Post Book World A fascinating intellectual odyssey and a superb summary of where science stands Geoffrey Cowley Newsweek A once in the history of science enterprise Duane M Rumbaugh Quarterly Review of Biology
