So What About History:

So History Doesn't Forget: Abdulrhman A. Hussein, 2012-01-25 This book illustrates that the perception of an external threat to the security of Saudi Arabia's national interests is the major factor behind Saudi external alliances. Given its limited national capabilities, the existence of expansionist and revolutionary regimes in the Arabian Persian Gulf and the nature of Middle East politics, the Kingdom of Saudi Arabia has little choice but to adopt a balance of power policy by building alliances with regional and great powers. Although there exist some studies concerned with the foreign policy of the Kingdom of Saudi Arabia, this is the first comprehensive study that analyzes Saudi foreign policy from an alliance behavior perspective.

Beeton's Dictionary of universal information, comprising geography, history, biography [&c.] by S.O. Beeton & J. Sherer Samuel Orchard Beeton, 1859 **The Concept of History** Dmitri Nikulin, 2017-01-26 The Concept of History reflects on the presuppositions behind the contemporary understanding of history that often remain implicit and not spelled out. It is a critique of the modern understanding of history that presents it as universal and teleological, progressively moving forward to an end. Although few contemporary philosophers and historians maintain the view that there is strict universality and teleology in history, the remnants of these positions still affect our understanding of history. But if history is not universal and singular, evolving toward an objective universal end, it should be possible to admit of multiple histories, some of which we appropriate as our own. Another important aspect of this book is that it provides an account of history that is itself both historical and rooted in attempts to narrate and explain history from its inception in antiquity. The book seeks to establish features or constituents of history that might be found in any historical account and might themselves be considered historical invariants in history.
