Social Behavior Natural Resources And The Environment

Tom Tietenberg, Henk Folmer

Social Behavior Natural Resources And The Environment:

Social Behavior, Natural Resources, and the Environment William R. Burch, Neil H. Cheek, Lee Taylor, 1972 Collection of papers on sociological aspects of ecology with particular reference to issues relating to the unfolding relationship between man's social behaviour the environment and natural resources in the USA indicates that in human dominated ecosystems the biological crises must first be converted into social problems before they have relevance to the social system provides a theoretical overview and suggests some promising lines for future research References and statistical tables *Managing Human Resources for Environmental Sustainability* Susan E. Jackson, Deniz S. Ones, Stephan Dilchert, 2012-06-18 Managing Human Resources for Environmental Sustainability The Society for Industrial and Organizational Psychology SIOP is the premier membership organization for those practicing industrial and organizational psychology The Society's mission is to enhance human well being and performance in organizational and work settings by promoting the science practice and teaching of industrial and organizational I O psychology I O psychologists apply research that improves the well being and performance of people and the organizations that employ them This involves everything from workforce planning employee selection and leader development to studying job attitudes and job motivation implementing work teams and facilitating organizational change SIOP is a nonprofit organization with more than 6 000 members While an independent organization with its own governance SIOP is also a division within the American Psychological Association and an organizational affiliate of the Association for Psychological Science **Sociological Theory and the Environment** Riley E. Dunlap, 2002 Sociological Theory and the Environment is a comprehensive survey and assessment of sociological theories of the relations between societies and their natural biophysical environment This book touches on and addresses virtually all of the major perspectives focal points and debates in environmental sociology today classical and twentieth century social theories macro micro linkage issues globalization and development reflexive modernization ecological modernization vs limits viewpoints modernity and post modernity risk society constructionalism realism environmental movements identities consumption and environment cultural sociologies of the environment and so on At the same time the book aims to go beyond an inventory of environmental sociological theory Sociological Theory and the Environment stresses how new ground can be broken in the articulation of environmental sociology with major classical and contemporary sociological theories *The International Yearbook of Environmental and Resource Economics 2000/2001* Tom Tietenberg, Henk Folmer, 2000-05-25 There has been an explosion in the literature and research on environmental and resource economics in recent years This major annual publication provides a cutting edge survey of current research by the leading experts in the field *Behavior and the Natural Environment* Irwin Altman, Joachim F. Wohlwill, 2012-12-06 The theme of the present volume concerns people's response to the natural environment considered at scales varying from that of a house hold plant to that of vast wilderness areas Our decision to focus on this particular segment of the physical environment was prompted in part by the intrinsic

interest in this subject on the part of a diverse group of social scientists and professionals and of laypersons for that matter and in part by the relative neglect of this topic in standard treatments of the environment behavior field It also serves to bring out once again the interdisciplinary nature of that field and we are pleased to have been able to include representatives from geography sociology social ecology and natural recreation among our contributors We believe that this volume will serve a useful purpose in helping to integrate the findings and concepts in this presently somewhat fragmented field scattered as they are over a very diverse array of publications representing a similarly varied group of specialties It is hoped that the result will be to stimulate future development of this area and to add a measure of increased coherence to it Volume 7 of our series will be devoted to the theme of elderly people and the environment with M Powell Lawton joining us as guest co editor The titles of the papers comprising Volume 7 are shown on page v Irwin Altman Joachim F Wohlwill ix Contents Introduction

Proceedings, Symposium on Recreation Choice Behavior, 1985 *Handbook of Anti-Environmentalism* Tindall, David, Stoddart, Mark C. J., Dunlap, Riley E., 2022-03-22 This thought provoking Handbook provides a theoretical overview of the wide variety of anti environmentalisms and offers an integrative research agenda for future research on the topic Probing the ways in which groups have organized to oppose environmental movements and pro environmental policies in recent decades it examines those involved in these countermovements and studies their motivations and support systems This Handbook explores core topics in the field including contestation over climate change wind power mining forestry food sovereignty oil and gas pipelines and population issues *EPA-600/5*, 1974-02 **Research in Forest Economics and Forest Policy** Marion Clawson, 2021-10-29 In order to fill a growing need for research into forestry issues Resources for the future held a symposium in 1977 Originally published in the same year all papers in this collection were written specifically for this symposium to highlight the most important forestry issues including pricing policy supply and demand and the role of the public and private forestry sector This title will be of interest to Environmental Students and professionals *Green European* Audrone Telesiene, Matthias Gross, 2016-07-01 Green European addresses the quest for a better understanding of European types of environmentalism This monograph focuses on public attitudes and behaviours and the culturally rooted as well as country specific differences The book addresses the wider issue that many European countries are rendered green or as having an advanced environmental awareness but the question how green are Green Europeans really is yet to be answered The book covers a variety of unique data driven comparative studies and is divided into three parts the first addresses perceptions of environmental and technological threats and risks the second part deals with environmental activism in Europe the third discusses environmental attitudes environmental concerns and their imminent link to personal pro environmental behaviour The empirical comparative nature of the contributions is enabled by data from the International Social Survey Programme ISSP
