Social Change And Sustainable Transport:

Social Change and Sustainable Transport William Richard Black, Peter Nijkamp, 2002-11-29 Transportation research has traditionally been dominated by engineering and logistics research approaches This book integrates social economic and behavioral sciences into the transportation field As its title indicates emphasis is on socioeconomic changes which increasingly govern the development of the transportation sector The papers presented here originated at a conference on Social Change and Sustainable Transport held at the University of California at Berkeley in March 1999 under the auspices of the European Science Foundation and the National Science Foundation The contributors who represent a range of disciplines including geography and regional science economics political science sociology and psychology come from twelve different countries Their subjects cover the consequences of environmentally sustainable transportation vs the business as usual status quo the new phenomenon of edge cities automobile dependence as a social problem the influence of leisure or discretionary travel and of company cars the problems of freight transport the future of railroads in Europe the imposition of electronic road tolls potential transport benefits of e commerce and the electric car *Sustainable Transportation* William

Richard Black, 2010-01-01 During the last two decades sustainability has become the dominant concern of transportation planners and policymakers This timely text provides a framework for developing systems that move people and products efficiently while minimizing damage to the local and global environment The book offers a uniquely comprehensive perspective on the problems surrounding current transportation systems climate change urban air pollution diminishing petroleum reserves safety issues and congestion It explores the full range of possible solutions including applications of pricing planning policy education and technology Numerous figures tables and examples are featured with a primary focus on North America

Social Dimensions of Sustainable Transport Stefan Poppelreuter, 2016-12-05 Based on the work of the STELLA Sustainable Transport in Europe and Links and Liaisons with America Focus Group 3 this volume brings together leading transport academics to discuss society behaviour and public private transport Theoretical and empirical research from across North America and Europe form the basis of this book which is composed of twelve chapters that fall into four logical sections Chapters in the first section provide a contextual overview and survey trends in mobility behaviour and prospects of sustainable transport in the two continents Chapters in the second section provide comparative assessments of difficulties posed by contemporary transport systems for three particular user groups low income female and elderly interventions indicated and research needed The third set of chapters survey recent developments in behavioural modelling that lend themselves to the study of the constellation of issues concerning STELLA Focus Group 3 The remaining chapters of the book address critical issues of equity and policy implementation

Sustainable Transportation Henrik Gudmundsson, Ralph P. Hall, Greg Marsden, Josias Zietsman, 2015-07-03 This textbook provides an introduction to the concept of sustainability in the context of transportation planning management and decision making The book is divided into two

parts In the first part indicators and frameworks for measuring sustainable development in the transportation sector are developed In the second the authors analyze actual planning and decision making in transportation agencies in a variety of governance settings This analysis of real world case studies demonstrates the benefits and limitations of current approaches to sustainable development in transportation The book concludes with a discussion on how to make sustainability count in transportation decision making and practice *Social Costs and Sustainable Mobility* Klaus Rennings,Olav

Hohmeyer,Richard L. Ottinger,2012-12-06 Fair and efficient pricing has become increasingly important in international environmental and transport policy Thus the valuation and internalization of social costs is now a crucial element within strategies towards sustainable mobility The book provides methods and results from major European and American studies evaluating both social costs of transport and first experiences with their internalization in different contexts infrastructure planning urban road pricing and highway tolling Additionally complementary non monetary instruments for a transition towards sustainable mobility are presented and discussed *Experimenting for Sustainable Transport* Remco Hoogma,Rene

Kemp,Johan Schot,Bernhard Truffer,2005-06-29 This book describes eight experiments with sustainable transport options which are analysed in the context of established travel practice and car ownership and the problems they pose and the trends in transport technology and policy *Aviation and Tourism* Anne Graham,Andreas Papatheodorou,Peter Forsyth,2016-04-08

Transport is an essential element of tourism providing the vital link between the tourist generating areas and destinations Good accessibility which is determined by the transport services provided is a fundamental condition for the development of any tourist destination Moreover the transport industry can be a major beneficiary of tourism because of the additional passenger demand that may be generated Aviation is an increasingly important mode of transport for tourism markets Whilst geography has meant that in modern times air travel has always been the dominant mode for long distance travel and much international tourism moves towards deregulation and in particular the emergence of the low cost carrier sector have also increased aviation s significance for short and medium haul tourism trips Thus developments in aviation can have very major implications for many leisure and business tourism markets However the characteristics and needs of leisure travellers are generally so very different from business travellers that this necessitates a separate consideration of these markets if a detailed understanding of the relationship with aviation is to be gained In spite of the obvious closeness between the aviation and tourism industries there are very few specialist texts on this subject Most tourism focused books consider aviation as just one component of the tourism industry which needs to be discussed whereas aviation specialist texts rarely concentrate on just leisure travel In addition there is very little literature that gives a detailed appreciation of the complexities and potential conflicts associated with the development of coherent and effective aviation and tourism policies Therefore it is the aim of this book to fill this important gap which exists with a comprehensive in depth study of the relationship between aviation and leisure travel The book deals exclusively with issues related to the relationship between aviation and leisure travel It does

this with an analysis of the theoretical concepts relevant to the subject area combined with a detailed investigation of current practice within the aviation and tourism industries Each chapter is illustrated with case study material that will reinforce the understanding of the issues that are being examined *Transport Survey Methods* Jean-Loup Madre,Patrick Bonnel,Johanna Zmud,Martin Lee-Gosselin,2009-11-02 Identifies various challenges to the world community of transport survey specialists as well as the larger constituency of practitioners planners and decision makers that it serves and provides potential solutions and recommendations for addressing them **Transport Models in Urban Planning Practices** Marco te

Brömmelstroet, Luca Bertolini,2016-04-08 This book explores how transportation models can play a role in a changing transport planning and policy making context Most models are rooted in decades of development work and are geared to offer value free academic and explicit knowledge to transport planning experts However planning practice has changed dramatically over the years resulting in a less technical rational view on the use of such knowledge especially so in early strategy making phases More and more complex policy goals integration of a wide area of other policy domains a wider ever changing and much more mixed group of planning participants and much more focus on wicked problems The book maps how this influences the effectiveness of transport modelling exercises and explores several state of the art implementations This book was published as a special issue of Transport Reviews Intelligent Transportation Systems Ahmed Abdel-Rahim,2012-03-16 Intelligent Transportation Systems ITS have transformed surface transportation networks through the integration of advanced communications and computing technologies into the transportation infrastructure ITS technologies have improved the safety and mobility of the transportation network through advanced applications such as electronic toll collection in vehicle navigation systems collision avoidance systems and advanced traffic management systems and advanced traveler information systems In this book that focuses on different ITS technologies and applications authors from several countries have contributed chapters covering different ITS technologies applications and management practices with the expectation that the open exchange of scientific results and ideas presented in this book will lead to improved understanding of ITS technologies and their applications
