Animal Breeding, Welfare and Society Jacky Turner, 2010 The determination of when how often and with whom an animal breeds is moving rapidly away from evolutionary pressures and towards human purposes these include the breeding of around 50 billion mammals and birds for food production annually the breeding of pedigree dogs and cats racing dogs and horses specialised laboratory animal strains and the use of reproductive science to conserve endangered species or breeds and to limit unwanted populations of pests and non native

species But the ethics and sustainability of this takeover of animals reproductive lives have been insufficiently examined by either professionals or the public This book discusses the methods the motivations and the consequences of human intervention in animal breeding in terms of animal health behaviour and well being It explores where we are now and the choices ahead and looks to a future where we have more respect for animals as sentient beings and where we could loosen the reins of reproductive control

Social Behaviour in Farm Animals Keeling, L.J., ed,2001 Production Diseases in Farm Animals Josef Johann Gross,2024-05-26 This textbook deals comprehensively with livestock production diseases and their prevention in the major species ruminants swine and poultry It gives an interdisciplinary view on pathophysiology prophylaxis and health management Livestock breeding and husbandry is often accompanied by a conflict of interest between the animal s biological requirements and economic producer needs This conflict is increasingly gaining attention not only by producers animal scientists and veterinarians but also by the public It creates significant future challenges which are described and addressed in this book The main topics covered are the use of antimicrobials with emphasis on security and safety for producers consumers the impact of locomotion disorders on performance and welfare of farm animals the interactions of gut microbiome genetics climate change metabolic status and mineral homeostasis with reproduction performance animal health and welfare infectious and respiratory diseases the raising of neonates A special section is devoted to behavioural signs indicating an impaired animal welfare These are the basis for precision livestock farming PLF technology and the development of new management concepts The present work is a valuable resource for veterinarians students as well as expert readers from animal and agricultural sciences food safety and technology Supplementary videos can be accessed online as well as directly from the print book simply download the Springer Nature More Media App for free and scan the links with the play button

Genetics and the Behavior of Domestic Animals Temple Grandin,Mark J. Deesing,2013-04-22 Behavior is shaped by both genetics and experience nature and nurture This book synthesizes research from behavioral genetics and animal and veterinary science bridging the gap between these fields The objective is to show that principles of behavioral genetics have practical applications to agricultural and companion animals The continuing domestication of animals is a complex process whose myriad impacts on animal behavior are commonly under appreciated Genetic factors play a significant role in both species specific behaviors and behavioral differences exhibited by individuals in the same species Leading authorities explore the impact of increased intensities of selection on domestic animal behavior Rodents cattle pigs sheep horses herding and guard dogs and poultry are all included in these discussions of genetics and behavior making this book useful to veterinarians livestock producers laboratory animal researchers and technicians animal trainers and breeders and any researcher interested in animal behavior Includes four new chapters on dog and fox behavior pig behavior the effects of domestication and horse behavior Synthesizes research from behavioral genetics animal science and veterinary literature Broaches fields of behavior genetics and behavioral research Includes practical applications of

principles discovered by behavioral genetics researchers Covers many species ranging from pigs dogs foxes rodents cattle horses and cats *Reproduction in Farm Animals* E. S. E. Hafez, B. Hafez, 2013-05-13 When you're looking for a comprehensive and reliable text on large animal reproduction look no further the seventh edition of this classic text is geared for the undergraduate student in Agricultural Sciences and Veterinary Medicine In response to reader feedback Dr Hafez has streamlined and edited the entire text to remove all repetitious and nonessential material That means you'll learn more in fewer pages Plus the seventh edition is filled with features that help you grasp the concepts of reproduction in farm animals so you'll perform better on exams and in practice condensed and simplified tables so they're easier to consult an easy-to-use glossary at the end of the book an expanded appendix which includes graphic illustrations of assisted reproduction technology Plus you'll find valuable NEW COVERAGE on all these topics Equine Reproduction expanded information reflecting today's knowledge Llamas NEW CHAPTER Micromanipulation of Gametes and In Vitro Fertilization NEW CHAPTER Reach for the text that's revised with the undergraduate in mind the seventh edition of Hafez's *Reproduction in Farm Animals* *Genetics and the Behavior of Domestic Animals* Alain Boissy, Hans W. Erhard, 2013-04-22 This chapter provides an overview of the current behavioral and cognitive aspects of emotions in animals and explores the impacts of emotional experiences on the animal's adaptation to its current challenging circumstances There is evidence that animal welfare results from the animal's perception of its environment and its background The chapter is structured in four complementary sections The first one addresses the nature of emotions that the animals can feel which is validated from commonalities in physiological and behavioral responses to dangers across and within species The second section presents advanced features of the relationships between cognition and emotions originally studied in humans which are now developed in animals to better access their affective states The third section is devoted to the relevance of the personality concept as resulting from both genetics and developmental experience for assessing animal individuality in emotional behaviors and stress The last section explores some approaches that can alleviate fear and induce positive affective states with the potential to mitigate detrimental stress-induced effects on the welfare and health status by eliciting positive emotions in animals
