Social Choice with Partial Knowledge of Treatment Response Charles F. Manski, 2005-10-30 This book addresses key aspects of this broad question exploring and partially resolving pervasive problems of identification and statistical inference that arise when studying treatment response and making treatment choices Charles Manski addresses the treatment choice problem directly using Abraham Wald's statistical decision theory taking into account the ambiguity that arises from identification problems under weak but justifiable assumptions **BOOK JACKET**

Identification Problems in the Social Sciences Charles F. Manski, 1999-03-15 This book provides a language and tools for finding bounds on predictions social and behavioral scientists can logically make from nonexperimental and experimental data Manski draws on criminology demography epidemiology social psychology sociology and economics to illustrate this language and to demonstrate the usefulness of the tools

Public Policy in an Uncertain World Charles F. Manski, 2013-02-14 Manski argues that public policy is based on untrustworthy analysis Failing to account for uncertainty in an uncertain world policy analysis routinely misleads policy makers with expressions of certitude Manski critiques the status quo and offers an innovation to improve both how policy research is conducted and how it is used by policy makers

Measuring Crime and Criminality John MacDonald, 2017-09-08 *Measuring Crime and Criminality* focuses on how different approaches to measuring crime and criminality are used to test existing criminological theories Each chapter reviews a key approach for measuring criminal behaviour and discusses its strengths or weaknesses for explaining the facts of crime or answers to central issues of criminological inquiry The book describes the state of the field on different approaches for measuring crime and criminality as seen by prominent scholars in the field Among the featured contributions are The Use of Official Reports and Victimization Data for Testing Criminological Theories The Design and Analysis of Experiments in Criminology and Growth Curve Mixture Models for Measuring Criminal Careers Also included are papers titled Counterfactual Methods of Causal Inference and Their Application to Criminology Measuring Gene Environment Interactions in the Cause of Antisocial Behaviour and What Has Been Gained and Lost through Longitudinal Research and Advanced Statistical Models This volume of *Advances in Criminological Theory* illustrates how understanding the various ways criminal behaviour is measured is useful for developing theoretical insights on the causes of crime

Identification for Prediction and Decision Charles F. Manski, 2009-06-30 This book is a full scale exposition of Charles Manski's new methodology for analyzing empirical questions in the social sciences He recommends that researchers first ask what can be learned from data alone and then ask what can be learned when data are combined with credible weak assumptions Inferences predicated on weak assumptions he argues can achieve wide consensus while ones that require strong assumptions almost inevitably are subject to sharp disagreements Building on the foundation laid in the author's *Identification Problems in the Social Sciences* Harvard 1995 the book's fifteen chapters are organized in three parts Part I studies prediction with missing or otherwise incomplete data

Part II concerns the analysis of treatment response which aims to predict outcomes when alternative treatment rules are applied to a population Part III studies prediction of choice behavior Each chapter juxtaposes developments of methodology with empirical or numerical illustrations The book employs a simple notation and mathematical apparatus using only basic elements of probability theory

Trends in Computational Social Choice Ulle Endriss, 2017 Computational social choice is concerned with the design and analysis of methods for collective decision making It is a research area that is located at the interface of computer science and economics The central question studied in computational social choice is that of how best to aggregate the individual points of view of several agents so as to arrive at a reasonable compromise Examples include tallying the votes cast in an election aggregating the professional opinions of several experts and finding a fair manner of dividing a set of resources amongst the members of a group Back cover

Patient Care under Uncertainty Charles F. Manski, 2019-09-10 How cutting edge economics can improve decision making methods for doctors Although uncertainty is a common element of patient care it has largely been overlooked in research on evidence based medicine Patient Care under Uncertainty strives to correct this glaring omission Applying the tools of economics to medical decision making Charles Manski shows how uncertainty influences every stage from risk analysis to treatment and how this can be reasonably confronted In the language of econometrics uncertainty refers to the inadequacy of available evidence and knowledge to yield accurate information on outcomes In the context of health care a common example is a choice between periodic surveillance or aggressive treatment of patients at risk for a potential disease such as women prone to breast cancer While these choices make use of data analysis Manski demonstrates how statistical imprecision and identification problems often undermine clinical research and practice Reviewing prevailing practices in contemporary medicine he discusses the controversy regarding whether clinicians should adhere to evidence based guidelines or exercise their own judgment He also critiques the wishful extrapolation of research findings from randomized trials to clinical practice Exploring ways to make more sensible judgments with available data to credibly use evidence and to better train clinicians Manski helps practitioners and patients face uncertainties honestly He concludes by examining patient care from a public health perspective and the management of uncertainty in drug approvals Rigorously interrogating current practices in medicine Patient Care under Uncertainty explains why predictability in the field has been limited and furnishes criteria for more cogent steps forward

Modeling Decisions for Artificial Intelligence Vicenç Torra, Yasuo Narukawa, Jordi Nin, Núria Agell, 2020-08-26 This book constitutes the refereed proceedings of the 17th International Conference on Modeling Decisions for Artificial Intelligence MDAI 2020 held in Sant Cugat Spain in September 2020 The 24 papers presented in this volume were carefully reviewed and selected from 46 submissions They discuss different facets of decision processes in a broad sense and present research in data science data privacy aggregation functions human decision making graphs and social networks and recommendation and search The papers are organized in the following topical sections aggregation operators and decision

making and data science and data mining The conference was canceled due to the COVID 19 pandemic Integrating Social and Behavioral Sciences Within the Weather Enterprise National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Division on Earth and Life Studies, Board on Human-Systems Integration, Board on Environmental Change and Society, Board on Atmospheric Sciences and Climate, Committee on Advancing Social and Behavioral Science Research and Application Within the Weather Enterprise, 2018-02-05 Our ability to observe and forecast severe weather events has improved markedly over the past few decades Forecasts of snow and ice storms hurricanes and storm surge extreme heat and other severe weather events are made with greater accuracy geographic specificity and lead time to allow people and communities to take appropriate protective measures Yet hazardous weather continues to cause loss of life and result in other preventable social costs There is growing recognition that a host of social and behavioral factors affect how we prepare for observe predict respond to and are impacted by weather hazards For example an individual's response to a severe weather event may depend on their understanding of the forecast prior experience with severe weather concerns about their other family members or property their capacity to take the recommended protective actions and numerous other factors Indeed it is these factors that can determine whether or not a potential hazard becomes an actual disaster Thus it is essential to bring to bear expertise in the social and behavioral sciences SBS including disciplines such as anthropology communication demography economics geography political science psychology and sociology to understand how people's knowledge experiences perceptions and attitudes shape their responses to weather risks and to understand how human cognitive and social dynamics affect the forecast process itself Integrating Social and Behavioral Sciences Within the Weather Enterprise explores and provides guidance on the challenges of integrating social and behavioral sciences within the weather enterprise It assesses current SBS activities describes the potential value of improved integration of SBS and barriers that impede this integration develops a research agenda and identifies infrastructural and institutional arrangements for successfully pursuing SBS weather research and the transfer of relevant findings to operational settings **Characterizing and Communicating Uncertainty in the Assessment of Benefits and Risks of Pharmaceutical Products** Institute of Medicine, Board on Health Sciences Policy, Forum on Drug Discovery, Development, and Translation, 2014-12-19 Despite the extensive body of evidence that informs regulatory decisions on pharmaceutical products significant uncertainties persist including the underlying variability in human biology factors associated with the chemistry of a drug and limitations in the research and clinical trial process itself that might limit the generalizability of results As a result regulatory reviewers are consistently required to draw conclusions about a drug's safety and efficacy from imperfect data Efforts are underway within the drug development community to enhance the evaluation and communication of the benefits and risks associated with pharmaceutical products aimed at increasing the predictability transparency and efficiency of pharmaceutical regulatory decision making Effectively communicating

regulatory decisions necessarily includes explanation of the impact of uncertainty on decision making On February 12 and May 12 2014 the Institute of Medicine s Forum on Drug Discovery Development and Translation held public workshops to advance the development of more systematic and structured approaches to characterize and communicate the sources of uncertainty in the assessment of benefits and risks and to consider their implications for pharmaceutical regulatory decisions Workshop presentations and discussions on February 12 were convened to explore the science of identifying and characterizing uncertainty in scientific evidence and approaches to translate uncertainties into decisions that reflect the values of stakeholders The May 12 workshop presentations and discussions explored tools and approaches to communicating about scientific uncertainties to a range of stakeholders in the drug development process Characterizing and Communicating Uncertainty in the Assessment of Benefits and Risks of Pharmaceutical Products summarizes the presentation and discussion of both events This report explores potential analytical and communication approaches and identifies key considerations on their development evaluation and incorporation into pharmaceutical benefit risk assessment throughout the entire drug development lifecycle
