The New Regionalism in Western Europe Michael Keating, 1998 In the 1990s the states of Western Europe faced twin challenges from above in the shape of globalization and European integration and from below in the form of new regionalist movements In this authoritative book Michael Keating traces the historical origins of regionalism showing that territorial politics has always been a feature of the West European state Then he analyses the post war model of territorial management in the Keynesian welfare state and shows how current trends are re shaping the meaning of political space and encouraging new forms of political mobilization and action This new regionalism is no longer contained within the nation state so that regions must face the global market and an integrating Europe directly Professor Keating argues that regionalism is a complex phenomenon spanning culture economics politics and policy It takes different forms in different settings shaped by the imperatives of economic competition in a global age as well as by political forces within the regions themselves There is a discussion of regionalism as a strategy for economic development of the emergence of a regional level of government and of regions with the European Union The New Regionalism in Western Europe will be essential reading for academics and students interested in European politics future integration within the European Union and European political history

The Structure of Political Competition in Western Europe Zsolt Enyedi, Kevin Deegan-Krause, 2013-09-13 Is European party politics hovering above society Why do voters pick one party over others Is it a question of class Of religion Of attitudes about taxes or immigration or global warming Or is it something else entirely The Structure of Political Competition in Western Europe takes a detailed look at the ways in which Western Europe's party systems are anchored in social and ideological structures The book's first section focuses on the role of social structures particularly education class and religion

and analyzes the complex interplay among these factors The second section addresses the ways that the sociological structures such as class and religion interact with voters values The third section examines the way that these structures and values shape the space of political competition among parties The conclusion integrates the findings of the empirical articles putting them into broader comparative perspective discussing whether relatively predictable structures have been overwhelmed by media driven spectacles political personalities and focus on short term economic performance This volume will appeal to scholars and graduate students in Europe and those from North America Asia and other regions who study European politics political parties cleavages and political behaviour This book was published as a special issue of West European Politics

European Regions Elisabeth Donat, Sarah Meyer, Gabriele Abels, 2020-09-23 At the beginning of the 21st century the EU is facing deep political social and economic changes The benefit of supranational organization is no longer obvious to European citizens and questions of legitimacy have accompanied the EU's development over the last decades Regions albeit often deemed obsolete present themselves as stable and reliable partners in this turbulent environment in being important objects of identification to their citizens but also relevant political and legal entities in the EU's multilevel governance system This edited volume asks about the role of regions and regional identity in a European Union that is perhaps struggling more than ever about its future

Environmental Protest and the State in France G. Hayes, 2002-09-19 This book discusses the issues and strategies which have characterized the environmental campaigns mounted against recent controversial infrastructure projects in France Focusing on the changing nature of policymaking in the Fifth Republic as a key factor in the organization of each protest Graeme Hayes asks why some protests succeed where others fail and how we should understand the relationship between states and social movements in general

The Theory, Practice and Potential of Regional Development Kelly Vodden, David Douglas, Sean Markey, Sarah Minnes, Bill Reimer, 2019-07-04 Canadian regional development today involves multiple actors operating within nested scales from local to national and even international levels Recent approaches to making sense of this complexity have drawn on concepts such as multi level governance relational assets integration innovation and learning regions These new regionalist concepts have become increasingly global in their formation and application yet there has been little critical analysis of Canadian regional development policies and programs or the theories and concepts upon which many contemporary regional development strategies are implicitly based This volume offers the results of five years of cutting edge empirical and theoretical analysis of changes in Canadian regional development and the potential of new approaches for improving the well being of Canadian communities and regions with an emphasis on rural regions It situates the Canadian approach within comparative experiences and debates offering the opportunity for broader lessons to be learnt This book will be of interest to policy makers and practitioners across Canada and in other jurisdictions where lessons from the Canadian experience may be applicable At the same time the volume contributes to and updates regional development theories and concepts that are

taught in our universities and colleges and upon which future research and analysis will build *Mobilizing Regions, Mobilizing Europe* Sebastian M. Buettner, 2013-10-23 Regional development strategies are becoming more similar all around Europe even though regional differences are more pronounced than ever and many European regions have become more autonomous actors This thesis of a peculiar standardized diversification of sub national space in the modern European Union is the point of departure of this book Based upon the analytical premises of Stanford School Sociological Institutionalism Sebastian M B ttner studies regional mobilization in contemporary Europe from a new and innovative perspective He highlights the importance of scientific expertise and global scientific models in contemporary regional development practice and exemplifies their significance with the example of region building in Poland in the course of EU integration This new wave of regional mobilization is not just conceived as an effect of local national or European politics but as an expression of a larger conceptual shift in governing society and space This well researched and clearly argued book not only provides fresh insights into region building and regionalization in contemporary European space but also contributes to the new sociology of Europeanization It will be an illuminating read for scholars and students in Sociology European and EU studies International Relations Cultural Studies Geography Regional Science Polish Studies and related subject areas **The Rise of Regional Authority** Liesbet Hooghe, Gary Marks, Arjan Schakel, 2010-04-05 Most countries around the globe have one or two levels of regional or intermediate government yet we have little systematic idea of how much authority they wield or how this has changed over time This book measures and explains the formal authority of intermediate or regional government in 42 advanced democracies including the 27 EU member states It tracks regional authority on an annual basis from 1950 to 2006 The measure reveals wide variation both cross sectionally and over time The authors examine four influences functional pressures democratization European integration and identity to explain regionalization over the past half century This unique and comprehensive volume will be a vital resource for students and scholars of comparative politics public administration and public management federalism democratization nationalism and multilevel governance Viva la Transición Christophe Solioz, 2020-11-19 In einem Europa das von Entdemokratisierung und Entsolidarisierung gepr gt ist zeigt der Autor Wege der Transition auf hin zu einem starken und polymorphen Europa mit ausgepr gten und demokratisch organisierten Institutionen Ausgangspunkt der Analyse sind der Zusammenbruch des Warschauer Paktes und die Transitionsprozesse in Mittel und Osteuropa In drei gro en Teilen werden Begrifflichkeiten gekl rt und das Verh ltnis der mittel und osteurop ischen untereinander analysiert sowie Bruch und Ann herung von Ost und West anschaulich dargestellt Zun chst wird in Teil I die Phase nach dem Fall der Berliner Mauer bis zum Jahr 2008 mit all ihren Paradoxien und Ann herungsprozessen nachgezeichnet bevor sich anschlie end ab 2008 09 die Phase der gro en Krisen Teil II andeutet In Teil III wird ein kleiner Ausblick gewagt der trotz Corona bedenkenswert ist **Comparative Politics** Daniele Caramani, 2014 This exciting and authoritative introduction to comparative politics provides a range of perspectives methods and theories at the heart of

political systems around the world Alongside explanations of the most important themes students are presented with a wealth of empirical data to demonstrate similarities and differences in practice and to encourage research This new edition takes account of the latest developments in the wake of democratic uprisings in North Africa and the Middle East and sees a much stronger emphasis on the financial crisis paying particular attention to state finances and stressing the effects of the crisis on political attitudes and forms of participation

Region-Building in Africa Daniel H. Levine, Dawn

Nagar, 2016-05-19 This landmark book is the first of its kind to assess the challenges of African region building and regional integration across all five African sub regions and more than five decades of experience considering both political and economic aspects Leading scholars and practitioners come together to analyze a range of entwined topics including the theoretical underpinnings that have informed Africa's regional integration trajectory the political economy of integration including the sources of different waves of integration in pan Africanism and the reaction to neo liberal economic pressures the complexities of integration in a context of weak states and the informal regionalization that often occurs in borderlands the increasing salience of Africa's relationships with rising extra regional economic powers including China and India and comparative lessons from non African regional blocs including the EU ASEAN and the Southern Common Market A core argument of this book running through all chapters is that region building must be recognized as a political project as much as if not more than an economic one successful region building in Africa will need to include the complex political tasks of strengthening state capacity including states capacity as developmental states that can actively engage in economic planning resolving long standing conflicts over resources and political dominance improving democratic governance and developing trans national political structures that are legitimate and inclusive

Constitutional Policy in Multilevel Government Arthur Benz, 2016-07-21

The search for a robust balance of power is a continuous challenge for multilevel political system Institutions like parliaments or courts can protect the existing order However necessary adjustments to economic social or international challenges or policies

determined to improve ineffective structures or to prevent disintegration require constitutional amendments Whereas constitutional policy appears as essential to maintain balance changing a constitution is rather difficult in multilevel governments Due to the veto power of many actors pursuing divergent interests policies aiming to redistribute power or fiscal resources risk to end in the joint decision trap Hence multilevel government is confronted by a fundamental dilemma

Constitutional Policy in Multilevel Government compares processes of constitutional reform in federal and regionalized states Based on a theoretical framework emphasizing the relevance of negotiations in parliamentary intergovernmental and societal arenas it identifies conditions for successful reforms and explains the consequences of failed reforms Moreover it highlights the interplay of reform processes and constitutional evolution as essential to maintaining a robust balance of power The book demonstrates that an appropriate arrangement of multiple arenas of negotiation including executives members of parliament and civil society organizations and sequential order of reform processes proves fundamental to prevent federal or regionalized governments from becoming either instable or ending with rigid constitutions

Transformations in Governance is a major new academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public private networks It brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work but it is pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford

Convergence and Divergence in European Public Law

Paul Beaumont, Carole Lyons, Neil Walker, 2002-06-07 This book grew out of a symposium held in the University of Aberdeen in May 2000 It examines the extent to which the European Union has brought about and should bring about convergence of law in Europe in particular but not exclusively public law in Europe Rather than focusing narrowly on the Intergovernmental Conference process the book engages those who wish a detached and at times theoretical examination of the politics of institutional reform in the EU Michael Keating and Joanne Scott of the legal techniques for accommodating diversity within the Union and the process of treaty making or constitution building in the EU Deirdre Curtin Ige Dekker Bruno de Witte and Carole Lyons the cross fertilisation of administrative law concepts between the EU level and the national level Chris

Himsworth Ton Heukels and Jamila Tib the need for and legitimacy of a European Union competence on human rights Grinne de B rca Paul Beaumont and Niamh NicShuibhne and whether private law and public law differ in the extent to which they go to the heart of reflect national culture and therefore in the extent to which they are amenable to convergence Carol Harlow Pierre Legrand and Neil Walker *European Multiplicity* Didem Buhari-Gulmez, Chris Rumford, 2014-06-30

European Multiplicity does not conform to the expectations of a narrow EU studies agenda wherein European integration is seen as the destiny for the continent each country including non members being compelled to seek a place in an unfolding order united in diversity Rather the book demonstrates the benefits of an agenda shift away from an overriding concern with integration towards a consideration of the possibility that a singular Europe may not exist and that the multiplicity of Europe is all around us As the chapters in this volume highlight multiplicity reveals itself across the range of EU studies as a key dimension in Europe s transformation Multiplicity is evident both in cases where official EU policy exists labour migration citizenship regional policy and in areas which are central to European life more generally multiculturalism multilingualism the public sphere Euroscepticism The idea of European multiplicity also challenges the established notion that plurality can be accounted for in terms of identity politics Moreover it confronts the tendency to see Europe in terms of binaries such as East West old new North South core periphery Christian Muslim EU members non members and top down bottom up A core feature of this book is the establishment of the viability of an approach to studying Europe which does not rely on the binaries upon which thinking about identity is all too often based Many Europes is one of the growing issues in EU scholarship no longer confined to the margins of European Studies The book makes a compelling case for the idea that Europe is best understood in terms of its inherent multiplicity **The Independence of Scotland** Michael

Keating, 2009-09-10 After three hundred years the Anglo Scottish Union is in serious difficulty This is not because of a profound cultural divide between England and Scotland but because recent decades have seen the rebuilding of Scotland as a political community while the ideology and practices of the old unionism have atrophied Yet while Britishness is in decline it has not been replaced by a dominant ideology of Scottish independence Rather Scots are looking to renegotiate union to find a new place in the Isles in Europe and in the world There are few legal constitutional or political obstacles to Scottish independence but an independent Scotland would need to forge a new social and economic project as a small nation in the global market place and there has been little serious thinking about the implications of this Short of independence there is a range of constitutional options for renegotiating the Union to allow more Scottish self government on the lines that public opinion seems to favour The limits are posed not by constitutional principles but by the unwillingness of English opinion to abandon their unitary conception of the state The end of the United Kingdom may be provoked not by Scottish nationalism but by English unionism **Economic Policy in the European Union** Wim Meeusen, 1999-01-01 This book is a very good consideration of the uncertainties and difficulties involved in the intervention of EU institutions in Europe Dominique Redor

ECSA Review Economic Policy in the European Union analyses the key issues confronting Europe as we enter the 21st century It focuses mainly on the transition problems linked with the creation of European Monetary Union as well as more specific issues such as social labour environmental and science and technology policy **B/ordering Space** Henk van Houtum, 2017-03-02 In the wake of globalization numerous social scientists are turning to concepts of mobility fluidity and hybridity to characterize a presumed de territorialization and de bordering of contemporary social and economic relations This book brings together a select group of internationally renowned human geographers to explore the use of these concepts in relation to space place and territory In doing so they re situate the subject of borders as active socio spatial processes from a variety of theoretical perspectives The contributors link debates on borders to discussions within the wider sphere of cultural studies notably those addressing themes of migration post colonialism the formation of national regional identities and radical democratic practice The chapters focus on those discursive practices that constitute bordered geographical entities in the first instance through differentiated regimes of discourse The book thus transcends the narrower field of borderlands research by building bridges to other domains of enquiry within political and human geography

Crisis of Social Democracy in Europe Michael Keating, 2015-04-20 This volume examines the fortunes of social democracy in Western and East Central Europe and the policy challenges it faces By arguing that social democracy is a way of reconciling market capitalism with social inclusion and equality they show that it h Handbook on Cohesion Policy in the EU Simona Piattoni, Laura Polverari, 2016-08-26 This Handbook covers all major aspects of EU Cohesion policy one of the most significant areas of intervention of the European Union Over five parts It discusses this policy s history and governing principles the theoretical approaches from which it can be assessed the inter institutional and multi level dynamics that it tends to elicit its practical implementation and impact on EU member states its interactions with other EU policies and strategies and the cognitive maps and narratives with which it can be associated An absolute must for all students of the EU
