**The emergence of American English as a discursive variety** Ingrid Paulsen, 2022 Do speakers identity constructions influence the emergence of new varieties of a language This question is at the heart of a debate about how the process of the emergence of postcolonial varieties of English can best be modeled This volume contributes to the debate by linking it to models and theories proposed by anthropological linguists sociolinguists and discourse linguists who view identity as a social and cultural phenomenon that is produced through linguistic and other social practices Language is seen as essential for identity constructions because speakers use linguistic forms that index social personae as well as specific social practices and values to convey an image of self to other speakers Based on the theory of enregisterment that models the cultural and discursive process of the creation of indexical links between linguistic forms and social values the argument is made that any model of the emergence of new varieties needs to differentiate carefully between a structural level and a discursive level What emerges on the discursive level as a result of processes of enregisterment is a discursive variety The volume illustrates how the emergence of a discursive variety can be systematically studied in a historical context by focusing on the enregisterment of American English as it can be observed in nineteenth century U S newspapers Using a discourse linguistic methodological framework and two large databases containing close to 78 million newspaper articles the study reveals a complex pattern of indexical links between the phonological forms h dropping and insertion yod dropping a lengthened and backened bath vowel non rhoticity a realization of prevocalic r as a labiodental approximant as well as the lexical items baggage and pants on the one hand and social values centering around nationality authenticity and non specificity on the other hand Qualitative analyses uncover the social personae associated with the linguistic forms e g the American cowboy the African American mammy and the Anglo maniac American dude while quantitative analyses trace the development over time and show that the enregisterment processes were widespread and not restricted to a particular region The Northern Girl's Song , 1865 **Sport in Korea** Dae Hee Kwak, Yong Jae Ko, Inkyu Kang, Mark Rosentraub, 2017-07-28 Korea has become a powerful force in global sport with South Korea finishing fifth in the medals table at London 2012 and hosting the Winter Olympics in 2018 This book brings together scholars from disciplines including sport history sociology journalism economics sport development and sport management to
