Chapter 3. Archetype Semantics: How It Corresponds To The Concept Of “An Image.” How Archetypal Are Images? Andrey Davydov, Olga

Skorbatyuk, 2017-09-16 An image is archetypal only when it is an individual value which through natural analogs allows a person to learn about himself obtain information about his individual qualities recorded in the individual structure of psyche which ultimately allows a person to legalize his own innate qualities The authors reason that logically an archetype in its traditional consideration cannot be that prototype preimage which as an initial idea determines the individual human psyche because by definition it belongs to culture it is its artifact Consequently according to existing semantics an archetype can be anything except an archetype as an idea This scientific paper examines whether semantics of an archetype in its traditional sense corresponds to the concept of an image if an image is considered in terms of a copy a duplicate can an archetype of culture be seriously considered as something that directly forms individual human psyche as a structure that appeared long before symbolism The authors think that not every image is archetypal because not every image is equal to prototype preimage as an initial idea corresponding to the concept of an archetype An image is archetypal only when it is an individual value which through natural analogues allows a person to learn about his own self and learn about his individual qualities recorded in the individual structure of psyche which as a result provides a person with a possibility to legalize his own innate qualities

The Body of Myth J. Nigro Sansonese, 1994 Long ago the ancestors of the Greeks Romans and Hindus were one people living on the Eurasian steppes At the core of their religion was the shamanic trance a natural state but one in which consciousness achieves a profound level of inner awareness Over the course of millennia the Indo Europeans divided and migrated into Europe and the Indian subcontinent The knowledge of shamanic trance retreated from everyday awareness and was carried on in the form of myths and distilled into spiritual practices most notably in the Indian tradition of yoga J Nigro Sansonese compares the myths of Greece as well as those of the Judeo Christian tradition with the yogic practices of India and concludes that myths are esoteric descriptions of what occurs within the human body especially the human nervous system during trance In this light the myths provide a detailed map of the shamanic state of consciousness that is our natural heritage This book carries on from the works of Carl Jung and Joseph Campbell to show how the portrayal of consciousness embodied in myth can be extended to a reappraisal of the laws of physics before they are descriptions of the world these laws like myths are descriptions of the human nervous system

Middle Way Philosophy 3: The Integration of Meaning Robert M. Ellis, 2013-12-11 This third volume of the Middle Way Philosophy series applies the revolutionary view taken from cognitive science that meaning is found in our bodies rather than in a relationship between language and reality The cognitive meaning found in dictionaries and the emotive meaning of life cannot be separated This approach reveals the basic error of the metaphysical views that depend on absolute cognitive

meaning It also provides the basis for an account of how we can integrate meaning Each new time we connect an experience to a symbol we extend meaning in a way that gives us more resources to develop more adequate beliefs The practice of integrating meaning can be promoted by the arts meditation and focusing and can also involve working to resolve archetypes Middle Way Philosophy was first developed by Robert M Ellis in a Ph D thesis and he has now founded the Middle Way Society for the development and practice of the Middle Way beyond religious tradition
