The Next Strike:

The New Rank and File Staughton Lynd, Alice Lynd, 2018-08-06 Much has changed for workers in the years since Staughton and Alice Lynd's classic Rank and File Personal Histories by Working Class Organizers was first published in 1973. The New Rank and File presents interviews with working class organizers of the 1970s, 1980s, and 1990s who face the challenges of a new economy with the same determination and creativity shown by those profiled in the earlier book. Reflecting the increasing globalization of labor practices and problems, The New Rank and File contains oral histories of workers in Guatemala, Palestine, Nicaragua, Mexico, and Canada, as well as the United States. In their narratives, rank and file workers from many different industries and workplaces reveal the specific incidents and pervasive injustices that triggered their activism. They discuss the frustrations they faced in attempting to effect change through traditional means and the ways in which they have learned to advocate through innovation. In an incisive introduction, the Lynds set forth their distinctive perspective on the labor movement with a focus on solidarity, unionism, making decisions on the assumption that we all may be leaders at one time or another rather than relying on static hierarchies. Their insights, along with true stories told in the organizers' own words, contain much to inspire a new generation of workers and activists.

Strikes Around the World, 1968-2005, 2007 Are strikes going out of fashion or are they an inevitable feature of working life? This is a longstanding debate. The much proclaimed withering away of the strike in the 1950s was quickly overturned by the resurgence of class conflict in the late 1960s and 1970s. The period since then has been characterized as one of labor quiescence. Commentators again predict the strikes' demise at least in the former heartlands of capitalism. Patterns of employment are constantly changing, and strike activity reflects this. The continuing decline of manufacturing in mature industrialized economies is of major importance here, though the global relocation of manufacturing may lead to some relocation of strikes. Simultaneously, we see the growth of disputes in the service sector, the tertiarization of strikes. This is evident particularly in public services including health care, social care, and education, and is accompanied by a feminization of strikes given the prevalence of women working there. This unique study draws on the experience of fifteen countries around the world: South Africa, Argentina, Canada, Mexico, United States, Korea, Australia, New Zealand, Belgium, Denmark, France, Germany, the Netherlands, Sweden, and the United Kingdom. Covering the high and low points of strike activity over the period 1968-2005, the study shows continuing evidence of the durability, adaptability, and necessity of the strike.
