The Nightmare Of Reason:

The Nightmare of Reason Ernst Pawel, 1992-05 A comprehensive and interpretative biography of Franz Kafka that is both a monumental work of scholarship and a vivid lively evocation of Kafka's world *The nightmare of reason : a life of Franz Kafka* Ernst Pawel, 1984 Depicts the life of the distinguished Austrian author Franz Kafka examines his personality and traces the development of his literary career

The Dark Side of Modernity Jeffrey C. Alexander, 2013-04-25 In this book one of the world's leading social theorists presents a critical alarmed but also nuanced understanding of the post traditional world we inhabit today Jeffrey Alexander writes about modernity as historical time and social condition but also as ideology and utopia The idea of modernity embodies the Enlightenment's noble hopes for progress and rationality but its reality brings great suffering and exposes the destructive impulses that continue to motivate humankind Alexander examines how twentieth century theorists struggled to comprehend the Janus faced character of modernity which looks backward and forward at the same time Weber linked the triumph of worldly asceticism to liberating autonomy but also ruthless domination describing flights from rationalization as systemic and dangerous Simmel pointed to the otherness haunting modernity even as he normalized the stranger Eisenstadt celebrated Axial Age transcendence but acknowledged its increasing capacity for barbarity Parsons heralded American community but ignored modernity's fragmentations Rather than seeking to resolve modernity's contradictions Alexander argues that social theory should accept its Janus faced character It is a dangerous delusion to think that modernity can eliminate evil Civil inclusion and anti civil exclusion are intertwined Alexander enumerates dangerous frictions endemic to modernity but he also suggests new lines of social amelioration and emotional repair

Franz Werfel: The Faith of an Exile Lionel Steiman, 2010-10-30 Franz Werfel was born in Prague in 1890 and died in Beverly Hills in 1945 a popular and artistic success in Europe and America Despite his Jewish birth and upbringing he was attracted to Christianity at any early age and although he never formally converted he celebrated his own vision of it in his entire life's work The originality of that peculiar faith and the response it engendered in Werfel's work as he lived through the horrific end of Jewish life in Europe are treated here Werfel was not a systematic thinker and while his writing contains much that is philosophical and theological his eclecticism and idiosyncrasy render any attempt to trace the specific origins of his thought or its relation to the work of contemporary philosophers and theologians highly problematic Thus this work is neither biography nor intellectual history in the strict sense it goes beyond melding the concerns of both genres into a thoughtful comprehensive portrait of faith at work Of interest to historians of the twentieth century as well as to students of that intriguing zone that lies between faith and art but is neither or both

Rethinking Progress Jeffrey C. Alexander, Piotr Sztompka, 2002-09-11 Rethinking Progress provides a challenging reevaluation of one of the crucial ideas of Western civilization the notion of progress Progress often seems to have become self defeating producing ecological deserts overpopulated cities exhausted resources decaying cultures and widespread feelings of alienation The contributors from all

over the world present their diversified perspectives on the fate of progress

[The Pentecostal Hypothesis](#) Nimi Wariboko, 2020-10-12 The Pentecostal Hypothesis is the capacity to resist conventional wisdom in social actions. On a daily basis Pentecostals deploy or enact this capacity through the use of the formula: "It does not make sense, but it makes spirit" in their decision-making processes. This is an alternate way of knowing that is keyed to a particular interpretative understanding of Jesus Christ as constitutive of and normative for the good decisions relevant to human flourishing. The book offers a critical philosophical analysis of the social ethical implications of this hypothesis intended for private decisions and social actions. This text is ultimately a critique of Pentecostal reason. In this book Wariboko explores the epistemological dimensions of everyday Pentecostal Christology: their interpretation of Jesus's character and nature as epistemology. For Pentecostals, Jesus did not have an epistemology, but the story of his life as a whole is an epistemology. For them, the validity of a truth claim is always informed by the story of Jesus that claims them; the story that gives them the meaning and courage to affirm their decisions without fear of being contradicted by Enlightenment rationalism. What kind of normative sway does this orientation to modernity have over Pentecostals' pattern of thought? This book configures the response to this question with profound insights into the convergence of epistemology and Christology within the impelling matrix of a provocative social ethics. The epistemological in this book is not about the that of knowing, but the how: the performative dimension of knowing, which is affective, emotive, and an embodied practice. The Pentecostal Hypothesis is the capacity to resist conventional wisdom in social actions.

Marx and Hegel on the Dialectic of the Individual and the Social Sevgi Dogan, 2018-08-15 Marx and Hegel on the Dialectic of the Individual and the Social is a detailed investigation of the major works of Hegel and the young Marx with exploring how the concept of the individual is positioned within their ontologies and how this positioning is reflected in their related political views. Instead of contrasting a Marxist understanding of the individual with that of a liberal thinker, Sevgi Dogan chooses to take Hegel's theory of the state as representative of the modern state which Marx criticizes. The decision to be in opposition to Hegel rather than some other liberal thinkers is important for two reasons. First, since Marx has developed many of his early ideas in critical interaction with Hegel, this comparative approach enables the book to present a more thorough and well-grounded exposition of Marx's arguments. Second, since Hegel himself has also criticized

the concepts of liberal ideology in many respects differentiating Marx's arguments from those of Hegel's enables the book to underline how and why Hegel's critique of liberal ideology falls short of actually empowering individuals in the way that Marx's account does The Kentuckian in New York William A. Religious Experience and the Modernist Novel Pericles Lewis, 2010-01-07 Considers the development of modernism in the novel in relation to changing attitudes to religion

Environmental Humanities and the Uncanny Rod Giblett, 2019-04-12 Sigmund Freud's essay *The Uncanny* is celebrating a century since publication. It is arguably his greatest and most fruitful contribution to the study of culture and the environment. *Environmental Humanities and the Uncanny* brings into the open neglected aspects of the uncanny in this famous essay in its centenary year and in the work of those before and after him such as Friedrich Schelling, Walter Benjamin, E. T. A. Hoffmann and Bram Stoker. This book does so by focussing on religion especially at a time and for a world in which some sectors of the monotheisms are in aggressive and sometimes violent contention against those of other monotheisms and even against other sectors within their own monotheism. The chapter on Schelling's uncanny argues that monotheisms come out of polytheism and makes the plea for polytheism central to the whole book. It enables rethinking the relationships between mythology and monotheistic and polytheistic religions in a culturally and politically liberatory and progressive way. Succeeding chapters consider the uncanny cyborg, the uncanny and the fictional, and the uncanny and the Commonwealth, concluding with a chapter on Taoism as a polytheistic religion. Building on the author's previous work in *Environmental Humanities and Theologies* in bringing together theories of religion and the environment, this book will be of great interest to students and scholars of the environmental humanities, ecocultural studies and religion The Kentuckian in New York

, 1834 *The Kentuckian in New York* William Alexander Caruthers, 1834 The Bounds of Reason Emilia Steuerman, 2003-05-20 *The Bounds of Reason* Habermas, Lyotard, Melanie Klein on Rationality is a highly original yet accessible study of the debate between modernity and postmodernity. Emilia Steuerman clearly explains the modernity/postmodernity dispute by examining the problem that has driven the whole debate: whether the use of reason is an emancipatory or enslaving force. Steuerman clearly sets out this debate by critically examining the arguments of two of its key proponents, Jürgen Habermas and Jean-François Lyotard. She clearly explains Habermas's defence of modernity and his attempt to salvage Enlightenment ideas of truth, justice and freedom through the use of reason. She contrasts this with Lyotard's postmodernism and his scepticism about the use of reason and its claims to universalism and objectivity. Throughout, Steuerman contrasts the Habermas/Lyotard debate with important insights from psychoanalytic theory and shows how Habermas's notions of intersubjectivity and a community of shared language users can be compared and contrasted with Melanie Klein's theory of object relations The Philosophy of Stanley Kubrick Jerold Abrams, 2007-05-04 In the course of fifty years, director Stanley Kubrick produced some of the most haunting and indelible images on film. His films

touch on a wide range of topics rife with questions about human life behavior and emotions love and sex war crime madness social conditioning and technology Within this great variety of subject matter Kubrick examines different sides of reality and unifies them into a rich philosophical vision that is similar to existentialism Perhaps more than any other philosophical concept existentialism the belief that philosophical truth has meaning only if it is chosen by the individual has come down from the ivory tower to influence popular culture at large In virtually all of Kubrick s films the protagonist finds himself or herself in opposition to a hard and uncaring world whether the conflict arises in the natural world or in human institutions Kubrick s war films Fear and Desire Paths of Glory Dr Strangelove and Full Metal Jacket examine how humans deal with their worst fears especially the fear of death when facing the absurdity of war Full Metal Jacket portrays a world of physical and moral change with an environment in continual flux in which attempting to impose order can be dangerous The film explores the tragic consequences of an unbending moral code in a constantly changing universe Essays in the volume examine Kubrick s interest in morality and fate revealing a Stoic philosophy at the center of many of his films Several of the contributors find his oeuvre to be characterized by skepticism irony and unfettered hedonism In such films as A Clockwork Orange and 2001 A Space Odyssey Kubrick confronts the notion that we will struggle against our own scientific and technological innovations Kubrick s films about the future posit that an active form of nihilism will allow humans to accept the emptiness of the world and push beyond it to form a free and creative view of humanity Taken together the essays in The Philosophy of Stanley Kubrick are an engaging look at the director s stark vision of a constantly changing moral and physical universe They promise to add depth and complexity to the interpretation of Kubrick s signature films
