The Nuclear Challenge Usruban Strategic Relations After The Cold War:

The Nuclear Challenge Christoph Bluth, 2019-07-16 This title was first published in 2000 Christoph Bluth provides a comprehensive and timely analysis of strategic nuclear arms policy in the United States and Russia and examines the collaborative efforts to reduce nuclear weapons through arms control and render nuclear weapons and fissile materials in Russia secure He concludes that the end of the Cold War has created new and unprecedented dangers and that these dangers require a greater political will and cooperation which have so far been lacking The End of Strategic Stability? Lawrence Rubin, Adam N. Stulberg, 2018-09-03 During the Cold War many believed that the superpowers shared a conception of strategic stability a coexistence where both sides would compete for global influence but would be deterred from using nuclear weapons In actuality both sides understood strategic stability and deterrence quite differently Today s international system is further complicated by more nuclear powers regional rivalries and nonstate actors who punch above their weight but the United States and other nuclear powers still cling to old conceptions of strategic stability The purpose of this book is to unpack and examine how different states in different regions view strategic stability the use or non use of nuclear weapons and whether or not strategic stability is still a prevailing concept The contributors to this volume explore policies of current and potential nuclear powers including the United States Russia China India Iran Israel Pakistan and Saudi Arabia This volume makes an important contribution toward understanding how nuclear weapons will impact the international system in the twenty first century and will be useful to students scholars and practitioners of nuclear weapons policy **Beyond Nuclear Deterrence** Alexei Arbatov, Vladimir Dvorkin, 2011-10-01 For nearly fifty years including the decade and a half since the end of the Cold War deterrence has remained the central nuclear arms control policy between the United States Russia and other principal nuclear powers The question today is Has the concept of deterrence outlived its usefulness In *Beyond Nuclear Deterrence* two of Russia s top nonproliferation and international security experts Alexei Arbatov and Vladimir Dvorkin critically assess the history of deterrence as it emerged between the Soviet Union and the U S and evolved through the Cold War to include an expanding nuclear club The authors argue that while deterrence as a concept has always been paradoxical it is poorly equipped to handle today s most significant nuclear challenges proliferation and terrorism Nuclear arms control must move beyond the deadlock of deterrence The U S and Russia need to take the first bilateral steps to remove mutual nuclear deterrence as the foundation of their strategic relationship and implement changes that can be exported internationally The Nuclear Challenge in Russia and the New States of Eurasia George H. Quester, 1995 First Published in 1996 Routledge is an imprint of Taylor Francis an Informa company Strategic Stability in the Second Nuclear Age Gregory D. Koblentz, 2014-11-01 The world has entered a second nuclear age shaped by rising nuclear states and military technologies Gregory Koblentz argues that the United States should work with the other nuclear armed states to manage threats to nuclear stability in the near term and establish processes for multilateral arms control efforts over the

longer term *After The Cold War* Charles Kegley, 2021-11-28 This is a text on the traditional questions of nuclear deterrence and the unconventional answers suggested by the emerging new world order These widely ranging essays by scholars policymakers and moral philosophers present rival ideas about the morality of alternative means for preserving mutual security as the world moves beyond the Cold War *The United States, Russia and Nuclear Peace* Stephen J. Cimbala, 2020-02-03 This book analyzes the United States and Russia's nuclear arms control and deterrence relationships and how these countries must lead current and prospective efforts to support future nuclear arms control and nonproliferation The second nuclear age following the end of the Cold War and the demise of the Soviet Union poses new challenges with respect to nuclear strategic stability deterrence and nonproliferation The spread of nuclear weapons in Asia and the potential for new nuclear weapons states in the Middle East create new possible axes of conflict potentially stressful to the existing world order Other uncertainties include the interest of major powers in developing a wider spectrum of nuclear weapons and delivery systems possibly for use in limited nuclear wars and the competitive technologies for antimissile defenses being developed and deployed by the United States and Russia Other technology challenges including the implications of cyberwar for nuclear deterrence and crisis management are also considered Political changes also matter The early post Cold War hopes for the emergence of a global pacific security community excluding the possibility of major war have been dashed by political conflict between Russia and NATO by the roiled nature of American domestic politics with respect to international security and by a more assertive and militarily competent China Additionally the study includes suggestions for both analysis and policy in order to prevent the renewed U S Russian nuclear arms race and competition in new technologies This volume would be ideal for graduate students researchers scholars and anyone who is interested in nuclear policy international studies and Russian politics **The Strategic Defense Initiative** Ralph L. Dietl, 2018-08-15 The Nuclear and Space Talks revolutionized arms control The Cold War endgame commenced with the umbrella negotiations that linked START and INF negotiations to a regulation on the weaponization of space This volume reveals a US grand strategy to replace deterrence with a collective security order An entente of the superpowers was needed to transform bipolarity The US planned the replacement of mutually assured destruction by mutually assured security A global astrodome was to protect a nuclear disarmed world The Franco German special relationship in European affairs had to be amended by a US SU special relationship to replace classic bloc politics The Reagan Administration planned a global zero agenda a joint development of a global protective system and a creation of a Common House of Europe In brief the superpowers prepared the velvet revolution that eliminated the Cold War structures Neither containment nor convergence offers a valid explanation of the Cold War endgame Co creation is the key to decipher the end of the Cold War NATO Europe challenged the transformation of bipolarity The European NWS resisted to a multilateralization of strategic arms control In Europe the classic Cold War thinking survived the fall of the Iron Curtain European conservatism contributed to the geopolitical

catastrophe of the first order the downfall of the Soviet Union The Reagan Administration developed a Grand Strategy to end the Cold War The US SU co creation of an astrodome was meant to ease a global zero agenda A global collective security structure under the United Nations was to replace deterrence The superpower project collapsed due to the penetration of US decision making by NATO Allies The European NWS totally objected to a multilateralization of strategic arms control to preserve their relative position in the international system **The New Nuclear Disorder** Stephen J. Cimbala,2015-02-28

In the twenty first century the United States confronts an international system of great complexity and shifting security challenges Among these challenges are those posed by nuclear weapons Instead of becoming obsolete or being marginalized by the end of the Cold War and the demise of the Soviet Union nuclear weapons have become more important to present and future international stability and peace but the relationship is paradoxical On one hand the spread of nuclear weapons to additional states with unsettled grievances or hegemonic ambitions threatens to destabilize local balances of power and set off regional arms races In addition the possible acquisition by terrorists of nuclear weapons or fissile materials creates a threat that may be beyond deterrence according to hitherto accepted concepts On the other hand nuclear weapons in the hands of other states can contribute to stable deterrence and help to prevent nuclear proliferation to international miscreants Certain cases loom large in the short run that highlight this book s relevance including the possible acquisition and deployment of nuclear weapons by Iran and the continuing tensions created by North Korea s nuclear arsenal The Obama pivot of national security and defense emphasis to Asia reflects not only the growing economic importance of that region but also the growing number of security dilemmas in a region that is already awash in nuclear forces The management of nuclear crises and even the possible need to terminate nuclear wars before they expand beyond a single region are among the possible challenges facing future U S and allied policy makers and military leaders **Nuclear Deterrence In**

U.s.-soviet Relations Keith B Payne,1982-04-15 Dr Payne foretager en kritisk undersøgelse af USA s forsøg på at skabe en nuklear afskrækelse over for Sovjet USA bør snarere sætte ind over for sovjets sejrsteori og truede russiske væbnede styrker samt dens inden og udenrigspolitiske kontrolorganer Dilemmas of Nuclear Strategy Roman Kolkowicz,2005-08-31 This volume reflects the research and discussions for the Bellagio Conference with a special emphasis on the distinct perspective introduced by the Europeans on the issues of superpower strategic relations in general and on MAD and SDI in particular Their views are shaped by concerns on how these broader issues might affect their own national security interests

Strategic Stability in the Second Nuclear Age Gregory D. Koblentz,2022 **Taming Armageddon?** Alexei G. Arbatov,Steven E. Miller,1997-04 In this book a group of Russian and American experts assess the changes in the nuclear forces and policies of Moscow and Washington how that nuclear relationship seems to be evolving and what further opportunities remain for reinforcing stability and restraint Topics covered include the evolution of post Cold War nuclear doctrines the implications of and prospects for strategic arms control the role of tactical nuclear weapons the debate over

ballistic missile defenses and the problems related to the disposition of fissile materials

The Nuclear Revolution and the End of the Cold War Godfried van Bentham van den Bergh, 1992-10-13 This book studies the impact of the nuclear revolution on the course of the rivalry between the former USSR and the USA It explains why it has been so different from great power rivalry in prenuclear times in avoiding war and leading first to a co operative relationship and then ending peacefully The book analyses four aspects of the nuclear revolution reciprocal restraint security co operation the deadlock of nuclear strategy including strategic defence and common deterrence

Nuclear Rivalry and International Order Jørn Gjelstad, Olav Njølstad, 1996-04-05 The Cold War may have ended and with it the superpower rivalry but the world still contains many nuclear armed states This wide ranging analysis of the continuing role of nuclear weapons in inter state rivalry shows how they remain a central issue for the future of world peace Determining the role of such weapons is crucial to the prospects for nuclear disarmament and non proliferation The book starts by examining the relevance of nuclear weapons to the long peace between the superpowers during the Cold War Were they a necessary condition for peace Were they irrelevant or only marginally relevant to that peace Can such questions be answered at all Can the record of the past point to a future for nuclear weapons
