History and the Human Condition John Lukacs, 2014-04-08 In a career spanning more than sixty five years John Lukacs has established himself as one of our most accomplished historians Now in the stimulating book *History and the Human Condition* Lukacs offers his profound reflections on the very nature of history the role of the historian the limits of knowledge and more Guiding us on a quest for knowledge Lukacs ranges far and wide over the past two centuries The pursuit takes us from Alexis de Tocqueville to the atomic bomb from American exceptionalism to Nazi expansionism from the closing of the American frontier to the passing of the modern age Lukacs's insights about the past have important implications for the present and future In chronicling the twentieth century decline of liberalism and rise of conservatism for example he forces us to rethink the terms of the liberal versus conservative debate In particular he shows that what passes for conservative in the twenty first century often bears little connection to true conservatism Lukacs concludes by shifting his gaze from the broad currents of history to the world immediately around him His reflections on his home his town his career and his experiences as an immigrant to the United States illuminate deeper truths about America the unique challenges of modernity the sense of displacement and atomization that increasingly characterizes twenty first century life and much more Moving and insightful this closing section focuses on the human in history masterfully displaying how right Lukacs is in his contention that history at its best is personal and participatory *History and the Human Condition* is a fascinating work by one of the finest historians of our time More than that it is perhaps John Lukacs's final word on the great themes that have defined him as a historian and a writer The Publishers' Trade List Annual, 1980 **French News**, 1963 **The World's Greatest Idea** John Farndon, 2010-10-07 Where would humanity be now without fire vaccinations farming or wine A great idea is one that has changed the path of human civilisation But which is the greatest of them all John Farndon author of the bestselling *Do You Think You're Clever* has set out to find the answer A distinguished panel of experts agreed on a list of 50 ideas and each chapter of *The World's Greatest Idea* sees Farndon explore the argument for a different one The candidates are intriguingly varied Electricity grids enable us to power our cities but then sewers allowed those cities to grow Without the wheel modern civilisation would be pretty much impossible but take away Logic and we'd lose the essential structures for rational thought But then what would be the point of all of this without the idea of romance *The World's Greatest Idea* is an enthralling voyage of discovery through the most powerful intellectual social scientific and creative brainwaves humans have ever had They are ranked in the book determined by a public vote on www.theworldsgreatestidea.com But will you agree with the verdict Library of Congress Catalog Library of Congress, 1965 A cumulative list of works represented by Library of Congress printed cards **Catalog of Copyright Entries.
