Rankings and the Reshaping of Higher Education E. Hazelkorn, 2011-03-08 University rankings have gained popularity around the world and are now a significant factor shaping reputation This book is the first comprehensive study of rankings from a global perspective making an important contribution to our understanding of the rankings phenomenon This book has also been published in Japanese *Global Rankings and the Geopolitics of Higher Education* Ellen Hazelkorn, 2016-11-18 Global rankings and the Geopolitics of Higher Education is an examination of the impact and influence that university rankings have had on higher education policy and public opinion in recent years

Bringing together some of the most informed authorities on this very complex issue this edited collection of specially commissioned chapters examines the changes affecting higher education and the implications for society and the economy Split into four interrelated sections this book covers The development of rankings in higher education how they have impacted upon both the production of knowledge and its geography and their influence in shaping policymaking Overviews of the significance of rankings for higher education systems in Europe Asia Africa Russia South America India and North America An analysis of rankings in relation to key concerns that pervade contemporary higher education Examination of the role rankings are likely to play in the future directions for higher education This is a significant scholarly work that analyses in depth an important development in higher education systems and which is likely to have an important influence upon how we understand the higher education policy making process past present and future It provides new analysis and conceptual understanding for researchers and firm evidence for policy makers to use when addressing the value of rankings in measuring the quality of their institutions Besides bringing together a powerful cast of academics this book incorporates contributions from heads of important international higher education organisations from both those involved in making and also in administering key decisions This timely reflective and accessible book forms crucial reading for those studying the subject of rankings as well as the broader implications and unintended consequences of rankings on national higher education policies Extending beyond academic researchers and students this book will also be of significant interest to policymakers higher education leaders and key stakeholders

The Divided States of America Donald F. Kettl, 2022-03-15

As James Madison led America's effort to write its Constitution he made two great inventions the separation of powers and federalism The first is more famous but the second was most essential because without federalism there could have been no United States of America Federalism has always been about setting the balance of power between the federal government and the states and that's revolved around deciding just how much inequality the country was prepared to accept in exchange for making peace among often warring states Through the course of its history the country has moved through a series of phases some of which put more power into the hands of the federal government and some rested more power in the states Sometimes this rebalancing led to armed conflict The Civil War of course almost split the nation permanently apart And sometimes it led to political battles By the end of the 1960s however the country seemed to have settled into a quiet agreement that inequality was a prime national concern that the federal government had the responsibility for addressing it through its own policies and that the states would serve as administrative agents of that policy But as that agreement seemed set federalism drifted from national debate just as the states began using their administrative role to push in very different directions The result has been a rising tide of inequality with the great invention that helped create the nation increasingly driving it apart

The Who, What, and Where of America Shana Hertz Hattis, 2024-05-21

The Who What and Where of America is designed to provide a sampling of key demographic information It covers the United States every state each

metropolitan statistical area and all the counties and cities with a population of 20 000 or more Who Age Race and Ethnicity and Household Structure What Education Employment and Income Where Migration Housing and Transportation Each part is preceded by highlights and ranking tables that show how areas diverge from the national norm These research aids are invaluable for understanding data from the ACS and for highlighting what it tells us about who we are what we do and where we live Each topic is divided into four tables revealing the results of the data collected from different types of geographic areas in the United States generally with populations greater than 20 000 Table A States Table B Counties Table C

Metropolitan Areas Table D Cities **J. Arthur Rank and the British Film Industry** Geoffrey Macnab, 2013-01-11 Presiding over the golden era of the British Film Industry from the mid to late 1940s J Arthur Rank financed movies such as Oliver Twist The Red Shoes Brief Encounter Caesar and Cleopatra and Black Narcissus Never before and never since has the industry risen to such heights J Arthur Rank charts every aspect of the robust film culture that Rank helped to create Having started out with relatively little knowledge of the cinema Rank's sponsorship was to bring about astounding progress within the industry and by establishing an organization comparable in size to any of the major Hollywood studios Rank briefly managed to reconcile and consolidate the competing demands of art and business an achievement very much absent from today's diminished and fragmented film industry Macnab goes on to explain the eventual collapse of the Rank experiment amidst the economic and political maelstrom of post war Britain highlighting the problems still facing the industry today By meshing archival research with interviews with Rank's contemporaries and members of his family this definitive study firmly restores Rank to his rightful place at the hub of British film history **The Impact of Higher Education Ranking**

Systems on Universities Kevin Downing, Petrus Johannes Loock, Sarah Gravett, 2021-04-05 This book written by three generations of rankings academics with considerable experience from three very different regions of the globe lifts the lid on the real impact of higher education ranking systems HERS on universities and their stakeholders It critically analyses the criteria that make up the Big Three global ranking systems and using interviews with senior administrators academics and managers discusses their impact on universities from four very different continents Higher education continues to be dominated by a reputational hierarchy of institutions that sustains and is reinforced by HERS Despite all the opinions and arguments about the legitimacy of the rankings as a construct it seems experts agree that they are here to stay The question therefore seems to be less about whether or not universities should be compared and ranked but the manner in which this is undertaken Delivering a fresh perspective on global rankings this book summarizes the development of HERS and provides a critical evaluation of the effects of HERS on four different major regions South Africa the Arab region South East Asia and Australia It will appeal to any academic student university administrator or governing body interested in or affected by global higher education ranking systems **New Directions of STEM Research and Learning in the World Ranking**

Movement John N. Hawkins, Aki Yamada, Reiko Yamada, W. James Jacob, 2018-11-07 This volume analyzes the dominance of

STEM fields in various university rankings and the reasons why many governments in the world disproportionately give value to STEM fields Secondly although there is general agreement that STEM fields are important chapter authors also examine the role of interdisciplinary and multidisciplinary approaches for a revised STEM education as well as implications for the future The book presents examples from the United States Canada Japan Korea and Taiwan

A Reorganization of the U.S. Automobile Industry Stanley Eugene Boyle,1974

The Transnational Politics of Higher Education Meng-Hsuan Chou,Isaac Kamola,Tamson Pietsch,2016-02-26 This edited volume introduces readers to the relationship between higher education and transnational politics It shows how higher education is a significant arena for regional and international transformation as well as domestic political struggle replete with unequal power relations This volume shows The causes and impacts of recent transformations in higher education within a transnational context Emerging similarities in objectives institutional set ups and approaches taking place within higher education institutions across different world regions The asymmetrical relations between various kinds of institutional commercial and state actors across borders The extent to which historical and colonial legacies are important in the transformation of higher education The potential effects these developments have on the current structure of international political order Drawing on case studies from across the Middle East Asia Africa Latin America and Europe the contributors develop diverse perspectives explaining the impact of transnational politics on higher education and higher education on transnational politics across time and locality This book is among the first multi disciplinary effort to wrestle with the question of how we can understand the political role of higher education and the political force universities exert in the realm of international relations

American Revolution Spencer C. Tucker,2018-09-14 With more than 1 300 cross referenced entries covering every aspect of the American Revolution this definitive scholarly reference covers the causes course and consequences of the war and the political social and military origins of the nation This authoritative and complete encyclopedia covers not only the eight years of the American Revolutionary War 1775 1783 but also the decades leading up to the war beginning with the French and Indian War and the aftermath of the conflict with an emphasis on the early American Republic Volumes one through four contain a series of overview essays on the causes course and consequences of the American Revolution followed by impeccably researched A Z entries that address the full spectrum of political social and military matters that arose from the conflict Each entry is cross referenced to other entries and also lists books for further reading In addition there is a detailed bibliography timeline and glossary A fifth volume is devoted to primary sources each of which is accompanied by an insightful introduction that places the document in its proper historical context The primary sources help readers to understand the myriad motivations behind the American Revolution the diplomatic military and political maneuvering that took place during the conflict and landmark documents that shaped the founding and early development of the United States

The Complexity of Human Rights Philip Alston,2024-02-08 This book provides the first

systematic assessment from a human rights law perspective of the landmark contributions of the renowned legal anthropologist Sally Engle Merry What impact does over simplification have on human rights debates The understandable tendency to present them as a single universal and immutable concept ignores their complexity and by extension only serves to weaken them Merry and her colleagues transformed human rights thinking by highlighting the process of vernacularization which sees rights discourse as being unavoidably dependent upon translation and interpretation She also warned of the pitfalls of excessive reliance upon statistical and other indicators through the process of quantification Here the leading voices in the field assess the significance of these contributions The American Artisan ,1917 The American Mathematical Monthly ,1929 Includes section Recent publications **Questing Excellence in Academia** Knut H. Sørensen, Sharon Traweek, 2022-01-29 Unlike almost most other studies of neoliberal universities and academic capitalism this book ethnographically explores and interprets those transformations and their contradictions empirically in the everyday practices of students faculty members and administrators at two public universities NTNU in Norway and UCLA in California Differently situated in global political economies both are ambitious prosperous campuses The book reflexively examines their disturbing disputes about quality competition and innovation It argues that some academic bureaucratic and corporate university governance practices are both unsustainable and undermining what some university students and faculty already do well circulate interdisciplinary knowledge and its making globally across the diasporic domains of academia society industry and government while addressing the world s immediate challenges power inequities and sustainability It shows the important strategic work of domesticating co morphing and meshworking at the faultlines of emerging knowledge This book is for students faculty society members and policy makers who want to engage more effectively with contemporary universities that increasingly serve as busy crossroads for sharing ideas and how to make them It will be of interest to workers and scholars in the interdisciplinary fields of higher education studies critical university studies and critical public infrastructure studies plus science technology and society studies The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license *Congressional Record* United States.
