Performing Tourist Places Jørgen Ole Bærenholdt,Michael Haldrup,John Urry,2017-07-05 This book looks at the making

and the consuming of places in the contemporary world Illustrated through a case on Denmark it considers the general arguments about the intersections of places performances and peoples It is shown that those who are visitors to a place in part produce that place through their performances Places are intertwined with people through various systems that generate and reproduce performances in and of that place These systems comprise networks of hosts guests buildings objects and machines that contingently realize particular performances of specific places The studies reported here further develop what we might describe as the new mobility paradigm that is developing within the social sciences City Spaces - Tourist Places Bruce Hayllar, Tony Griffin, Deborah Edwards, 2008 City Spaces Tourist Places consolidates develops the extant knowledge of urban tourism precincts into a coherent research driven contemporary work The book revisits examines the foundational literature but more importantly engages with aspects of precinct development that have previously been underdeveloped **Japan in Print** Mary Elizabeth Berry, 2006-02-16 Anyone interested in the history of media and communications should read Beth Berry's extraordinary book Learned lucid and lively it has much to teach students of premodern societies in Europe and elsewhere Anthony Grafton Henry Putnam University Professor of History Princeton University In Japan in Print Mary Elizabeth Berry crisply condenses a remarkable amount of primary research on difficult and little known materials and it interprets those materials in a highly original framework The scholarship is superb and the writing is as masterful as the research Anyone interested in East Asian cultural production will find this compelling reading Karen E Wigen author of The Making of a Japanese Periphery 1750-1920 This is a very important book not only for its insights into a vast body of previously overlooked texts but also for its methodology While historians have known that early modern Japan produced maps for example no one has heretofore compared them to their medieval predecessors or examined them for what they say about an emerging Japanese cartographic imagination This is a highly original work and it will change the field Anne Walthall author of The Weak Body of a Useless Woman Matsuo Taseko and the Meiji Restoration *Japanese Capitals in Historical Perspective* Nicolas Fiévé, Paul Waley, 2003 Japan had one of the most highly urbanised societies in the early modern world Concentrating on Kyoto and Edo Tokyo the contributors to this volume weave together the links between past and future of Japan's great capital cities *Basho and the Dao* Peipei Qiu, 2005-07-31 Although haiku is well known throughout the world few outside Japan are familiar with its precursor haikai comic linked verse Fewer still are aware of the role played by the Chinese Daoist classics in turning haikai into a respected literary art form Bash and the Dao examines the haikai poets adaptation of Daoist classics particularly the Zhuangzi in the seventeenth century and the eventual transformation of haikai from frivolous verse to high poetry The author analyzes haikai's encounter with the Zhuangzi through its intertextual relations with the works of Bash and other major haikai poets and also the nature and characteristics of haikai that sustained the Zhuangzi's relevance to haikai poetic construction She demonstrates how the haikai poets interest in this Daoist work was rooted in the intersection of deconstructing and reconstructing the classical Japanese poetic

tradition Well versed in both Chinese and Japanese scholarship Qiu explores the significance of Daoist ideas in Bashō's and others' conceptions of haikai Her method involves an extensive hermeneutic reading of haikai texts and an in-depth analysis of the connection between Chinese and Japanese poetic terminology and a comparison of Daoist traits in both traditions The result is a penetrating study of key ideas that have been instrumental in defining and rediscovering the poetic essence of haikai verse Bashō and the Dao adds to an increasingly vibrant area of academic inquiry the complex literary and cultural relations between Japan and China in the early modern era Researchers and students of East Asian literature philosophy and cultural criticism will find this book a valuable contribution to cross-cultural literary studies and comparative aesthetics
