Sir James Mackenzie 1853 1925:

Sir James Mackenzie, M.D., 1853-1925 Alex Mair,1986 **Sir James Mackenzie MD** Alex Mair,1986 **A History of Electrocardiography** George Edward Burch,Nicholas P. DePasquale,1990 The Transformation of the Psyche in British Primary Care, 1870-1970 Rhodri Hayward,2014-02-25

Conflicting models of selfhood have become central to debates over modern medicine Yet we still lack a clear historical account of how this psychological sensibility came to be established The Transformation of the Psyche in British Primary Care 1880 1970 will remedy this situation by demonstrating that there is nothing inevitable about the current connection between health identity and personal history It traces the changing conception of the psyche in Britain over the last two centuries and it demonstrates how these changes were rooted in transformed patterns of medical care The shifts from private medicine through to National Insurance and the National Health Service fostered different kinds of relationship between doctor and patient and different understandings of psychological distress The Transformation of the Psyche in British Primary Care 1880 1970 examines these transformations and in so doing provides new critical insights into our modern sense of identity and changing notions of health that will be of great value to anyone interested in the modern history of British medicine

The Journal of Organotherapy ,1924 Healing the Schism Kerr L. White,2012-12-06

My conviction is that the matters addressed in this volume are of transcendental importance if we are to face up to the challenges of the 1990s and beyond How for instance are we to cope with a truly ecological approach to public health and all its concomitant changes of risk groups worldwide unless there is a full appreciation of the population perspective throughout the health establishment The global village has achieved a measure of interdependence requiring recognition by all concerned with the health of both individuals and communities that there is an urgent need to share our knowledge and deploy our resources in the best interests of people everywhere The history of public health initiatives the origins of epidemiology and the tragic separation virtually a divorce of public health from medicine recounted in the chapters that follow argue strongly for an early rapprochement Health professionals who complement each other s knowledge and skills can be reunited through their common reliance on epidemiology as a major fundamental science for the entire health enterprise Henceforth epidemiology should be ranked in importance with cellular and molecular biology immunology and the social and systems sciences all are essential if we are to cope with the vast array of diseases and disorders that face us in both the developed and developing worlds We need more first rate laboratory scientists clinicians nurses aides village health workers and managers committed to serving the public
