MacLeod,2024-10-28 The nineteenth century which saw the triumph of the idea of progress and improvement saw also the triumph of science as a political and cultural force In England as science and its methods claimed privilege and space its language acquired the vocabulary of religion The new creed of science embraced what John Tyndall called the scientific movement it was in the language of T H Huxley a militant creed The march of invention the discoveries of chemistry and the wonders of steam and electricity culminated in a crusade against ignorance and unbelief It was a creed that looked to its own apostolic succession from Copernicus Galileo and the martyrs of the scientific revolution Yet it was a creed whose doctrines were divisive and whose convictions resisted Alongside arguments for materialism utility positivism and evolutionary naturalism persisted reservations about the nature of man the role of ethics and the limits of scientific method These essays discuss leading strategists in the scientific movement of late Victorian England At the same time they show how science established served not only the scientific community but also the interests of imperial and colonial powers      **The Regenerators, 2nd Edition** Ramsay Cook,2016-01-01 A crisis of faith confronted many Canadian Protestants in the late nineteenth century With their religious beliefs challenged by the new biological sciences and historical criticism of the Bible they turned from personal salvation to the dire social problems of the industrial age The Regenerators explores the nature of

social criticism in this era and its complex ties to the religious thinking of the day showing how the path blazed by nineteenth century religious liberals led not to the Kingdom of God on earth but ironically to the secular city The winner of the Governor General s Literary Award for Non Fiction when it was first published in 1985 The Regenerators became an instant classic for its fascinating portraits of evolutionists rationalists spiritualists socialists and free thinkers before the turn of the century This new edition features an introduction by historian and biographer Donald Wright The Creationists Ronald L.
