Feminism and Ecological Communities Christine Cuomo, 2002-09-11 *Feminism and Ecological Communities* presents a bold and passionate rethinking of the ecofeminist movement It is one of the first books to acknowledge the importance of postmodern feminist arguments against ecofeminism whilst persuasively presenting a strong new case for ecological feminism Chris J Cuomo first traces the emergence of ecofeminism from the ecological and feminist movements before clearly discussing the weaknesses of some ecofeminist positions Exploring the dualisms of nature culture and masculinizing feminine that are the bulwark of many contemporary ecofeminist positions and questioning traditional feminist analyses of gender and caring *Feminism and Ecological Communities* asks whether women are essentially closer to nature than men and how we ought to link the oppression of women people of colour and other subjugated groups to the degradation of nature Chris J Cuomo addresses these key issues by drawing on recent work in feminist ethics as well as the work of diverse figures such as Aristotle John Dewey Donna Haraway and Maria Lugones A fascinating feature of the book is the use of the metaphor of the cyborg to highlight the fluidity of the nature culture distinction and how this can enrich

ecofeminist ethics and politics An outstanding new argument for an ecological feminism that links both theory and practice
Feminism and Ecological Communities bravely redraws the ecofeminist map It will be essential reading for all those
interested in gender studies environmental studies and philosophy **Eco-man** Mark Christopher Allister, 2004 Many
canonical literary works look to the wild as the site for establishing a man's selfhood But nature is just as often subjected to
his most violent displays of mastery This tension lies at the heart of *Eco Man* which brings together two rapidly growing
fields men's studies and ecocriticism *The ISLE Reader* Michael P. Branch, Scott Slovic, 2003 This volume gathers nineteen
of the most representative and defining essays from the journal *ISLE* Interdisciplinary Studies in Literature and Environment
over the course of its first ten years Following an introduction that traces the stages of ecocriticism's development *The ISLE*
Reader is organized into three sections each of which reflects one of the general goals the journal has sought to accomplish
The section titled *Re evaluations* provides new readings of familiar environmental writers and new environmental
perspectives on authors or literary traditions not usually considered from a green perspective The writings in *Reaching Out*
to Other Disciplines promote cross pollination among various disciplines and methodologies in the environmental arts and
humanities The writings in the final section *New Theoretical and Practical Paradigms* are especially significant for the
conceptual and methodological terrain they map *The ISLE Reader* documents the state of research in ecocriticism and
related interdisciplinary fields provides a survey of the field and points to new methodologies and possibilities for the future

The Nature of Cities Michael Bennett, David W. Teague, 2021-10-12 Cities are often thought to be separate from nature
but recent trends in ecocriticism demand that we consider them as part of the total environment This new collection of
essays sharpens the focus on the nature of cities by exploring the facets of an urban ecocriticism by reminding city dwellers
of their place in ecosystems and by emphasizing the importance of this connection in understanding urban life and culture
The editors both raised in small towns but now living in major urban areas are especially concerned with the sociopolitical
construction of all environments both natural and manmade Following an opening interview with Andrew Ross exploring the
general parameters of urban ecocriticism they present essays that explore urban nature writing city parks urban wilderness
ecofeminism and the city and urban space The volume includes contributions on topics as wide ranging as the urban poetry
of English writers from Donne to Gay the manufactured wildness of a gambling casino and the marketing of cosmetics to
urban women by idealizing Third World naturalness These essays seek to reconceive nature and its cultural representations
in ways that contribute to understanding the contemporary cityscape They explore the theoretical issues that arise when one
attempts to adopt and adapt an environmental perspective for analyzing urban life *The Nature of Cities* offers the ecological
component often missing from cultural analyses of the city and the urban perspective often lacking in environmental
approaches to contemporary culture By bridging the historical gap between environmentalism cultural studies and urban
experience the book makes a statement of lasting importance to the development of the ecocritical movement **Gale**

A Companion to American Literature Susan Belasco, Theresa Strouth Gaul, Linck Johnson, Michael Soto, 2020-04-03 A comprehensive chronological overview of American literature in three scholarly and authoritative volumes. *A Companion to American Literature* traces the history and development of American literature from its early origins in Native American oral tradition to 21st-century digital literature. This comprehensive three-volume set brings together contributions from a diverse international team of accomplished young scholars and established figures in the field. Contributors explore a broad range of topics in historical, cultural, political, geographic, and technological contexts, engaging the work of both well-known and non-canonical writers of every period. Volume One is an inclusive and geographically expansive examination of early American literature, applying a range of cultural and historical approaches and theoretical models to a dramatically expanded canon of texts. Volume Two covers American literature between 1820 and 1914, focusing on the development of print culture and the literary marketplace, the emergence of various literary movements, and the impact of social and historical events on writers and writings of the period. Spanning the 20th and early 21st centuries, Volume Three studies traditional areas of American literature as well as the literature from previously marginalized groups and contemporary writers often overlooked by scholars. This inclusive and comprehensive study of American literature examines the influences of race, ethnicity, gender, class, and disability on American literature. It discusses the role of technology in book production and circulation, the rise of literacy, and changing reading practices and literary forms. It explores a wide range of writings in multiple genres, including novels, short stories, dramas, and a variety of poetic forms, as well as autobiographies, essays, lectures, diaries, journals, letters, sermons, histories, and graphic narratives. It provides a thematic index that groups chapters by contexts and illustrates their links across different traditional chronological boundaries. *A Companion to American Literature* is a valuable resource for students coming to the subject for the first time or preparing for field examinations, instructors in American literature courses, and scholars with more specialized interests in specific authors, genres, movements, or periods.

Women, the Environment and Sustainable Development Rosi Braidotti, International Research and Training Institute for the Advancement of Women, 1994 There is a widespread perception that the development process is in a state of multiple crisis. While the notion of sustainable development is supposed to address adequately its environmental dimensions, there is still no agreed framework relating women to this new perspective. This book is an attempt to present and disentangle the various positions put forward by major actors and to clarify the political and theoretical issues that are at stake in the debates on women, the environment, and sustainable development. Among the current critiques of the western model of development, which the authors review, are the feminist analysis of Science itself and the power relations.

inherent in the production of knowledge Women Environment and Development WED Alternative Development Environmental Reformism and Deep Ecology Social Ecology and Ecofeminism In traversing this important landscape of ideas they show how they criticise the dominant developmental model at the various levels of epistemology theory and policy The authors also go further and put forward their own ideas as to the basic elements they consider necessary in constructing a paradigmatic shift emphasising such values as holism mutuality justice autonomy self reliance sustainability and peace This unique work is a signally useful contribution to clarifying thinking on a topic with immense implications for all women

Publisher s description **Feminism and the Biological Body** Lynda Birke,2019-06-01 Biological bodies always seem to drop out of debates about the body and its importance in western culture They are assumed to be fixed their workings irrelevant to theory This text argues that these views of biology do not serve feminist politics well **A to Z of American**
