cultural anthropology for its models of how we think In this exciting new book anthropologist Bradd Shore has created the first study linking multi culturalism to cognitive psychology exploring the complex relationship between culture in public institutions and in mental representations In so doing he answers in a completely new way the age old question of whether humans are basically the same psychologically independent of cultures or basically diverse because of cultural differences The first half of the book emphasizes cultural models from Australian Aboriginal rituals and Samoan comedy skits to more familiar terrain including a study of baseball as a cultural model for Americans Along the way the author sheds new and novel light on many familiar institutions from educational curricula and shopping malls to modular furniture and cyberpunk fiction These observations are then linked to theoretical developments in linguistics semiotics and neuroscience creating a bold new approach to understanding the role of culture in everyday meaning making The author argues that culture must be considered an intrinsic component of the human mind to a degree that most psychologists and even many anthropologists have not recognized This new position of cultural models will make absorbing reading for psychologists anthropologists linguists and philosophers and to anyone interested in the issues of cultural diversity multiculturalism or cognitive science in general

Feldhaus,2003-12-18 This book examines the words and actions of people who live in regions in the state of Maharashtra in Western India to illustrate the idea that regions are not only created by humans but given meaning through religious practices By exploring the people living in the area of Maharashtra Feldhaus draws some very interesting conclusions about how people differentiate one region from others and how we use stories rituals and ceremonies to recreate their importance Feldhaus discovers that religious meanings attached to regions do not necessarily have a political teleology According to Feldhaus There is also a chance even now that religious imagery can enrich the lives of individuals and small communities without engendering bloodshed and hatred

Bound by Tradition Salha Al Shaibani,2025-03-21 These are not stories of fiction but echoes of real lives the lives of my family spanning generations Their experiences passed down through whispered memories shaped not only those who lived them but also those who came after Through their tales I pieced

together the intricate mosaic of my family history These vivid images and the emotions they evoked helped forge the person I am today The events recounted here will I hope intrigue and perhaps even shock you My culture steeped in traditions vastly different from those of the West may seem puzzling or even brutal to some The mindsets of certain characters may appear utterly foreign to Western readers but I trust that the explanations of our customs will shed light on their motivations Names have been changed to protect the privacy of my elders May these stories provoke thought and spark a deeper understanding of a world far removed from your own
