

WHAT ARE CLONES?

When you hear the word *clone*, it probably makes you think of something less than human, right? Don't worry. It's not your fault. Thanks to years of misinformation promoted by the Empire, you're hardly the only person who feels that way about us. The Empire may have viewed us as nothing more than military equipment, but the truth is, clones are just as real as any other organic being. We live and breathe, just like you. We were just created in a slightly different way.

Most human life starts with a combination of genetic material from two sources—usually, a mother and a father. The process allows for countless variations, ensuring every natural-born being is unique. Cloning relies on a single genetic template from one controlled source, removing any potential for deviation. The result is a near-perfect physical copy of the original being (well, most of the time).

One of the glaring differences between clones and normal humans is how we are born. In order to create an adequate army in a timely manner, clones like me had to be produced by the thousands. That meant we weren't born in the same way most humans are. Instead, we were all grown side by side within our own cloning pods. An operation of that scale was possible on only one planet: Kamino.

KAMINO

Located in the far-flung reaches of the galaxy, this water-covered world was home to a race of brilliant scientists. The Kaminoans were the galaxy's foremost experts in cloning long before they were ever conscripted to build an army for the Republic. But when that order came, they put their skills to the test like never before.

My siblings and I were born here on Kamino, in the state-of-the-art cloning facilities of Tipoca City. As soon as our batch of clones was out of the pods, the Kaminoans started growing us, part of a seemingly endless production cycle. Kamino wasn't just where we were created, though. It's also where we lived during our formative years and where we were trained into a fighting force unlike any the galaxy had seen before. Just peacekeepers and the Republic's clone troopers. Although the alien forces seemed close to claiming victory against the invading droid armies, any chance for collaboration was quickly extinguished by an unexpected betrayal.

GENETIC MODIFICATIONS

It's important to mention that we clones have another key difference from regular humans—one you probably could have guessed just by taking a look at this worried mug of mine. We were designed to age at an accelerated rate. After all, when a battle is looming on the horizon, no one wants to wait twenty years for a custom ordered army to reach maturity. So why not artificially speed up the aging process and wait half that time instead? Of course, while accelerating our physical development may have been a brilliant way to get a clone army into action earlier, no one really considered the effects that advanced aging might have on us once the war was over. I'm long proof that time hasn't exactly been kind to us.

Our aging wasn't the only thing that the Kaminoans adjusted. They also tweaked our core personalities, making us more subservient than the man who served

as our genetic template (more on him later). They achieved this by implanting a behavioral modification chip into our brains that was supposedly designed to keep us from falling out of line. But we would eventually learn the hard way that these inhibitors were more than just a means of adjusting our attitude. They were secretly a way for them to command to force clone soldiers into committing unspeakable acts against our will. I can tell you without a doubt that getting that blasted chip out of my head was probably the best thing that ever happened to me. Thanks that so many of my kin weren't as lucky.

Slightly less intrusive in design, every clone also had an identifying code implanted in their left wrist. Scanning it provided access to our official number, rank, and military record. This made things easier for the folks who couldn't tell us apart—and for those who couldn't be bothered to try.
