**Biological Affinity in Forensic Identification of Human Skeletal Remains** Gregory E. Berg, Sabrina C Ta'ala, 2014-12-13 Ancestry determination in the identification of unknown remains can be a challenge for forensic scientists and anthropologists especially when the remains available for testing are limited There are various techniques for the assessment of ancestry ranging from traditional to new microbiological and computer assisted methods

**Biological Affinity Forensic Anthropology** C. Clifford Boyd, Jr., Donna C. Boyd, 2018-03-19 Provides comprehensive coverage of everything that students and practitioners need to know about working in the field of forensic anthropology Forensic anthropology has been plagued by questions of scientific validity and rigor despite its acceptance as a section in the American Academy of Forensic Sciences nearly half a century ago Critics have viewed it as a laboratory based applied subfield of biological anthropology and characterised it as emphasising methodology over theory This book shows that these views are not only antiquated but inadequate and inaccurate Forensic Anthropology Theoretical Framework and Scientific Basis introduces readers to all of the theoretical and scientific foundations of forensic anthropology beginning with how it was influenced by the early theoretical approaches of Tyler Morgan Spencer and Darwin It instructs on how modern forensic science relies on an interdisciplinary approach with research being conducted in the fields of archaeology physics geology and other disciplines This modern approach to theory in forensic anthropology is presented through the introduction and discussion of Foundational Interpretive and Methodological theories Sections cover Bias and Objectivity in Forensic Anthropology Theory and Practice The Theory and Science Behind Biological Profile and Personal Identification Scientific Foundation for Interpretations of Antemortem Perimortem and Postmortem Processes and Interdisciplinary Influences Legal Ramifications and Future Directions Illustrates important aspects of the theory building process and reflects methods for strengthening the scientific framework of forensic anthropology as a discipline Inspired by the Application of Theory to Forensic Anthropology symposium presented at the 67th annual meeting of the American Academy of Forensic Sciences Chapters written by experts in the field who were presenters at the symposium Forensic Anthropology Theoretical Framework and Scientific Basis is ideal for university courses in anthropological science forensic science criminal science and forensic archaeology

**Forensic Anthropology** Christopher M. Stojanowski and Andrew C. Seidel, Andrew C. Seidel, 2023-05-09 Designed to support introductory

undergraduate courses in forensic anthropology this versatile laboratory manual provides basic training in relevant methods of biological profile estimation and trauma assessment for use in medico legal contexts *Osteometric Assessment of 20th Century Skeletons from Thailand and Hong Kong* Christopher A. King, 1997-10 Cranial and postcranial research on East and Southeast Asians has shown population variability between and within these two regions Moreover as populations vary by sex sex differences vary by population The purpose of this study is to provide the first descriptive and comparative analysis of two recently curated samples of complete documented contemporary skeletons from Thailand N 104 and Hong Kong N 94 that have not been previously studied Sex differences reveal Hong Kong males and females as larger but less dimorphic than Thais Stepwise discriminant function analysis of the Thai humerus and femur allowed 94% 96% sex classification accuracy In conclusion this research has increased our knowledge of sex and population differences in Asia and has important applications to demographic and medicolegal investigations New Perspectives in Forensic Human Skeletal Identification Krista E. Latham, Eric J. Bartelink, Michael Finnegan, 2017-07-27 New Perspectives in Forensic Human Skeletal Identification provides a comprehensive and up to date perspective on human identification methods in forensic anthropology Divided into four distinct sections the chapters will reflect recent advances in human skeletal identification including statistical and morphometric methods for assessing the biological profile sex age ancestry stature biochemical methods of identification DNA analysis stable isotope analysis bomb curve analysis and use of comparative radiography The final section of this book highlights advances in human identification techniques that are being applied to international populations and disaster victims The contributing authors represent established experts in forensic anthropology and closely related fields New Perspectives in Forensic Human Skeletal Identification will be an essential resource for researchers practitioners and advanced students interested in state of the art methods for human identification A comprehensive and up to date volume on human identification methods in forensic anthropology Focuses on recent advances such as statistical and morphometric methods for assessing the biological profile biochemical methods of identification and use of comparative radiography Includes an entire section on human identification techniques being applied to international populations and disaster victims
