Skeptics And True Believers The Exhilarating Connection Between Science And Spirituality

Keith Mascord

Skeptics And True Believers The Exhilarating Connection Between Science And Spirituality:

Skeptics and True Believers Chet Raymo, 1999-04-01 A noted science writer argues passionately and persuasively that science and religion are mutually reinforcing ways of experiencing the world and that words such as God grace sacred and spirituality can retain currency in an age of science once they have been stripped of their archaic meanings

Skeptics and True Believers : the Exhilarating Connection Between Science and Religion Chet Raymo, 1998 Science has proved a spectacularly successful way of knowing the world Yet many people reject one of its basic points we are ephemeral parts of a silent universe that is vastly larger than ourselves Although Chet Raymo disapproves of fundamentalist and New Age beliefs and is skeptical of traditional religion he argues that science and religion can be mutually reinforcing ways of experiencing the world In his view words like God grace soul and sacrament can retain currency in an age of science Using dynamic and thought provoking stories a hilarious episode of alien abduction that didn't happen or a walk on fire Raymo argues that science should be embraced by religion instead of distrusted He also shows that the wondrous universe revealed by science can hardly fail to excite religious feeling There are no miracles but one he writes the miracle of the creation itself which is the primordial source of all religious feeling

Skeptics and True Believers Chet Raymo, 2009-05-26 Years ago noted science teacher and writer Chet Raymo embarked upon his own quest to reconcile the miracle stories he learned as a child with the science he learned as an adult *Skeptics and True Believers* is the culmination of that search a passionate ever inquisitive statement that science and religion can mutually reinforce the way we experience the world Acknowledging that the scientific and the spiritual communities are increasingly split Raymo builds strong bridges between them He illustrates his argument with an array of thought provoking stories such as the remarkable migratory flight of a small bird called the red knot the long glorious glide of the Comet Hyakutake across the night sky a hilarious alien abduction that didn't happen Together they are compelling evidence that religion should embrace the reliable knowledge of the world that science provides while at the same time science should respect and nourish humankind's need for spiritual sustenance Miracles are explainable Raymo paraphrases the writer Tim Robinson it is the explanations that are miraculous For anyone drawn to reflect on life's meaning and purpose Chet Raymo's uncompromising skepticism and reverence for mystery will affirm and inspire

Skeptics and True Believers Chet Raymo, 1998 A passionate inquisitive statement that science and religion can mutually reinforce the way we experience the world

Toward a Theology of Scientific Endeavour Professor Christopher B Kaiser, 2013-05-28 Foundations of science are specific conditions of the cosmos of human intelligence of cultural beliefs and of technological structures that make the pursuit of modern science possible Each of the four foundations of scientific endeavour can be studied as a topic on its own The concurrent study of all four together reveals several tensions and interconnections among them that point the way to a greater unification of faith and science This book explores four foundations of scientific endeavour and investigates some of the paradoxes each of them raises Kaiser shows that the

resolution of these paradoxes inevitably leads us into theological discourse and raises new challenges for theological endeavour In order to address these challenges Kaiser draws on the wider resources of the Judeo Christian tradition and argues for a refocusing of contemporary theology from the perspective of natural science

For the Rock Record Jill S. Schneiderman,Warren D. Allmon,2009-04-06 Creationism began with the fossil record and there it shall end Before Darwin the geological strata with their accompanying fossils formed the first geological theory of life on earth creationism coupled to flood geology It was Darwin who stood that theory on its head and showed that in fact these same fossils could be used to support his new theory of evolution by natural selection Ever since Darwin geology has unequivocally supported evolution and not creationism and yet today Intelligent Design thrives in popular culture Here at last we have a definitive collection of world class geologists and paleontologists who systematically demonstrate precisely why geology destroys all design arguments and reveals instead a deep and rich history of life on earth A perfect companion to all science courses Michael Shermer publisher of Skeptic magazine and author of Why Darwin Matters An excellent contribution on a vital issue which concerns not only geologists but all who value any science Mark Isaak author of The Counter Creationism

Handbook Off the Hook Earl Wayne Heflinger, 2018-03-15 The author uses his own personal story of being born into a Christian fundamentalist family with extreme beliefs to paint a vivid picture of what life is like in toxic ideologies such as fundamentalist religion. The book has three parts. The first describes the spiritual abuse of his childhood due to stifling rules and restrictions inflicted by his parents caught up in their church's teachings on his thought processes and behavior. The remarkably poignant stories show in painful detail how his self-esteem was crushed, how he was never intended to think for himself, and how he was made to feel different and totally out of place in the world all by loving but misguided parents. During his school days, his social life was severely stunted because he felt like an outsider everywhere but in church. The second part discusses his lifelong struggle with spiritual healing and his transition from a spoon-fed belief system to a personally chosen worldview. He thoughtfully muses about all the significant elements of religious/spiritual belief systems: God, Jesus, the Bible, sin, morality, science, life after death, marriage, divorce, and others, and contrasts his evolving beliefs with those of organized religion. This is presented to give the reader a comprehensive illustration of how one particular seeker has constructed a personalized belief system through continual rethinking and updated understanding. The third part calls on the author's advanced education and professional experience in business and government in analyzing and developing systems and procedures. It describes with a wealth of tips and checklists the process by which he escaped a toxic ideology and came to feel intellectually free and off the hook. It ends with heartfelt encouragement for anyone similarly affected by repression to accept all available helpful resources and muster the determination to claim their personal power.

Unsettling Science and Religion Whitney Bauman, Lisa Stenmark, 2018-05-24 This book borrows from the intellectual labor of queer theory in order to unsettle or queer the discourses of religion and science and by extension the science and religion discourse. Drawing intellectual and social cues from works by influential theorists such as Michel Foucault, Judith Butler, and Eve Sedgwick, chapters in this volume converge on at least three common features of queer theory. First, queer theory challenges given that on occasion still undergirds religiously and scientifically informed ways of thinking. Second, it takes embodiment seriously. Third, this engagement inevitably generates new pathways for thinking about how religious and scientific truths matter. These three features ultimately lend support to critical investigations into the meanings of science and religion and the relationships between the two.

Thinking God Owen F. Cummings, Andrew C. Cummings, 2011-09-22 The last decade or so has seen many books from what might be called the new atheists. One thinks, for example, of Richard Dawkins or Christopher Hitchens. They have captured the interest of the general reading public and have sold well. Often, however, they have loaded the dice against Christian belief in a most unfair fashion. Arguments and issues have been summarily dismissed after the most cursory of treatments. *Thinking God*, written by a philosopher and a theologian, father and son, invites the reader to a more reflective consideration of the issues around God and the traditional fabric of Christian belief in a fair and openhanded fashion. Issues both traditional and more contemporary have been engaged. The result is an invitation to think of Christian

faith seriously reflectively and critically

Species of Origins Karl Giberson,Donald A. Yerxa,2002 In Species of Origins Karl W Giberson and Donald A Yerxa examine America s controversial conversation about creation and evolution While noting that part of the discord stems from the growing cultural and religious diversity of the United States they argue powerfully that the real issue is the headlong confrontation between two seemingly incompatible worldviews upon which millions of Americans rely modern naturalistic science and traditional Judeo Christian religions Visit our website for sample chapters

Theological Incorrectness Jason Slone,2007-12-03 Why do religious people believe what they shouldn t not what others think they shouldn t believe but things that don t accord with their own avowed religious beliefs D Jason Slone terms this phenomenon theological incorrectness He argues that it exists because the mind is built in such a way that it s natural for us to think divergent thoughts simultaneously Human minds are great at coming up with innovative ideas that help them make sense of the world he says but those ideas do not always jibe with official religious beliefs From this fact we derive the important lesson that what we learn from our environment religious ideas for example does not necessarily cause us to behave in ways consistent with that knowledge Slone presents the latest discoveries from the cognitive science of religion and shows how they help us to understand exactly why it is that religious people do and think things that they shouldn t

Theological Incorrectness : Why Religious People Believe What They Shouldn't D. Jason Slone Assistant Professor of Religious Studies University of Findlay,2004-01-30 Ask two religious people one question and you ll get three answers Why do religious people believe what they shouldn t not what others think they shouldn t believe but things that don t accord with their own avowed religious beliefs This engaging book explores this puzzling feature of human behavior D Jason Slone terms this phenomenon theological incorrectness He demonstrates that it exists because the mind is built it such a way that it s natural for us to think divergent thoughts simultaneously Human minds are great at coming up with innovative ideas that help them make sense of the world he says but those ideas do not always jibe with official religious beliefs From this fact we derive the important lesson that what we learn from our environment religious ideas for example does not necessarily cause us to behave in ways consistent with that knowledge Slone presents the latest discoveries from the cognitive science of religion and shows how they help us to understand exactly why it is that religious people do and think things that they shouldn t He then applies these insights to three case studies First he looks at why Theravada Buddhists profess that Buddha was just a man but actually worship him as a god Then he explores why the early Puritan Calvinists who believed in predestination acted instead as if humans had free will by for example conducting witch hunts and seeking converts Finally he explains why

both Christians and Buddhists believe in luck even though the doctrines of Divine Providence and karma suggest there's no such thing. In seeking answers to profound questions about why people behave the way they do, this fascinating book sheds new light on the workings of the human mind and on the complex relationship between cognition and culture.
