Native American Literature: A Very Short Introduction Sean Teuton, 2017-12-20 North American indigenous literature began over thirty thousand years ago when indigenous people began telling stories of emergence and creation journey and quest and heroism and trickery By setting indigenous literature in historical moments Sean Teuton skillfully traces its evolution from the ancient role of bringing rain and healing the body to its later purpose in resisting European invasion and colonization into its current place as a world literature that confronts dominance while celebrating

the imagination and resilience of indigenous lives By the time Europeans arrived in North America indigenous people already understood the power of written language and the need to transmit philosophy history and literature across generations and peoples Seeking out multiple literary forms such as sermon poetry and novel to serve differing worldviews indigenous authors have shaped their writing into North American indigenous literature as we recognize it today In this lucid narrative Sean Teuton leads readers into indigenous worlds He describes the invention of a written indigenous language the first indigenous language newspaper and the literary occupation of Alcatraz Island Along the way readers encounter the diversity of indigenous peoples who owing to their differing lands livelihoods and customs molded literature to a nation s specific needs As Teuton shows indigenous literature is one of the best places for understanding indigenous views about land and society and the role of humanity in the cosmos In turning to celebrated contemporary authors such as Thomas King Leslie Silko Sherman Alexie Louise Erdrich and James Welch Teuton demonstrates that like indigenous people indigenous literature continues to survive because it adapts both honoring the past and reaching for the future

Indigenous Intergenerational Resilience Lewis Williams, 2021-11-04 This book argues that there is a need to develop greater indigenous led intergenerational resilience in order to meet the challenges posed by contemporary crises of climate change cultural clashes and adversity In today s media the climate crisis is kept largely separate and distinct from the violent cultural clashes unfolding on the grounds of religion and migration but each is similarly symptomatic of the erasure of the human connection to place and the accompanying tensions between generations and cultures This book argues that both

forms of crisis are intimately related under scored and driven by the structures of white supremacy which at their most immediate and visible manifest as the discipline of black bodies and at more fundamental and far reaching proportions are about the power privilege and patterns of thinking associated with but no longer exclusive to white people In the face of such crisis it is essential to bring the experience and wisdom of Elders and traditional knowledge keepers together with the contemporary realities and vision of youth This book s inclusive and critical perspective on Indigenous led intergenerational resilience will be valuable to Indigenous and non Indigenous interdisciplinary scholars working on human ecological resilience
