*Pan American World Airways* Laura J. Hoffman with retired Pan Am Captain Duyane A. **Absent Aviators** Donna Bridges,Jane Neal-Smith,Albert Mills,2016-03-16 The objective of this book is to present a number of related chapters on the subject of gender issues in the workplace of the aviation industry More specifically the chapters address the continuing shortfall in the number of women pilots in both civilian and military aviation Considerable research has been carried out on gender issues in the workplace and for example women represent about 10% of employees

in engineering This example is often used to show that the consequences of gender discrimination are embedded and difficult to overcome in masculine dominated occupations However women represent only 5 6% of the profession of pilot Clearly there are many factors which mitigate women seeking to become pilots The chapters within this volume raise both theoretical and practical issues endeavouring to address the imbalance of women pilots in this occupation Absent Aviators consolidates a diverse range of issues from a number of authors from Australia Austria the United States Canada South Africa and the United Kingdom Each of the chapters is research based and aims to present a broad picture of gender issues in aviation gendered workplaces and sociology underpinned by sound theoretical perspectives and methodologies One chapter additionally raises issues on the historical exclusion of race from an airline The book will prove to be a valuable contribution to the debates on women in masculine oriented occupations and a practical guide for the aviation industry to help overcome the looming shortfall of pilots It is also hoped it will directly encourage young women to identify and overcome the barriers to becoming a civilian or military pilot

*Deadly Turbulence* Steve Pollock, 2014-03-27 Jet airliner operations in the United States began in 1958 bringing it was thought a new era of fast high safe smooth sophisticated travel But almost immediately the new aircraft were involved in incidents and accidents that showed jets created new problems even as they solved old ones This book discusses five disasters or near disasters of the early Jet Age experiences which shook the industry regulators and public out of early complacency and helped build a more realistic foundation for safer air transportation Special attention is paid to the 1966 destruction of Braniff International Airways Flight 250 in Nebraska Nearly two years of inquiry helped advance the understanding of jet operations in severe weather and saw the first use of cockpit voice recorder technology in an aviation accident investigation In addition a University of Chicago professor Dr Tetsuya Ted Fujita conducted a more intensive investigation of the weather system which downed Flight 250 Dr Fujita s already extensive knowledge of thunderstorms and tornadoes led to his creation of the Fujita Scale of Tornado Intensity the F scale that we hear about so frequently during storm season

*Hunting the Wind* Teresa Webber, Jamie Dodson, 2018-09-28 Take your seats and by all means fasten your seat belts Come on a journey back in time to aviation s most daring and innovative era Travel back nine decades when for the first time airplanes determined the victors of global wars a time that altered the course of the world Hear never before told true stories penned by still living flight crew members and passengers Learn about the remarkable men women and aircraft builders who launched an aviation phenomenon Thrill to the romance adventure and danger air travelers encountered flying to far flung exotic lands Marvel at art deco air terminals the world s only flying boat museum and onboard luxuries rivaling five star hotels Like mythical Camelot it was a brief shining moment But this was no myth It was an extraordinary point in global history when Pan American s quintessentially magnificent flying boats ruled the skies

**The Twilight Warriors** Robert Gandt, 2011-11-08 Winner of the 2011 Samuel Eliot Morison Award for Naval Literature The Twilight Warriors is the engrossing page turning saga of a tightly knit band of naval aviators who are thrust into the final and most brutal battle of the Pacific war during World War II Okinawa April 1945 The end of World War II finally appears to be nearing The Third Reich is collapsing in Europe and the Americans are overpowering the once mighty Japanese Empire in the Pacific For a group of young pilots trained in the twilight of the war their greatest worry is that it will end before they have a

chance to face the enemy They call themselves Tail End Charlies They fly at the tail end of formations stand at the tail end of chow lines and now they are catching the tail end of the war What they don't know is that they will be key players in the bloodiest and most difficult of naval battles not only of World War II but in all of American history The Twilight Warriors relives the drama of the world's last great naval campaign From the cockpit of a Corsair fighter we gaze down at the Japanese task force racing to destroy the American amphibious force at Okinawa Through the eyes of the men on the destroyers assigned to picket ship duty we experience the terror as wave after wave of kamikazes crash into their ships Standing on the deck of the legendary superbattleship Yamato we watch Japan's last hope for victory die in a tableau of gunfire and explosions The fate of the Americans at Okinawa including a twenty-two year old former art student an intrepid fighter pilot whose life abruptly changes when his Corsair goes down off the enemy shore and a young Texan lieutenant who volunteers for the most dangerous flying job in the fleet intercepting kamikazes at night over the blackened Pacific is intertwined with the lives of the young gods the honor bound kamikaze forces who swarm like killer bees toward the U.S. ships The ferocity of the Okinawa fighting stuns the world Before it ends the long battle will cost more American lives ships and aircraft than any naval engagement in U.S. history More than simply the account of a historic battle The Twilight Warriors brings to life the human side of an epic conflict It is the story of young Americans at war in the air and on the sea and of their enigmatic fanatically courageous enemy

#### **Low-Cost Carriers in Emerging Countries** John

Bowen, 2019-02-14 Low Cost Airline Carriers in Emerging Countries traces the development of low cost carriers LCCs in Asia Latin America the Middle East and Africa examining airlines that have become significant players in their home markets but little known at a global scale The book maps the geography of the LCC phenomenon explaining the starkly varying success of budget airlines and assessing their current social economic and environmental impacts The book concludes with insights into the future potential of the LCC phenomenon along with its global ramifications Beginning with Southwest Airlines in the 1970s low cost carriers LCCs have democratized air travel around the world fostering huge increases in airline traffic and transforming the airline industry At the same time however the ascent of these budget airlines has exacerbated aviation related problems such as aircraft noise airport congestion greenhouse gas emissions and more LCCs have been extensively studied in the US and Europe but not in emerging regions of the globe Yet the impact of such airlines is greatest in low and middle income economies where only a small fraction of the population has ever flown and where competition from alternative modes road rail is weak

**Jet Age** Sam Howe Verhovek, 2011-08-02 The captivating story of the titans engineers and pilots who raced to design a safe and lucrative passenger jet In Jet Age journalist Sam Howe Verhovek explores the advent of the first generation of jet airliners and the people who designed built and flew them The path to jet travel was triumphal and amazingly rapid less than fifty years after the Wright Brothers first flight at Kitty Hawk Great Britain led the world with the first commercial jet plane service Yet the pioneering British Comet was cursed with a tragic mysterious flaw and an upstart Seattle company put a new competitor in the sky the Boeing 707 Jet Stratoliner Jet Age vividly recreates the race between two nations two global airlines and two rival teams of brilliant engineers for bragging rights to the first jet service across the Atlantic Ocean in 1958 At the center of this story are great minds and courageous souls including Sir Geoffrey de Havilland who spearheaded the development of the Comet even as two of his sons lost their lives flying earlier models of his aircraft Sir Arnold Hall the brilliant British aerodynamicist tasked with uncovering the Comet's fatal flaw Bill Allen Boeing's deceptively mild mannered president and Alvin Tex Johnston Boeing's swashbuckling but supremely skilled test pilot The extraordinary airplanes themselves emerge as characters in the drama As the Comet and the Boeing 707 go head to head flying twice as fast and high as the propeller planes that preceded them the book captures the electrifying spirit of an era the Jet Age In the spirit of Stephen Ambrose's Nothing Like It in the World Verhovek's Jet Age offers a gorgeous rendering of an exciting age and fascinating technology that permanently changed our conception of distance and time of a triumph of engineering and design and of a company that took a huge gamble and won

**A Sociology of Commercial Flight Crew** Bennett Simon, 2016-12-05 There are numerous psychological studies of pilots and piloting but little has been done in the way of sociological examination Commercial aviation is one of the world's biggest industries yet there are few studies of pilots as social beings and of their place of work the flight deck Developing a sociological understanding of front line staff and of pilots working environments is

an important step to developing a more detailed understanding of this increasingly important sector This book performs such a function and also adds to our understanding of pilots in general from those who work for flag carriers to those who fly for regional or corporate jet operators The readership includes the general public industry legislators regulators managements employees trainers journalists academics and students of sociology psychology organisation theory and business management
