Gaither, Alma E. Cavazos-Gaither, 2008-01-08 Scientists and other keen observers of the natural world sometimes make or write a statement pertaining to scientific activity that is destined to live on beyond the brief period of time for which it was intended This book serves as a collection of these statements from great philosophers and thought influencers of science past and present It allows the reader quickly to find relevant quotations or citations Organized thematically and indexed alphabetically by author this work makes readily available an unprecedented collection of approximately 18 000 quotations related to a broad range of scientific topics

Dinosaurs David E. Fastovsky, David B. Weishampel, 2021-07 Fully updated and beautifully illustrated this leading textbook teaches science and non science majors to think like a scientist *Short-Short Stories* Alan M. Cavanaugh, 2010-05 *Short Short Stories for Readers Short of Time* is a compilation of 61 ultra short stories two pages or less in length These are in marked contrast to regular short stories that average 12 to 16 pages and may extend to a whopping 30 to 40 pages If you're like the author you're especially open to brief jolts of literature that consume only a few minutes or even less each In our fast paced society economy of words while reading and writing is correspondingly appropriate Snatch a sampling of stories when riding on short duration bus train and car trips waiting for a dentist or physician and maybe even while on a commode A re read of a story may provide an added benefit In this book you will find the short short stories to be highly varied Read about a woman having to learn wildflower names from her fiancée the dwarf planet Pluto's complaint of losing its planet status a snake fearing woman who prefers her snakes having legs and a nearly 80 year old fiddler worried about contracting AIDS from bad blood during bypass surgery The photographs are meant to complement the stories But they can be appreciated on their own merits You will note that their titles differ from those of the stories Literature & Science Breakthroughs Jo-Anne Lake, 2000 *Literature Science Breakthroughs* offers strategies for using fiction and non fiction to
