these principles to a variety of therapeutic settings The methods described follow specific rules derived from hypnotherapy  
but can be integrated into any other form of counselling or therapy and can be used in short sessions in telephone  
consultations and with patients in critical states as well as conversations of a therapeutic nature by non therapeutic  
professionals The book explains why and how these interventions work their general structure and how they can be used to  
tackle specific needs such as trauma depression and anxiety disorders The book will be of great interest to counsellors  
doctors and therapists of different orientations who are looking for therapeutic methods that can be used in short sessions or
