

# SOCIAL CONSTRUCTION OF RACE

The social construction of race is a sociological concept that holds that the category of race is defined in language and culture rather than objective or biological fact (Gergen, 2015).

## DEFINITION

"Race is a recent human invention, a social construct designed to divide members of a society into a hierarchy of social, economic, and political advantage or disadvantage based on a set of randomly selected normal human variations in phenotype."

(Feldman et al., 2022)

## EXAMPLE

Italians as whites - Dewhurst (2008) has demonstrated how Italians were not seen as white people in early colonial Australia. As a result, they faced increased discrimination. Over time, as Italian-Australians assimilated and influx of darker-skinned migrants arrived, Italians slowly became included in the category of whiteness in Australian discourse.

## **Social Construction Of Science:**

The Social Construction of Technological Systems, anniversary edition Wiebe E. Bijker, Thomas Parke Hughes, Trevor Pinch, 2012-05-18 An anniversary edition of an influential book that introduced a groundbreaking approach to the study of science technology and society This pioneering book first published in 1987 launched the new field of social studies of technology It introduced a method of inquiry social construction of technology or SCOT that became a key part of the wider discipline of science and technology studies The book helped the MIT Press shape its STS list and inspired the Inside Technology series The thirteen essays in the book tell stories about such varied technologies as thirteenth century galleys eighteenth century cooking stoves and twentieth century missile systems Taken together they affirm the fruitfulness of an approach to the study of technology that gives equal weight to technical social economic and political questions and they demonstrate the illuminating effects of the integration of empirics and theory The approaches in this volume collectively called SCOT after the volume's title have since broadened their scope and twenty five years after the publication of this book it is difficult to think of a technology that has not been studied from a SCOT perspective and impossible to think of a technology that cannot be studied that way

**The Social Construction of What?** Ian Hacking, 1999 Lost in the raging debate over the validity of social construction is the question of what precisely is being constructed Facts gender quarks reality Is it a person An object An idea A theory Each entails a different notion of social construction Ian Hacking reminds us His book explores an array of examples to reveal the deep issues underlying contentious accounts of reality Especially troublesome in this dispute is the status of the natural sciences and this is where Hacking finds some of his most telling cases from the conflict between biological and social approaches to mental illness to vying accounts of current research in sedimentary geology He looks at the issue of child abuse very much a reality though the idea of child abuse is a social product He also cautiously examines the ways in which advanced research on new weapons influences not the content but the form of science In conclusion Hacking comments on the culture wars in anthropology in particular a spat between leading ethnographers over Hawaii and Captain Cook Written with generosity and gentle wit by one of our most distinguished philosophers of science this wise book brings a much needed measure of clarity to current arguments about the nature of knowledge

**The Social Construction of Science** T. Jagtenberg, 2012-12-06 This book concerns the institutionalisation of the physical sciences The book breaks with the established tradition in the history philosophy and sociology of sciences by attempting to capture both the cognitive and social dimensions of institutionalisation in one unified analysis This unification has been achieved through a treatment of research as goal directed social action a theme which has been developed both theoretically and empirically The analysis presented is therefore unique in its breadth of focus and shows how the traditional concerns of sociology with generalised macro structures of meaning and action can be related to the lifeworlds of individual scientists The sociology of the sciences is still

today a relative newcomer to the field of sciences studies which has traditionally been dominated by the history and philosophy of the sciences I hope that this book reflects the excitement I experienced in being able to respond to the debates and concepts which erupted in that particularly fertile period following the publication of Kuhn's *Structure of Scientific Revolutions* in 1962 a period from which a cognitively oriented sociology of the sciences was to emerge as a serious challenger to orthodoxies in the history philosophy and sociology of sciences

*Natural Law, Science, and the Social Construction of Reality* Bernie Koenig, 2004 *Natural Law Science and the Social Construction of Reality* looks at changes in knowledge and the relationship to values from the modern era to today Author Bernie Koenig examines Newton's influence on Locke and Kant how Kant influenced Darwin and Freud and the implications of their work for both anthropology and moral theory

The Social Construction of What? Ian Hacking, 2000-11-15 Lost in the raging debate over the validity of social construction is the question of what precisely is being constructed Facts gender quarks reality Ian Hacking's book explores an array of examples to reveal the deep issues underlying contentious accounts of reality especially regarding the status of the natural sciences

An Invitation to Social Construction Kenneth J Gergen, 2009-02-19 Remains an authoritative overview of the field but is now markedly more accessible It will be invaluable to students and scholars looking for a sustained and engaging inquiry into the premises and practices of social constructionism Dr Matthew Adams University of Brighton

Kenneth Gergen elegantly presents his constructionist ideas in a style that is both relational and inviting and at the same time comprehensive and thorough By tracing the history of his ideas he provides a blueprint for others to follow by including further reflections and additional references Dr Gergen once again has paved the way for innovative relational and ethical ways of thinking about pedagogy research and practice I strongly recommend this outstanding book for child and youth care practitioners social workers counselors mediators and psychologists Marie Hoskins Professor School of Child and Youth Care Faculty of Human and Social Development University of Victoria This aptly titled book provides an accessible theoretical introduction to social constructionism applicable to numerous fields therapy education research As a teacher of Family Therapy this book provides a foundation for understanding social constructionist therapy models and research and adds depth to my students understanding of these models Kevin Lyness Antioch University Reflecting the significant developments in constructivist thought and practice the Second Edition of *An Invitation to Social Construction* has been thoroughly revised and updated with material on major new areas such as discourse analysis action research the body and environmentalism While still preserving the celebrated wide ranging and profound approach of the first the Second Edition now with pedagogical features throughout is even more accessible for students

**The Cognitive Paradigm** Marc de Mey, 1982-07-31 The growing importance of the sciences in industrialised societies has been acknowledged by the increasing number of studies concerned with their development change and control In the past 20 or so years there has been a

considerable growth in teaching and research programmes dealing with science and technology policy science and society sociology and history of science and similar areas which has resulted in much new material about the production and validation of scientific knowledge In addition to the quantitative growth of this literature there has also been a substantial shift in the problems addressed and approaches adopted In particular the substantive content of scientific knowledge has become the focus of many historical and sociological studies which seek to understand how knowledges develop and change in different social circumstances Instead of taking the privileged epistemological status of scientific knowledge for granted recent approaches have emphasised the socially contingent nature of knowledge production and validation and the pluralistic nature of the sciences Parallel to these developments there has been a shift in the treatment of science by the state business and public pressure groups Increasingly they have sought to control the direction of research and thus the content of knowledge directly rather than simply applying existing knowledge Science has become amenable to social control and influence Its sacred status has declined and it is increasingly viewed as a socially constituted phenomenon which can be studied in a similar manner to other cultural products

**The Social Construction of Anorexia Nervosa** Julie

Hepworth, 1999-06-22 A readable book that contains simplified information of some complicated concepts It will prove of benefit to those readers in the field of women and social studies European Eating Disorders Review The concepts presented in this book are carefully argued succinctly organized and genuinely stimulating It provokes clinicians to think about treatment and the effect of diagnostic practices it provokes researchers to ask different questions and it provokes students to read beyond dominant and conventional texts This is a timely and important publication that deserves to feature prominently in the ongoing study of anorexia nervosa Journal of Community Applied Social Psychology
