No-collar Andrew Ross, 2004 While the internet bubble has burst the New Economy that the internet produced is still with us along with the myth of a workplace built around more humane notions of how people work and spend their days in offices No Collar is the only close study of New Economy workplaces in their heyday Andrew Ross a renowned writer and scholar of American intellectual and social life spent eighteen months deep inside Silicon Alley in residence at two prominent New Economy companies Razorfish and 360hiphop and interviewed a wide range of industry employees in other cities to write this remarkable book Maverick in their organizations and permissive in their culture these workplaces offered personal freedoms and rewards that were unheard of in corporate America Employees feared they may never again enjoy such an irresistible work environment Yet for every apparent benefit there appeared to be a hidden cost 70 hour workweeks a lack of managerial protection an oppressive shouldering of risk by employees an illusory sense of power sharing and no end of emotional churning The industrialization of bohemia encouraged employees to think outside the box but also allowed companies to claim their most free and creative thoughts and ideas In these workplaces Andrew Ross

encountered a new kind of industrial personality and emerged with a sobering lesson Be careful what you wish for When work becomes sufficiently humane we tend to do far too much of it and it usurps an unacceptable portion of our lives He concludes that we should not have to choose between a personally gratifying and a just workplace we should strive to enjoy both Author note Andrew Ross is Professor in the American Studies program at New York University A writer for Artforum The Nation The Village Voice and many other publications he is the author or editor of thirteen books including The Celebration Chronicles Real Love The Chicago Gangster Theory of Life Strange Weather No Respect and most recently Low Pay High Profile The Global Push for Fair Labor

The New New Journalism Robert Boynton, 2007-12-18 Forty years after Tom Wolfe Hunter S Thompson and Gay Talese launched the New Journalism movement Robert S Boynton sits down with nineteen practitioners of what he calls the New New Journalism to discuss their methods writings and careers The New New Journalists are first and foremost brilliant reporters who immerse themselves completely in their subjects Jon Krakauer accompanies a mountaineering expedition to Everest Ted Conover works for nearly a year as a prison guard Susan Orlean follows orchid fanciers to reveal an obsessive subculture few knew existed Adrian Nicole LeBlanc spends nearly a decade reporting on a family in the South Bronx And like their muckraking early twentieth century precursors they are drawn to the most pressing issues of the day Alex Kotlowitz Leon Dash and William Finnegan to race and class Ron Rosenbaum to the problem of evil Michael Lewis to boom and bust economies Richard Ben Cramer to the nitty gritty of politics How do they do it In these interviews they reveal the techniques and inspirations behind their acclaimed works from their felt tip pens tape recorders long car rides and assumed identities to

their intimate understanding of the way a truly great story unfolds Interviews with Gay Talese Jane Kramer Calvin Trillin Richard Ben Cramer Ted Conover Alex Kotlowitz Richard Preston William Langewiesche Eric Schlosser Leon Dash William Finnegan Jonathan Harr Jon Krakauer Adrian Nicole LeBlanc Michael Lewis Susan Orlean Ron Rosenbaum Lawrence Weschler Lawrence Wright **The SAGE Handbook of Management Learning, Education and Development** Steven J

Armstrong, Cynthia V Fukami, 2009-05-07 The scholarship of management teaching and learning has established itself as a field in its own right and this benchmark handbook is the first to provide an account of the discipline Original chapters from leading international academics identify the key issues and map out where the discipline is going Each chapter provides a comprehensive and critical overview of the given topic area highlights current debates and reviews the emerging research agenda Chapters embrace the study of organizations as a whole the concepts of individual and collective learning the delivery of formal management education and the facilitation of management development Through consideration of these themes the Handbook analyzes promotes and critiques the contribution of management learning education and development to management understanding It will be an invaluable point of reference for all students and researchers interested in broadening their understanding of this exciting and dynamic new field **The Triple Package** Amy Chua, Jed

Rubinfeld, 2014-02-04 That certain groups do much better in America than others as measured by income occupational status test scores and so on is difficult to talk about In large part this is because the topic feels racially charged The irony is that the facts actually debunk racial stereotypes There are black and Hispanic subgroups in the United States far outperforming many white and Asian subgroups Moreover there s a demonstrable arc to group success in immigrant groups it typically dissipates by the third generation puncturing the notion of innate group differences and undermining the whole concept of model minorities Mormons have recently risen to astonishing business success Cubans in Miami climbed from poverty to prosperity in a generation Nigerians earn doctorates at stunningly high rates Indian and Chinese Americans have much higher incomes than other Americans Jews may have the highest of all Why do some groups rise Drawing on groundbreaking original research and startling statistics The Triple Package uncovers the secret to their success A superiority complex insecurity impulse control these are the elements of the Triple Package the rare and potent cultural constellation that drives disproportionate group success The Triple Package is open to anyone America itself was once a Triple Package culture It s been losing that edge for a long time now Even as headlines proclaim the death of upward mobility in America the truth is that the old fashioned American Dream is very much alive but some groups have a cultural edge which enables them to take advantage of opportunity far more than others Americans are taught that everyone is equal that no group is superior to another But remarkably all of America s most successful groups believe even if they don t say so aloud that they re exceptional chosen superior in some way Americans are taught that self esteem feeling good about yourself is the key to a successful life But in all of America s most successful groups people tend to feel insecure inadequate that they have to prove

themselves America today spreads a message of immediate gratification living for the moment But all of America s most successful groups cultivate heightened discipline and impulse control But the Triple Package has a dark underside too Each of its elements carries distinctive pathologies when taken to an extreme they can have truly toxic effects Should people strive for the Triple Package Should America Ultimately the authors conclude that the Triple Package is a ladder that should be climbed and then kicked away drawing on its power but breaking free from its constraints Provocative and profound The Triple Package will transform the way we think about success and achievement *The Oxford Handbook of the Archaeology of the Contemporary World* Paul Graves-Brown,Rodney Harrison,Angela Piccini,2013-10-17 It has been clear for many years that the ways in which archaeology is practised have been a direct product of a particular set of social cultural and historical circumstances archaeology is always carried out in the present More recently however many have begun to consider how archaeological techniques might be used to reflect more directly on the contemporary world itself how we might undertake archaeologies of as well as in the present This Handbook is the first comprehensive survey of an exciting and rapidly expanding sub field and provides an authoritative overview of the newly emerging focus on the archaeology of the present and recent past In addition to detailed archaeological case studies it includes essays by scholars working on the relationships of different disciplines to the archaeology of the contemporary world including anthropology psychology philosophy historical geography science and technology studies communications and media ethnoarchaeology forensic archaeology sociology film performance and contemporary art This volume seeks to explore the boundaries of an emerging sub discipline to develop a tool kit of concepts and methods which are applicable to this new field and to suggest important future trajectories for research It makes a significant intervention by drawing together scholars working on a broad range of themes approaches methods and case studies from diverse contexts in different parts of the world which have not previously been considered collectively Virtual Homelands Madhavi Mallapragada,2013-10-15 The internet has transformed the idea of home for Indians and Indian Americans In *Virtual Homelands* Indian Immigrants and Online Cultures in the United States Madhavi Mallapragada analyzes home pages and other online communities organized by diasporic and immigrant Indians from the late 1990s through the social media period Engaging the shifting aspects of belonging immigrant politics and cultural citizenship by linking the home page household and homeland as key sites Mallapragada illuminates the contours of belonging and reveals how Indian American struggles over it trace back to the web s active mediation in representing negotiating and reimagining home As Mallapragada shows ideologies around family and citizenship shift to fit the transnational contexts of the online world and immigration At the same time the tactical use of the home page to make gender racial and class struggles visible and create new modes for belonging implicates the web within complex political and cultural terrain On e commerce community and activist sites the recasting of home and homeland online points to intrusion by public agents such as the state the law and immigration systems in the domestic the private and the familial Mallapragada

reveals that the home page may mobilize to reproduce conservative narratives of Indian immigrants familial and citizenship cultures but the reach of a website extends beyond the textual and discursive to encompass the institutions shaping it as the web unmakes and remakes ideas of India and America **A Bibliography of the Personal Computer** Roy A. Allan, 2006

This eBook bibliography on the history of the personal computer and the industry contains over 280 book notations and over 250 periodical notations It also contains a reprint of an article by the author entitled What Was the First Personal Computer
