Psychotherapy Tradecraft: The Technique And Style Of Doing Theodore H. Blau, 2014-01-09

First published in 1988, the literature of psychotherapy is heavily weighted on the side of theory. There is an almost complete absence of tradecraft: what to do, when to do it, and how to do it. Tradecraft refers to the specific techniques used by experienced and skillful psychotherapists to create the therapeutic setting, to invite and maintain a therapeutic alliance, to enhance the patient's progress, and finally to allow the patient to integrate and complete the process of

Eisner, 2000-01-30 Psychologist attorney Eisner puts psychotherapy on trial by critically examining its effectiveness through the lens of the scientific method From psychoanalysis to cognitive behavior therapy as well as the 500 or so other psychotherapies there is not a single experimental study that supports the effectiveness of psychotherapy over a placebo or religious healing Using both case examples and clinical research this book challenges the conclusion that there is empirical support for the notion that psychotherapy is effective *Dictionary of Psychotherapy* Sue Walrond-Skinner, 2014-02-25 An invaluable reference tool which provides a comprehensive coverage of the various psychotherapeutic concepts and the techniques relevant to them *Multimedia Psychotherapy* Domenico Arturo Nesci, 2012-12-21 Multimedia Psychotherapy is a new technique that helps patients to mourn and overcome loss and grief experiences as well as blocks and inhibitions in the life cycle The method can be easily summarized in 5 steps the intake where the therapist explains the technique to the patient the picture sessions where the patient helped by his her own family brings in pictures and works them through freely associating with memories and emotions evoked by the images the music session during which a song or music is chosen by the patient in order to become the soundtrack of the psychodynamic montage which a multimedia artist who collaborates with the therapist will produce and then give back to the therapist the screening session where patient and therapist watch comment and elaborate the video together and the outcome Although this psychotherapeutic technique is rooted in a psychodynamic approach it can be applied and integrated within any form of psychotherapy Multimedia Psychotherapy is conceived as a manual in order to let all health professionals who work as psychotherapists to learn the new technique and apply it with their own patients Excerpts from sessions are quoted to describe each step of the therapy At the same time two theoretical chapters are devoted to explain how and why the memory objects created by the multimedia artist are so effective in helping patients to mourn their complicated grief and or overcome their blocks or inhibitions in normal development Finally a new supervision model the Clinic and Dreams Workshop is described as well as a training group experience once again through excerpts of such new teaching seminars The book is written as a story in the format of narrative medicine It
