Ceramics and the Museum Laura Breen, 2019-08-22 Ceramics and the Museum interrogates the relationship between art oriented ceramic practice and museum practice in Britain since 1970 Laura Breen examines the identity of ceramics as an art form drawing on examples of work by artist makers such as Edmund de Waal and Grayson Perry addresses the impact of policy making on ceramic practice traces the shift from object to project in ceramic practice and in the evolution of ceramic sculpture explores how museums facilitated multisensory engagement with ceramic material and process and analyses the exhibition as a text in itself Proposing the notion that gestures of showing such as exhibitions and installation art can be read as statements she examines what they tell us about the identity of ceramics at particular moments in time Highlighting the ways in which these gestures have constructed ceramics as a category of artistic practice Breen argues that they reveal gaps between narrative and practice which in turn can be used to deconstruct the art

Wild Things Judy Attfield, 2020-08-20 What do things mean What does the life of everyday objects reveal about people and their material worlds Has the quest for the real thing become so important because the high tech world of total virtuality threatens to engulf us This pioneering book bridges design theory and anthropology to offer a new and challenging way of understanding the changing meanings of contemporary human object relations The act of consumption is only the starting point of object's lives Thereafter they are transformed and invested with new meanings and associations that reflect and assert who we are Defining designed things as things with attitude differentiates the highly visible fashionable object from ordinary artefacts that are too easily taken for granted Through case studies ranging from reproduction furniture to fashion and textiles to clutter the author traces the connection between objects and authenticity ephemerality and self identity Beyond this she shows the materiality of the everyday in terms of space time and the body and suggests a transition with the passing of time from embodiment to disembodiment

The New Spirit of Hospitality Rodanthi Tzanelli, 2023-10-24 Through methodological elaborations on case studies Tzanelli explains that we have entered a new era of tourism and hospitality mobilities dominated by crises of cultural representation and host presence

readers to consider their advantages and disadvantages and so is also recommended for policy and law makers as well as organizations that administer IP rights Topics include the subject matter of design protection procedural and substantive requirements design registration infringement and the overlap of design rights and other IP rights The chapters on design history provide further context to the historical development of these legal concepts by considering major design movements key designers and iconic designs and the current state of design The chapters highlight the connected and often complementary relationship between the two histories not only for each country but at the regional and international level often as a result of government policies trade colonialism immigration and globalisation Design and design practice continue to become more global and evolve with developments in technology At the same time design laws are not internationally harmonized and continue to develop at the national level with a number of significant changes occurring in recent years This timely book shows how the lessons of the past continue to inform the future direction of design and the legal systems developed to protect it

The Encyclopædia Britannica Hugh Chisholm,1910 *The Literary Digest* ,1916 *The Avant-Garde in Interwar England* Michael T. Saler,2001-05-24

The Avant Garde in Interwar England addresses modernism's ties to tradition commerce nationalism and spirituality through an analysis of the assimilation of visual modernism in England between 1910 and 1939 During this period a debate raged across the nation concerning the purpose of art in society On one side were the aesthetic formalists led by members of London's Bloomsbury Group who thought art was autonomous from everyday life On the other were England's so called medieval modernists many of them from the provincial North who maintained that art had direct social functions and moral consequences As Michael T Saler demonstrates in this fascinating volume the heated exchange between these two camps would ultimately set the terms for how modern art was perceived by the British public Histories of English modernism have usually emphasized the seminal role played by the Bloomsbury Group in introducing celebrating and defining modernism but Saler's study instead argues that during the watershed years between the World Wars modern art was most often understood in the terms laid out by the medieval modernists As the name implies these artists and intellectuals closely associated modernism with the art of the Middle Ages building on the ideas of John Ruskin William Morris and other nineteenth century romantic medievalists In their view modernism was a spiritual national and economic movement a new and different artistic sensibility that was destined to revitalize England's culture as well as its commercial exports when applied to advertising and industrial design This book then concerns the busy intersection of art trade and national identity in the early decades of twentieth century England Specifically it explores the life and work of Frank Pick managing director of the London Underground whose famous patronage of modern artists architects and designers was guided by a desire to unite nineteenth century arts and crafts with twentieth century industry and mass

culture As one of the foremost adherents of medieval modernism Pick converted London's primary public transportation system into the culminating project of the arts and crafts movement But how should today's readers regard Pick's achievement What can we say of the legacy of this visionary patron who sought to transform the whole of sprawling London into a post impressionist work of art And was medieval modernism itself a movement of pioneers or dreamers In its bold engagement with such questions The Avant Garde in Interwar England will surely appeal to students of modernism twentieth century art the cultural history of England and urban history **The Chemistry Set** Sara Roberts, 1993 *The Encyclopaedia Britannica: A to Aus*, 1911
