

The evolution of the written accentuation system in Spanish since 1726

Abstract: Douglass (1964, 1988) examines the Greek and Roman precursors and early uses of the written accent in Spanish, tracing its development to 1726, when the first *Diccionario de Autoridades* from the *Real Academia Española (RAE)* appeared. This system continues to evolve even today, but there is little published research on its development over the last almost 300 years. Along the way there have been inconsistencies, missed generalizations, and overlapping, unmotivated or *ad hoc* rules that have undergone significant revisions in the *Diccionario*, *Ortografía*, *Prontuario*, and *Gramáticas* by the *RAE* between 1726 and 2010. The ambiguous and tentative first rules of written accentuation in Spanish have, over the years, been modified and clarified, evolving into a streamlined and elegant system that constitutes a useful tool for the pronunciation and spelling of unfamiliar words. Early accentuation rules differed widely from the current ones in questions relating to prosody, the accentuation of vowels appearing singly as separate words, the use of the diacritical accent, diphthongization and hiatus, the relation between written accentuation and grammatical categories, and the consolidation of rules for the accentuation of words ending in -n, -s, or a vowel, all of which are explored in the current study.

Key words: Latin, Spanish, written accentuation rules, stress, diacritical accent, hiatus

1. Introduction

Any instructor faced with the question of why and how Spanish came to use a system of written accentuation would be hard pressed to find many answers in the existing literature. The purpose of this study is to draw attention to the only research we have found regarding the origins of the written accent in Spanish (Douglass 1988), and to provide an understanding of how written accentuation has evolved through modern-day Spanish. This study grew out of a question asked in a History of the Spanish Language class that, at the time, went unanswered. The class had been comparing a passage from Genesis from different periods (the fourth and eighth centuries and Modern Spanish) (Pharies 2007:10). Among other changes, reflected in the texts was the appearance of written accentuation after the fourth century. Thus came the fateful question: "Profe, where did written accentuation in Spanish come from?" Douglass (1988) answers the question in part, tracing the development of written accentuation up to the *Discurso proemial* of the first *Diccionario de Autoridades* (1726), but to the best of our knowledge, there is no research that traces the evolution of the rules from 1726 until the present.
