This edited collection contends that if women are to enter into leadership positions at equal levels with their male colleagues then sexism in all its forms must be acknowledged attended to and actively addressed This interdisciplinary collection *Surviving Sexism in Academia* Strategies for Feminist Leadership is part storytelling part autoethnography part action plan The chapters document and analyze everyday sexism in the academy and offer up strategies for survival ultimately lifting the veil from the good old boys business as usual culture that continues to pervade academia in both visible and less visible forms forms that can stifle even the most ambitious women in their careers Disciplining Feminism Ellen Messer-Davidow, 2002-01-28

A cultural studies account of the changes produced in feminism as it became part of the academy and of the highly orchestrated attack on higher education by the right wing **Women in Higher Education** Judith Glazer-Raymo, Estela Mara Bensimon, Barbara K. After

more than twenty years of feminist education research policy development and innovative school practice it seems appropriate to evaluate the impact and significance of this world wide struggle for social justice in education At the same time the recent restructuring of educational provision whether in the name of sexual equality or the ideologies of the New Right also requires a considered response from Those Committed To Promoting Greater Social Equality This Collection offers a unique opportunity to host an international forum on contemporary thinking and practice not just within different national contexts but for feminism more generally In adopting a critical feminist approach the chapters re establish such egalitarian traditions as radical feminism black feminism and socialist feminism and address such themes as the interrelation between social class race and gender and the ways these articulate with feminist educational practice In gathering together leading educators from five different countries all committed to the project of social transformation this book represents the shifting concerns of the feminist theoretical debate and helps formulate feminist educational agendas more suited to the political and economic conditions which prevail in the 1990s

Struggle and Commitment Claudia Irene Moore,1990

International Handbook of Women's Education Gail Kelly,1989-11-20 The International Handbook of Women's Education focuses on the history current status and outcome of women's schooling The book provides comparative information about women's education across a broad spectrum of 23 countries Each essay considers the history of women's education ideological and religious beliefs as well as cultural and political traditions which account for the pace of development of women's education and the particular forms that education has taken The historical context each essay provides serves as a basis for understanding the extent of sexual inequality in school and society which has characterized the world in the past and persists in the present The major focus of each essay is the state of women's education today A central concern in each is to chart enrollment patterns and how educational social and economic policies affect these patterns Each essay also considers the content of women's education as well as the outcome of education on women in the labor force in the political system and in the family Finally each chapter considers contemporary government policies which seek to redress inequalities in education and or the outcome of education and the role of the women's movement in seeking change A bibliography of approximately 1000 items on women's education world wide completes the volume The descriptive and analytical essays contained in this Handbook provide as comprehensive a picture as possible at this time of women's educational enrollment patterns and also seek to explain why the pattern is as it is This new handbook is an important addition to the literature of women's studies and education

Women in Academic Leadership Susan J. Bracken,Jeanie K. Allen,Diane R. Dean,2023-07-03 Colleges and universities benefit from diversity in their leadership roles and profess to value diversity of thought of experience of person Yet why do women remain under represented in top academic leadership positions and in key positions along the academic career ladder Why don't they advance at a rate proportional to that of their male peers How do internal and external environmental contexts still influence who enters academic leadership and who

survives and thrives in those roles *Women in Academic Leadership* complements its companion volumes in the *Women in Academe* series provoking readers to think critically about the gendered nature of academic leadership across the spectrum of institutional types It argues that leadership the academy and the nexus of academic leadership remain gendered structures steeped in male oriented norms and mores Blending research and reflection it explores the barriers and dilemmas that these structures present and the professional strategies and the personal choices women make in order to successfully surmount them The authors pose questions about how women leaders negotiate between their public and private selves They consider how women develop a vital sense of self efficacy along with the essential skills and knowledge they need in order to lead effectively how they cultivate opportunity and how they gain legitimacy and maintain authenticity in a male gendered arena For those who seek to create an institutional environment conducive to equity and opportunity this book offers insight into the pervasive barriers facing women of all colors and evidence of the need for a more complex multi dimensional view of leadership For women in academe who seek to reach their professional potential and maintain authenticity it offers encouragement and a myriad of strategies for their growth and development *Academe* American Association of University Professors,1999 *Subject Catalog, 1979* Library of Congress,1979
