Understanding Comparative Politics Mehran Kamrava,2002-11-01 Comparative politics has undergone significant theoretical changes in recent decades Particularly since the 1980s a new generation of scholars have revamped and rejuvenated the study of the subject Mehran Kamrava examines current and past approaches to the study of comparative politics and proposes a new framework for analysis This is achieved through a comparative examination of state and social institutions the interactions that occur between them and the political cultures within which they operate The book also offers a concise and detailed synthesis of existing comparative frameworks that up to now at least have encountered analytical shortcomings on their own Although analytically different in its arguments and emphasis from the current Mainstream genre of literature on comparative politics the present study is a logical outgrowth of the scholarly works of the last decade or so It will be essential reading for all students of comparative politics

Rethinking World Politics Philip G. Cerny,2010-03-24 How has globalization transformed world politics Philip G Cerny argues that while supranational governance bodies global corporations NGOs and cross border interest groups are not replacing nation states they are forging new transnational webs of power States themselves increasingly trapped in these webs Sweeping in its scope Rethinking World Politics is a landmark work of international relations theory that offers us new ways to think about the forces shaping the contemporary world

Trends and Transformations in World Politics Rahman Dag,Özgür Tüfekçi,2022-05-05 We are witnessing turbulent times which

inspire both anxiety and hope Many global trends are sweeping across a transforming world To make these movements and changes more understandable Trends and Transformations in World Politics introduces the reader to the study of world politics in a period of rapid readjustment This book also focuses on world historical transformations as a general phenomenon showing how the twenty first century change in world politics fits into broader patterns of macro historical change To do that the perspective of major international relations theories is utilized and a discussion of transformation is grounded within a conceptual framework This book will strengthen the reader s understanding of the trends and transformations in world politics **A Critical Rewriting of Global Political Economy** V. Spike Peterson,2004-03-01

Moving beyond a narrow definition of economics this pioneering book advances our knowledge of global political economy and how we might critically respond to it V Spike Peterson clearly shows how two key features of the global economy increasingly determine everyday lives worldwide The first is explosive growth in financial markets that shape business decision making and public policy making and the second is dramatic growth in informal and flexible work arrangements that shape income generation and family wellbeing These developments though widely recognized are rarely analyzed as inextricable and interacting dimensions of globalization Using a new theoretical model Peterson demonstrates the interdependence of reproductive productive and virtual economies and analyzes inequalities of race gender class and nation as structural features of neoliberal globalization Presenting a methodologically plural cross disciplinary and well documented account of globalization the author integrates marginalized and disparate features of globalization to provide an accessible narrative from a postcolonial feminist vantage point Gender Matters in Global Politics Laura J. Shepherd,2014-07-17

Fully revised and updated this second edition of Gender Matters in Global Politics is a comprehensive textbook for advanced undergraduates studying feminism War Terrorism and political violence Land food and water International legal institutions Peacebuilding institutions and post conflict reconstruction Citizenship Art aesthetics and emotionality and New social media and global resistance This text enables students to develop a sophisticated understanding of the work that gender does in policies and practices of global politics **Global Political Economy** Kavous Ardalan,2018-12-18 This book applies a multiparadigmatic philosophical frame of analysis to the global political economy Crossing two disciplines and lines of literature social philosophy and global political economy this book considers seven aspects of global political economy and discusses each aspect from four diverse paradigmatic viewpoints functionalist interpretive radical humanist and radical structuralist The four paradigms are founded upon different assumptions about the nature of social science and the nature of society Each paradigm generates theories concepts and analytical tools which are different from those of other paradigms developing an understanding of the different paradigms leads to a better understanding of the multi faceted nature of the subject matter In this book the first chapter reviews the four paradigms Each of the next seven chapters provides four paradigmatic explanations for each of the seven aspects of the global political economy The final chapter concludes by

recommending further paradigmatic diversity This book will be of particular interest to students and researchers interested in political economy heterodox economics political science and international relations *Civil Society Regionalization in Southern Africa* Andréas Godsäter, 2016-05-12 This book investigates civil society regionalization in Southern Africa The point of departure is the study of new regionalism which refers to the wave of regional integration globally since the 1980s However whilst the current regionalism studies undoubtedly contributes to a deeper understanding of regional processes important gaps remain in particular the relatively scant emphasis given to civil society This particularly relates to regions in the global South including Southern Africa The overarching aim of this book is therefore to analyse the dynamics of civil society regionalization in Southern Africa both empirically and from a theoretical perspective through analysing the cases of trade and HIV AIDS The study finds that CSOs can be more active in regional governance than has previously been conceptualized and are also highly active in terms of constructing regionalization through framing issues and to a less extent making identities regional Furthermore the book enhances knowledge of the heterogeneous nature of civil society regionalization Lastly it is demonstrated that going regional is only partly an autonomous process and also has to be understood as under the influence of the deeper statist and capitalist social structures marking the regional order in Southern Africa The New Global Politics Harry E. Vanden, Peter N. Funke, Gary Prevost, 2017-03-16 Over the past decade there has been an unprecedented mobilization of street protests worldwide from the demonstrations that helped bring progressive governments to power in Latin America to the Arab Spring to Occupy movements in the United States and Europe to democracy protests in China This edited volume investigates the current status nature and dynamics of the new politics that characterizes social movements from around the world that are part of this revolutionary wave Spanning case studies from Latin America North and South Africa the Middle East Asia Europe and North America this volume examines the varied manifestations of the current cycle of protest which emerged from the Global South and spread to the North and highlights their interconnections the globalized nature of these social movements Analytically converging around Sidney Tarrow's emphasis on protest cycles political opportunity structures and identity the individual chapters investigate processes such as global framing internationalization diffusion scale shifts externalizations and transnational coalition building to provide an analytic cartography of the current state of social movements as they are simultaneously globalizing while still being embedded in their respective localities Looking at new ways of thinking and new forms of challenging power this comprehensive volume will be of great interest to graduates and scholars in the fields of globalization social movements and international politics
