Consumers' Imperium (Volume 2 of 2) (EasyRead Edition) , **Book Madness** Denise Gigante, 2022-10-18 The fascinating history of American bookishness as told through the sale of Charles Lamb's library in 1848 Charles Lamb's library a heap of sixty scruffy old books singed with smoke soaked with gin sprinkled with crumbs stripped of illustrations and bescribbled by the essayist and his literary friends caused a sensation when it was sold in New York in 1848 The transatlantic book world watched as the relics of a man revered as the patron saint of book collectors were dispersed Following those books through the stories of the bibliophiles who shaped intellectual life in America booksellers publishers journalists editors bibliographers librarians actors antiquarians philanthropists politicians poets clergymen Denise Gigante brings to life a lost world of letters at a time when Americans were busy assembling the country's major public university and society libraries A human tale of loss obsession and spiritual survival this book reveals the magical power books can have to bring people together and will be an absorbing read for anyone interested in what makes a book special

**The Early Information Society** Alistair Black, Dave Muddiman, 2016-03-23 Whether termed the network society the knowledge society or the information society it is widely accepted that a new age has dawned unveiled by powerful computer and communication technologies Yet for millennia humans have been recording knowledge and culture engaging in the dissemination and preservation of information In The Early Information Society the authors argue for an

earlier incarnation of the information age focusing upon the period 1900-1960. In support of this they examine the history and traditions in Britain of two separate but related information rich occupations: information management and information science, repositioning their origins before the age of the computer and identifying the forces driving their early development. The *Early Information Society* offers an historical account which questions the novelty of the current information society. It will be essential reading for students, researchers and practitioners in the library and information science field and for sociologists and historians interested in the information society.

**Consumers' Imperium (Volume 2 of 2) (EasyRead Super Large 18pt Edition)**, *German Monuments in the Americas* Hans A. Pohlsander, 2010. This book looks at the many transatlantic bonds which have linked and still link Germany and the United States. German immigrants to the Americas brought with them a good deal of cultural baggage. They cultivated their German heritage in their schools, churches and clubs. They expressed pride in this heritage by erecting monuments to Goethe or Schiller, Beethoven or Wagner, Alexander von Humboldt or Turnvater Jahn. They claimed Friedrich Wilhelm von Steuben, Carl Schurz, Gustave Koerner and John A. Roebling as their own. But German born or German trained sculptors did not limit themselves to German subjects. They also paid tribute to America by creating sculptures of Benjamin Franklin, George Washington, Thomas Jefferson, Abraham Lincoln and others who occupy a place of honor in American history. While a few German monuments can be found in Canada and in Latin America, the number of German monuments in the United States is surprisingly large. These monuments illustrate the contribution often overlooked or ignored of the German American community to American society and American cultural life.

*Literacy Skills as Local Intangible Capital* Sofia Kotilainen, 2016-09-15. This book studies the grey area of the success story of rural lending libraries in the Nordic countries through the activities of people's libraries in one area of Central Finland. The study explores the influence of social, cultural, geographical and economic phenomena such as the spread of revivalist movements on the reading habits of the local population and reveals interesting reasons why the establishment of elementary schools and popular libraries and the growth of functional literacy did not automatically increase the informational capital of the common people of remote regions or lead to their social advancement. This study represents a methodological experiment in describing the life history of a people's library. The combination of collective biographical and transnational comparative methods with rarely utilized original sources in this study is innovative and has not been used before in Finnish historical research on functional literacy and popular libraries. The advantage of the comparison is that it reveals the attitudes to libraries that were characteristic of each of the cultures involved. For the people of the Finnish countryside in the late nineteenth century, libraries represented a way of acquiring new information that was still strange and unwelcome. The distribution of immaterial capital was extremely uneven with regard to age, gender and social rank. In the earlier Finnish research, has not very often been analysed how the communal status of the peasant reader and his or her personal networks

in the local community affected the quality of his or her reading habits This book shows that the location of the library in its local community and on the other hand the status and position of its customers in their networks had a great significance on the use of the library and thus to the improvement of reading skills *Annual Review of Information Science and Technology* Information Today Inc,2005-10 ARIST published annually since 1966 is a landmark publication within the information science community It surveys the landscape of information science and technology providing an analytical authoritative and accessible overview of recent trends and significant developments The range of topics varies considerably reflecting the dynamism of the discipline and the diversity of theoretical and applied perspectives While ARIST continues to cover key topics associated with classical information science e g bibliometrics information retrieval editor Blaise Cronin is selectively expanding its footprint in an effort to connect information science more tightly with cognate academic and professional communities Contents of Volume 40 2006 SECTION I Information and Society Chapter 1 The Micro and Macroeconomics of Information Sandra Braman Chapter 2 The Geographies of the Internet Matthew Zook Chapter 3 Open Access M Carl Drott SECTION II Technologies and Systems Chapter 4 TREC An Overview Donna K Harman and Ellen M Voorhees Chapter 5 Semantic Relations in Information Science Christopher S G Khoo and Jin Cheon Na Chapter 6 Intelligence and Security Informatics Hsinchun Chen and Jennifer Xu SECTION III Information Needs and Use Chapter 7 Information Behavior Donald O Case Chapter 8 Collaborative Information Seeking and Retrieval Jonathan Foster Chapter 9 Information Failures in Health Care Anu MacIntosh Murray and Chun Wei Choo Chapter 10 Workplace Studies and Technological Change Angela Cora Garcia Mark E Dawes Mary Lou Kohne Felicia Miller and Stephan F Groschwitz SECTION IV Theoretical Perspectives Chapter 11 Information History Alistair Black Chapter 12 Social Epistemology and Information Science Don Fallis Chapter 13 Formal Concept Analysis in Information Science Uta Priss
