Museums in Motion Edward P. Alexander,Mary Alexander,2008 In 1979 Edward P Alexander s *Museums in Motion* was hailed as a much needed addition to the museum literature In combining the history of museums since the eighteenth century with a detailed examination of the function of museums and museum workers in modern society it served as an essential resource for those seeking to enter to the museum profession and for established professionals looking for an expanded understanding of their own discipline Now Mary Alexander has produced a newly revised edition of the classic text bringing it the twenty first century with coverage of emerging trends resources and challenges New material also includes a discussion of the children s museum as a distinct type of institution and an exploration of the role computers play in both outreach and traditional in person visits Joseph Banks and the British Museum Neil Chambers,2015-09-30 Concentrating on the explorer and naturalist Joseph Banks 1743 1820 this book explores the early history of collections at the British Museum Taking Banks extraordinary career as its basis it examines the changes that took place during a period of transition that led to collecting on an increasingly global scale The Oxford Handbook of History and Material Culture Ivan Gaskell,Sarah Anne Carter,2020-04-07 Most historians rely principally on written sources Yet there are other traces of the past available to historians the material things that people have chosen made and used This book examines how material culture can enhance historians understanding of the past both worldwide and across time The successful use of material culture in history depends on treating material things of many kinds not as illustrations but as primary evidence Each kind of material thing and there are many requires the application of interpretive skills appropriate to it These skills overlap with those acquired by scholars in disciplines that may abut history but are often relatively unfamiliar to historians including anthropology archaeology and art history Creative historians can adapt and apply the same skills they honed while studying more traditional text based documents even as they borrow methods from these fields They can think through familiar historical problems in new ways They can also deploy material culture to discover the pasts of constituencies who have left few or no traces in written records The authors of this volume contribute case studies arranged thematically in six sections that respectively address the relationship of history and material culture to cognition technology the symbolic social distinction and memory They range across time and space from Paleolithic to Punk **Museum Masters** Edward P. Alexander,1995 Alexander brings to life the stories of twelve ambitious leaders from the United States and Europe who helped shape the future of the museum world **Photography, Natural History and the Nineteenth-Century Museum** Kathleen Davidson,2017-12-02 The Victorian era heralded an age of transformation in which momentous changes in the field of natural history coincided with the rise of new visual technologies Concurrently different parts of the British Empire began to more actively claim their right to being acknowledged as indispensable contributors to knowledge and the progress of

empire This book addresses the complex relationship between natural history and photography from the 1850s to the 1880s in Britain and its colonies Australia New Zealand and to a lesser extent India Coinciding with the rise of the modern museum photography's arrival was timely and it rapidly became an essential technology for recording and publicising rare objects and valuable collections Also during this period the medium assumed a more significant role in the professional practices and reputations of naturalists than has been previously recognized and it figured increasingly within the expanding specialized networks that were central to the production and dissemination of new knowledge In an interrogation that ranges from the first forays into museum photography and early attempts to document collecting expeditions to the importance of traditional and photographic portraiture for the recognition of scientific discoveries this book not only recasts the parameters of what we actually identify as natural history photography in the Victorian era but also how we understand the very structure of empire in relation to this genre at that time

The First Modern Museums of Art Carole Paul, 2012-11-16 In the eighteenth and early nineteenth centuries the first modern public museums of art civic state or national appeared throughout Europe setting a standard for the nature of such institutions that has made its influence felt to the present day Although the emergence of these museums was an international development their shared history has not been systematically explored until now Taking up that project this volume includes chapters on fifteen of the earliest and still major examples from the Capitoline Museum in Rome opened in 1734 to the Alte Pinakothek in Munich opened in 1836 These essays consider a number of issues such as the nature display and growth of the museums collections and the role of the institutions in educating the public The introductory chapters by art historian Carole Paul the volume's editor lay out the relationship among the various museums and discuss their evolution from private noble and royal collections to public institutions In concert the accounts of the individual museums give a comprehensive overview providing a basis for understanding how the collective emergence of public art museums is indicative of the cultural social and political shifts that mark the transformation from the early modern to the modern world The fourteen distinguished contributors to the book include Robert G W Anderson former director of the British Museum in London Paula Findlen Ubaldo Pierotti Professor of Italian History at Stanford University Thomas Gaehtgens director of the Getty Research Institute and Andrew McClellan dean of academic affairs and professor of art history at Tufts University Show more Show less

The Oxford History of Classical Reception in English Literature David Hopkins, Charles Martindale, Norman Vance, Rita Copeland, Patrick Cheney, Jennifer Wallace, Philip R. Hardie, 2012 The Oxford History of Classical Reception OHCREL is designed to offer a comprehensive investigation of the numerous and diverse ways in which literary texts of the classical world have stimulated responses and refashioning by English writers Covering the full range of English literature from the early Middle Ages to the present day OHCREL both synthesizes existing scholarship and presents cutting edge new research employing an international team of expert contributors for each of the five volumes OHCREL endeavours to interrogate rather than inertly reiterate conventional

assumptions about literary periods the processes of canon formation and the relations between literary and non literary discourse It conceives of reception as a complex process of dialogic exchange and rather than offering large cultural generalizations it engages in close critical analysis of literary texts It explores in detail the ways in which English writers engagement with classical literature casts as much light on the classical originals as it does on the English writers own cultural context This fourth volume and second to appear in the series covers the years 1790 1880 and explores romantic and Victorian receptions of the classics Noting the changing fortunes of particular classical authors and the influence of developments in archaeology aesthetics and education it traces the interplay between classical and nineteenth century perceptions of gender class religion and the politics of republic and empire in chapters engaging with many of the major writers of this period

Friends of Interpretable Objects Miguel TAMEN, Miguel Tamen, 2009-06-30 Tamen s concern is to show how inanimate objects take on life through their interpretation notably in our own culture as they are collected and housed in museums It is his claim that an object becomes interpretable only in the context of a society of friends Thus he suggests our inveterate tendency as human beings to interpret the phenomenal world gives objects not only a life but also a society
