The North Pole Robert E. Peary,2015-07-20 Excerpt from The North Pole Its Discovery in 1909 Under the Auspices of the Peary Arctic Club Some years ago I met at a dinner in Washington the famous Norwegian arctic explorer Nansen himself one of the heroes of polar adventure and he remarked to me Peary is your best man in fact I think he is on the whole the best of the men now trying to reach the Pole and there is a good chance that he will be the one to succeed I cannot give the exact words but they were to the above effect and they made a strong impression on me I thought of them when in the summer of 1908 I as President of the United States went aboard Peary s ship to bid him Godspeed on the eve of what proved to be his final effort to reach the Pole A year later when I was camped on the northern foothills of Mt Kenia directly under the equator I received by a native runner the news that he had succeeded and that thanks to him the discovery of the North Pole was to go on the honor roll of those feats in which we take a peculiar pride because they have been performed by our fellow countrymen Probably few outsiders realize the well nigh incredible toil and hardship entailed in such an achievement as Peary s and fewer still understand how many years of careful training and preparation there must be before the feat can be even attempted with any chance of success A dash for the pole can be successful only if there have been many preliminary years of painstaking patient toil About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

in 1909 under the auspices of the Peary Arctic Club by Robert E Robert Edwin Peary The struggle for the North Pole began nearly one hundred years before the landing of the Pilgrim Fathers at Plymouth Rock being inaugurated 1527 by that king of many distinctions Henry VIII of England In 1588 John Davis rounded Cape Farewell the southern end of Greenland and followed the coast for eight hundred miles to Sanderson Hope He discovered the strait which bears his name and gained for Great Britain what was then the record for the farthest north 72 12 a point 1128 miles from the geographical North Pole Scores of hardy navigators British French Dutch German Scandinavian and Russian followed Davis all seeking to hew across the Pole the much coveted short route to China and the Indies The rivalry was keen and costly in lives ships and treasure but from the time of Henry VIII for three and one half centuries or until 1882 with the exception of 1594 1606 when through Wm Barents the Dutch held the record Great Britain s flag was always waving nearest the top of the globe We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality product each title has been meticulously hand curated by our staff Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience

(Robert Edwin) Peary, 2018-08-14 The North Pole Its Discovery in 1909 under the auspices of the Peary Arctic Club by Robert E Robert Edwin Peary In 1588 John Davis rounded Cape Farewell the southern end of Greenland and followed the coast for eight hundred miles to Sanderson Hope He discovered the strait which bears his name and gained for Great Britain what was then the record for the farthest north 72 12 a point 1128 miles from the geographical North Pole Scores of hardy navigators British French Dutch German Scandinavian and Russian followed Davis all seeking to hew across the Pole the much coveted short route to China and the Indies The rivalry was keen and costly in lives ships and treasure but from the time of Henry VIII for three and one half centuries or until 1882 with the exception of 1594 1606 when through Wm Barents the Dutch held the record Great Britain s flag was always waving nearest the top of the globe The same year that Jamestown was founded Henry Hudson 1607 also seeking the route to the Indies discovered Jan Mayen circumnavigated Spitzbergen and advanced the eye of man to 80 23 Most valuable of all Hudson brought back accounts of great multitudes of whales and walrus with the result that for the succeeding years these new waters were thronged with fleets of whaling ships from every maritime nation The Dutch specially profited by Hudson s discovery During the 17th and 18th centuries they sent no

less than 300 ships and 15 000 men each summer to these arctic fisheries and established on Spitzbergen within the Arctic Circle one of the most remarkable summer towns the world has ever known where stores and warehouses and reducing stations and cooperages and many kindred industries flourished during the fishing season With the approach of winter all buildings were shut up and the population numbering several thousand all returned home Hudson s record remained unequalled for 165 years or until 1773 when J C Phipps surpassed his farthest north by twenty five miles To day the most interesting fact connected with the Phipps expedition is that Nelson the hero of Trafalgar and of the Battle of the Nile then a lad of fifteen was a member of the party Thus the boldest and strongest spirits of the most adventurous and hardy profession of those days sought employment in the contest against the frozen wilderness of the north We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality product each title has been meticulously hand curated by our staff Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience     *Robert E. Robert E. Peary,2016-04-29 Robert Edwin Peary Sr was born on May 6 1856 in Cresson Pennsylvania The early death of his father when Peary was 3 dictated that he and his mother moved to Portland Maine His senior education took place at Bowdon College and he graduated in 1877 with a Civil Engineering degree For Peary his overriding ambition became the North Pole It was a dream that had also obsessed many others His first exploration attempt was Greenland in 1886 He managed just 100 miles before turning back In 1891 he broke his leg but the recuperation enabled him to more clearly define how to achieve his ambition Inuit survival techniques were now researched and this gave him valuable insight By 1892 he had established that Greenland was an island In his 1898 1902 expedition he claimed an 1899 visual discovery of Jesup Land west of Ellesmere Peary also achieved a farthest north for the western hemisphere in 1902 north of Canada s Ellesmere Island Peary s next expedition was supported by a 50 000 gift Peary used the money for a new ship The SS Roosevelt battled its way through the ice between Greenland and Ellesmere Island establishing an American hemisphere farthest north by ship The 1906 Peary System dogsled drive for the pole across the rough sea ice of the Arctic Ocean started from the north tip of Ellesmere at 83 north latitude The parties made well under 10 miles 16 km a day until they became separated by a storm Peary was without a companion sufficiently trained in navigation to verify his account from that point northward With insufficient food and with uncertainty about whether he could negotiate the ice between him and land he made the best possible dash and barely escaped with his life off the melting ice On April 20 he was no further north than 86

30 latitude He claimed the next day to have achieved a Farthest North world record at 87 06 and returned to 86 30 without camping an implied trip of at least 72 nautical miles 133 km between sleeping even assuming direct travel with no detours There is little doubt that although greatly honoured for his expeditions that Peary was rather elastic with the truth For his final assault on the Pole Peary and 23 men including Ross Gilmore Marvin set off from New York City on July 6 1908 aboard the S S Roosevelt under the command of Captain Robert Bartlett They wintered near Cape Sheridan on Ellesmere Island and from Ellesmere departed for the pole on February 28 March 1 1909 This book relates that attempt on the North Pole Subsequent to the attempt Peary was promoted to the rank of captain in the Navy on October 20 1910 By his lobbying Peary was eventually recognized by Congress to have attained the pole not discoverer in deference to 1908 North Pole claimant Frederick Cook s supporters Peary was given the Thanks of Congress by a special act of March 3 1911 By a special act of Congress on March 30 1911 Peary was promoted to the rank of Rear Admiral in the Navy Civil Engineer Corps retroactive to April 6 1909 and retired the same day In early 1916 Peary became chairman of the National Aerial Coast Patrol Commission It advocated the use of aircraft in detecting warships and submarines off the U S coast Peary used his celebrity to promote the use of military and naval aviation which led directly to the formation of Naval Reserve aerial coastal patrol units during the First World War At the close of the First World War Peary proposed a system of eight air mail routes which became the genesis of the U S Postal Service s air mail system Admiral Robert Edwin Peary died in Washington D C on February 20 1920 He was buried in Arlington National Cemetery

**The North Pole: Its Discovery in 1909 Under the Auspices of the Peary Arctic Club** Robert Edwin Peary, 1886-01-01 It may not be inapt to liken the attainment of the North Pole to the winning of a game of chess in which all the various moves leading to a favorable conclusion had been planned in advance long before the actual game began It was an old game for me a game which I had been playing for twenty three years with varying fortunes Always it is true I had been beaten but with every defeat came fresh knowledge of the game its intricacies its difficulties its subtleties and with every fresh attempt success came a trifle nearer what had before appeared either impossible or at the best extremely dubious began to take on an aspect of possibility and at last even of probability Every defeat was analyzed as to its causes in all their bearings until it became possible to believe that those causes could in future be guarded against and that with a fair amount of good fortune the losing game of nearly a quarter of a century could be turned into one final complete success It is true that with this conclusion many well informed and intelligent persons saw fit to differ But many others shared my views and gave without stint their sympathy and their help and now in the end one of my greatest unalloyed pleasures is to know that their confidence subjected as it was to many trials was not misplaced that their trust their belief in me and in the mission to which the best years of my life have been given have been abundantly justified But while it is true that so far as plan and method are concerned the discovery of the North Pole may fairly be likened to a game of chess there is of course this obvious difference in chess brains are matched against brains In the quest of the Pole it

was a struggle of human brains and persistence against the blind brute forces of the elements of primeval matter acting often under laws and impulses almost unknown or but little understood by us and thus many times seemingly capricious freaky not to be foretold with any degree of certainty For this reason while it was possible to plan before the hour of sailing from New York the principal moves of the attack upon the frozen North it was not possible to anticipate all of the moves of the adversary Had this been possible my expedition of 1905 1906 which established the then farthest north record of 87 6 would have reached the Pole But everybody familiar with the records of that expedition knows that its complete success was frustrated by one of those unforeseen moves of our great adversary in that a season of unusually violent and continued winds disrupted the polar pack separating me from my supporting parties with insufficient supplies so that when almost within striking distance of the goal it was necessary to turn back because of the imminent peril of starvation When victory seemed at last almost within reach I was blocked by a move which could not possibly have been foreseen and which when I encountered it I was helpless to meet And as is well known I and those with me were not only checkmated but very nearly lost our lives as well But all that is now as a tale that is told This time it is a different and perhaps a more inspiring story though the records of gallant defeat are not without their inspiration And the point which it seems fit to make in the beginning is that success crowned the efforts of years because strength came from repeated defeats wisdom from earlier error experience from inexperience and determination from them all
