The Noumenal And The Phenomenal:

The Noumenal and the Phenomenal William Kingsland, 2005-12-01 This scarce antiquarian book is a facsimile reprint of the original Due to its age it may contain imperfections such as marks notations marginalia and flawed pages Because we believe this work is culturally important we have made it available as part of our commitment for protecting preserving and promoting the world s literature in affordable high quality modern editions that are true to the original work **The Parallax View** Slavoj Zizek, 2009-02-13 In i ek s long awaited magnum opus he theorizes the parallax gap in the ontological the scientific and the political and rehabilitates dialectical materialism The Parallax View is Slavoj i ek s most substantial theoretical work to appear in many years i ek himself describes it as his magnum opus Parallax can be defined as the apparent displacement of an object caused by a change in observational position i ek is interested in the parallax gap separating two points between which no synthesis or mediation is possible linked by an impossible short circuit of levels that can never meet From this consideration of parallax i ek begins a rehabilitation of dialectical materialism Modes of parallax can be seen in different domains of today s theory from the wave particle duality in quantum physics to the parallax of the unconscious in Freudian psychoanalysis between interpretations of the formation of the unconscious and theories of drives In The Parallax View i ek with his usual astonishing erudition focuses on three main modes of parallax the ontological difference the ultimate parallax that conditions our very access to reality the scientific parallax the irreducible gap between the phenomenal experience of reality and its scientific explanation which reaches its apogee in today s brain sciences according to which nobody is home in the skull just stacks of brain meat a condition i ek calls the unbearable lightness of being no one and the political parallax the social antagonism that allows for no common ground Between his discussions of these three modes i ek offers interludes that deal with more specific topics including an ethical act in a novel by Henry James and anti anti Semitism The Parallax View not only expands i ek s Lacanian Hegelian approach to new domains notably cognitive brain sciences but also provides the systematic exposition of the conceptual framework that underlies his entire work Philosophical and theological analysis detailed readings of literature cinema and music coexist with lively anecdotes and obscene jokes

The Structure of Being International Society for Neoplatonic Studies, 1982-01-01 Neoplatonism has sometimes been seen as a species of mysticism This volume shows that Neoplatonism has on the contrary a characteristic and definable structure It presents the logic of Neoplatonism and carefully distinguishes it from the logic of other forms of philosophy *The Lancet* ,1919

Complexity and Emergence Avijit Lahiri, 2024-05-12 This monograph focuses on two major themes of current interest those of complexity and emergence Neither of the two concepts is in the very nature of things precisely defined or easily comprehended Complexity is all around us while the sciences often analyze entities and events by making simplifications but the fault lines in the latter get exposed over larger spans of space and time Complexity entails emergence that involves discontinuity and novelty in the evolution of complex systems based on the appearance of distinctive spatial and

temporal structures Underlying an occurrence of emergence is an instability involving the transition from one stable regime to another where distinct space time scales acquire relevance across the transition The structures on the two sides of the transition are characterized by distinct sets of state variables where on one side of the transition collective variables make their appearance Complexity and emergence are viewed in this book in the context of the Kantian noumenal phenomenal divide The noumenal reality is the repository of all the complexity that there is while the phenomenal reality emerges from the noumenal in the process of our perception interpretation and inference The noumenal exists in itself as a self determined whole and reveals itself to us in fragmentary patches as skewed projections that we assemble to form our phenomenal world that keeps on emerging ceaselessly Our own biological evolution and the evolution of our phenomenal world occurs in a mutually consistent process that can be referred to as co evolution We seek regularities in the phenomenal world by means of our scientific theories which are often successful but that success is fragile as over larger spans of space and time anomalies make their appearance giving a lie to the simplicity and regularity previously presumed to have been unearthed Simplicity regularity and harmony are only fleetingly located in the phenomenal world by means of our theories as these keep on being revised endlessly and often radically thereby generating a mosaic of theories that becomes ever more complex indicating a pervasive complexity of the noumenal world from which the phenomenal emerges by way of strictly limited projections The foundational metaphysics on which this book is based tells us that reality is fundamentally complex while tiny islands of simplicity regularity and harmony are embedded in it in isolated space time domains

The Cambridge Companion to Hegel Frederick C. Beiser, 1993-01-29 This volume considers all the major aspects of Hegel's work epistemology logic ethics political philosophy aesthetics philosophy of history and philosophy of religion

The Problem of Perception and the Experience of God Sameer Yadav, 2015 Based on the author's thesis Th D Duke Divinity School 2014 titled The problem of perception and the perception of God John McDowell and the theology of religious experience

The Divine Authenticity of Scripture A. T. B. McGowan, 2008-05-21 Andrew McGowan examines the evangelical understanding of the nature and use of Scripture McGowan emphasizes the work of the Holy Spirit in relation to Scripture and argues that we should speak of spiration rather than inspiration of Scripture

The Elementary Process Theory Marcoen Cabbolet, 2022-07-20 On the one hand theories of modern physics are very successful in their areas of application But on the other hand the irreconcilability of General Relativity GR and Quantum Electrodynamics QED suggests that these theories of modern physics are not the final answer regarding the fundamental workings of the universe This monograph takes the position that the key to advances in the foundations of physics lies in the hypothesis that massive systems made up of antimatter are repulsed by the gravitational field of a body of ordinary matter this hypothesis takes us to an uncharted territory where GR and QED do not hold up From there the Elementary Process Theory EPT is developed this is a collection of seven generalized process physical principles that do hold up if the hypothesis is a fact of nature Using four dimensionalistic terminology the EPT abstractly describes an

elementary process in the temporal evolution of a massive system that interacts with its environment The idea is that these elementary processes take place at Planck scale and are essentially all the same regardless of the type of interaction that takes place the EPT is thus intended as a candidate for a unifying scheme that applies to all four basic interactions By mathematical modeling the relation is explored between the EPT and classical mechanics quantum mechanics special relativity and GR

God and Realism Peter Byrne,2017-07-05 Peter Byrne s study of God and realism offers a critical survey of issues surrounding the realist interpretation of theism and theology Byrne presents a general argument for interpreting the intent of talk about God in a realist fashion and argues that judging the intent of theistic discourse should be the primary object of concern in the philosophy of religion He considers a number of important ideas and thinkers supporting global anti realism and finds them all wanting After the refutation of global anti realism Byrne considers a number of important arguments in favour of the notion that there is something specific to talk about God which invites an anti realist interpretation of it Here he looks at verificationism the writings of Don Cupitt forms of radical feminist theory and the ideas of D Z Phillips The book concludes with a discussion of whether theology as a discursive academic discipline can be interpreted realistically Offering a comprehensive survey of the topic and of the leading literature in the field this book presents key arguments for exploring issues brought to bear upon the realism debate Students and scholars of philosophy of religion philosophy of language metaphysics theory of knowledge and theology will find this an invaluable new contribution to the field

Evil in the Western Philosophical Tradition Gavin Rae,2019-04-10 Gavin Rae analyses the history of Western conceptions of evil showing it to be remarkably complex differentiated and contested He traces the problem of evil from early and Medieval Christian philosophy to modern philosophy German Idealism post structuralism and contemporary analytic philosophy and secularisation

The Duty of Altruism Ray Madding McConnell,1910

The Being of Negation in Post-Kantian Philosophy Gregory S. Moss,2022-11-13 By drawing on the insights of diverse scholars from around the globe this volume systematically investigates the meaning and reality of the concept of negation in Post Kantian Philosophy German Idealism Early German Romanticism and Neo Kantianism The reader benefits from the historical critical and systematic investigations contained which trace not only the significance of negation in these traditions but also the role it has played in shaping the philosophical landscape of Post Kantian philosophy By drawing attention to historically neglected thinkers and traditions and positioning the dialogue within a global and comparative context this volume demonstrates the enduring relevance of Post Kantian philosophy for philosophers thinking in today s global context This text should appeal to graduate students and professors of German Idealism Post Kantian philosophy comparative philosophy German studies and intellectual history

John Hick's Pluralist Philosophy of World Religions Paul Rhodes Eddy,2020-08-26 This title was first published in 2002 One of the most fascinating and controversial interpretations of religious diversity is religious pluralism According to John Hick s model of religious pluralism all the world s great religions are equally valid ways of

understanding and responding to the ultimate spiritual reality This book offers an exposition of and critical response to John Hick's model Introducing the various interpretations of religious diversity being discussed today this book presents constructive suggestions as to how things could be further developed to offer a more accurate less confusing presentation of the various options in theology of religions The standard threefold typology of responses to religious diversity exclusivism inclusivism and pluralism are explained and defended Hick's pluralist interpretation of religious diversity is traced culminating in a critical assessment of Hick's pluralistic model and an up to date summary of a variety of critiques directed toward Hick's proposal Paul Rhodes Eddy concludes that Hick's present model is ultimately unsuccessful in retaining both of his long cherished goals a robust religious realism and a consistent religious pluralism whilst overcoming the most difficult problem for the pluralist the fact that the world's religions understand the divine in often contradictory ways

The Reality of the Ideal Alexander T. Englert, 2025 Immanuel Kant is perhaps most famous in ethics for his idea of the moral law or categorical imperative But the moral law is just part of the story As we are moved by the moral law so too are we moved to think of a possible world in which this law has complete control The resulting image of an ideal world Kant calls the highest good But why is this ideal important for everyday life In *The Reality of the Ideal* Englert breaks new ground by arguing that its primary importance is to aid us in contemplation and the construction of a worldview

Dialectic and Difference Alan Norrie, 2009-12-04 *Dialectic and Difference* is the first systematic exploration of Roy Bhaskar's dialectical philosophy and its implications for ethics and justice That philosophy has three aims a dialecticisation of original critical realism a critical realisation of dialectic and a metacritique of western philosophy In the first real absence or negativity links structured being to dialectical becoming in a dynamic world The second draws on Marx to locate the critical impulse in Hegel's dialectic in a material open and changing totality The third identifies a central problem in western philosophy from the Greeks on the failure to think real negativity as the essence of change ontological monovalence Bhaskar's ethics connect basic human ontology with universal principles of freedom and solidarity He marries constellates these with a grasp of how principles are historically shaped His account of freedom moves from the infant's primal scream to the eudaimonic society but thinks the limits to freedom under modern conditions The morally real in ethics and justice is displaced and reconfigured as relations between the ideal and the actual Western philosophy systematically denies the real negativity that drives Bhaskar's dialectic Metacritique traces this to Parmenides and Plato's account of non being as difference It enables a critique of the poststructural radicalisation of difference via Nietzsche and the doctrine of Heraclitan flux Mobilised as the other of Plato's Forms this remains a move on Platonic terrain It too denies real negativity in structured being as the ground of historical change and moral praxis This text is essential reading for all serious students of social theory philosophy and legal theory

The Theosophist, 1902 **Evangelism in a Skeptical World** Sam Chan, 2018-03-13 Many of the old methods of evangelism no longer work effectively today We need new methods to communicate the timeless message of the gospel in

culturally relevant ways In a post Christian post churchd post reached world most Christians have been poorly equipped to tell their friends about Jesus Dr Chan combines the theological and biblical insights of classic evangelistic training with his own and hard won insights from missiology on contextualization cultural hermeneutics and storytelling Every chapter is illustrated with real world examples drawn from over fifteen years of evangelistic ministry across the globe These are methods that really work with university students urban workers and professionals getting past the defensive posture that people have toward Christianity so they can seriously consider the claims of Jesus Christ Field tested and filled with unique fresh and creative insights this book will equip you to share the gospel in today s world and help as many people as possible hear the good news about Jesus

The Fourfold Composition of Elements and pseudo-Elements in Axial Perspective John O'Loughlin,2022-05-22 A deeply philosophical project that gradually moves from a loosely discursive opening to an intensely metaphysical and logical ending during the course of which both elements and pseudo elements are examined or rather re examined by the author with effect to presenting his findings in the most comprehensively exacting logical and philosophical light possible A kind of masterpiece that would suggest a parallel of sorts with Arthur Koestler in its quest for logical perfection

The Metaphysics of Paradox Wm. Andrew Schwartz,2018-09-15 This book is an exploration into the paradoxical structure of pluralistic thinking as illuminated by both Western and Eastern insights especially Jainism By calling into question the most fundamental assumptions of religious pluralists the author hopes to contribute to a paradigm shift in discourse on religious pluralism and conflicting truth claims
