The *New Organon* or True Directions concerning the interpretation of Nature. Francis Bacon. Those who have taken upon them to lay down the law of nature as a thing already searched out and understood, whether they have spoken in simple assurance or professional affectation, have therein done philosophy and the sciences great injury. For as they have been successful in inducing belief, so they have been effective in quenching and stopping inquiry, and have done more harm by spoiling and putting an end to other men's efforts than good by their own. Those on the other hand, who have taken a contrary course and asserted that absolutely nothing can be known, whether it were from hatred of the ancient sophists or from uncertainty and fluctuation of mind, or even from a kind of fullness of learning that they fell upon this opinion, have certainly advanced reasons for it that are not to be despised; but yet they have neither started from true principles nor rested in the just conclusion. Zeal and affectation having carried them much too far. The more ancient of the Greeks, whose writings are lost, took up with better judgment a position between these two extremes, between the presumption of pronouncing on everything and the despair of comprehending anything, and though frequently and bitterly complaining of the difficulty of inquiry and the obscurity of things, and like impatient horses champing at the bit, they did not the less follow up their object and engage with nature, thinking it seems that this very question, viz. whether or not anything can be known, was to be settled not by arguing but by trying. And yet they too, trusting entirely to the

force of their understanding applied no rule but made everything turn upon hard thinking and perpetual working and exercise of the mind We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality product each title has been meticulously hand curated by our staff Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience
